Bondar-Clegg & Company Ltd.
130 Pemberton Avenue
North Vancouver, B.C. V7P 2R5

Gentlemen:

I will ship to you tomorrow, via Greyhound to Blaine, Washington, fifteen stream sediment samples numbered 22976 - 22989 inclusive and 22998 and, also, eight rock samples numbered 22990 - 22997 inclusive.

Please perform geochemical analyses for Au, Ag, Cu, Zn, Mo, As, Hg, and W on all of the stream sediment samples. Make the same determinations, also geochemically, on the rock samples and, in addition, run a boron analysis (A.A. or whatever) on Nos. 22996 and 22997 only.

IF ANY OF THE ROCK SAMPLES CONTAIN MORE THAN 50 ppb Au, RERUN THEM USING THE CLASSIC GRAVIMETRIC FIRE ASSAY PROCEDURE.

Prepare triplicate pulps for the eight rock samples and mail the extra ones, along with your invoice in duplicate, to me in Cave Junction. Discard the rejects and any remaining stream sediment that you don't need.

Thank you for your detailed attention.

Very truly yours,

Ronald C. Parker
