

Tubers (Packaged and graded for consumption)**Additional Information**

- Packaged potatoes are those that are commercially packed in standard packages of 50 lbs or less; other packages (more than 50 lbs) will be considered bulk potatoes.
- Potatoes must be packed in new containers
- Potatoes from non-infested and infested areas within a State regulated for the Columbia Root Knot Nematode and the Soybean Cyst Nematode can be imported into Canada under certain conditions.
- Only U.S. "No. 1" grade potatoes may be shipped to Canada.
- A USDA "Certificate of Inspection for Canadian Destinations" (AMS Form FV- 205) is required. Additionally, the following statement as to origin must appear on the FV-205: **"Based on documentation, the potatoes in this shipment were grown in (list State here)."** The applicant's written, signed and dated documentation must remain on file at the AMS inspection office.

Plus one of the following:

- The potatoes must be treated with a sprout inhibitor. The following statement must appear on the AMS Form FV-205: **"Based on documentation, the potatoes in this shipment were treated with a sprout inhibitor."** Canadian registered sprout inhibitors are Chlorpropham (CIPC), and Maleic Hydrazide (MH). CFIA will also accept essential oil as an approved sprout inhibition treatment. The treatment must be monitored / verified by AMS and the details of the treatment should be placed on the AMS inspection report.
- Canada allows an exemption to the sprout inhibitor treatment requirement for potatoes harvested within 30 days prior to export and packed in bags of 50 lbs. or less. The following statement must appear on the AMS Form FV-205: **"Based on documentation, the potatoes of this shipment were packed in containers of 50 lbs. or less within one month of harvest."**

All purple and blue skinned potato varieties susceptible to potato wart disease (*Synchytrium endobioticum*) are prohibited into Newfoundland except the following varieties; AC Blue Pride, AC Domino, Blue Mac and Brigus.

Tubers (Processing or repacking)

Please see the Canadian Potato Shipments Phytosanitary Requirements memo dated August 23, 2012.

Additional Information

Phytosanitary Certificate (PC) and import permit (IP) is required.
Additional Declaration is required. See PExD for current AD.

OR,

- Import Permit is required.

- PPQ Form 540 - A vehicle cleanliness certificate is required with the following AD: "**This carrier meets Canadian Plant Health cleanliness requirements**". The document used should be kept with the supporting documents for the shipment, but **DO NOT** attach to the phytosanitary certificate.
- A certificate of Origin is required
- The importing facility must have been approved under a compliance agreement with CFIA prior to receiving any shipments.

Any repacking of potatoes will be regulated in the same way as bulk potatoes. The Repacking facilities must have entered into a compliance agreement (CA) with CFIA under the authority of the *Plant Protection Act*. An Import permit is required.

NOTE: CFIA will accept the AMS FV-205 in lieu of the PPQ Form 540 (vehicle cleanliness) certificate with the following AD: "**This carrier meets Canadian Plant Health cleanliness requirements**"

Distribution of Regulated Potato Pests in the Continental United States

January 18, 2012

- **PCN:** Potato Cyst Nematodes (*Globodera pallida* and/or *Globodera rostochiensis*)
- **CRKN:** Columbia Root Knot Nematode (*Meloidogyne chitwoodi*)
- **PRN:** Potato Rot Nematode (*Ditylenchus destructor*)
- **SCN:** Soybean Cyst Nematode (*Heterodera glycines*)
