OUR PLANS FOR DEVELOPMENT

This property is conveniently located 3/4 mile from a switch of the Miller Logging R.R. providing an ideal outlet for ore and concentrates. The mine is also approached by a first class mountain road open all year.

The mine is incorporated for $50,000 so that stoping can begin and all necessary additional mill machinery and cable can be installed. Then the daily production will be 100 Tons for the first 6 months, and permitting a low of $10.00 net profit, the daily net will be over $1000.00.
