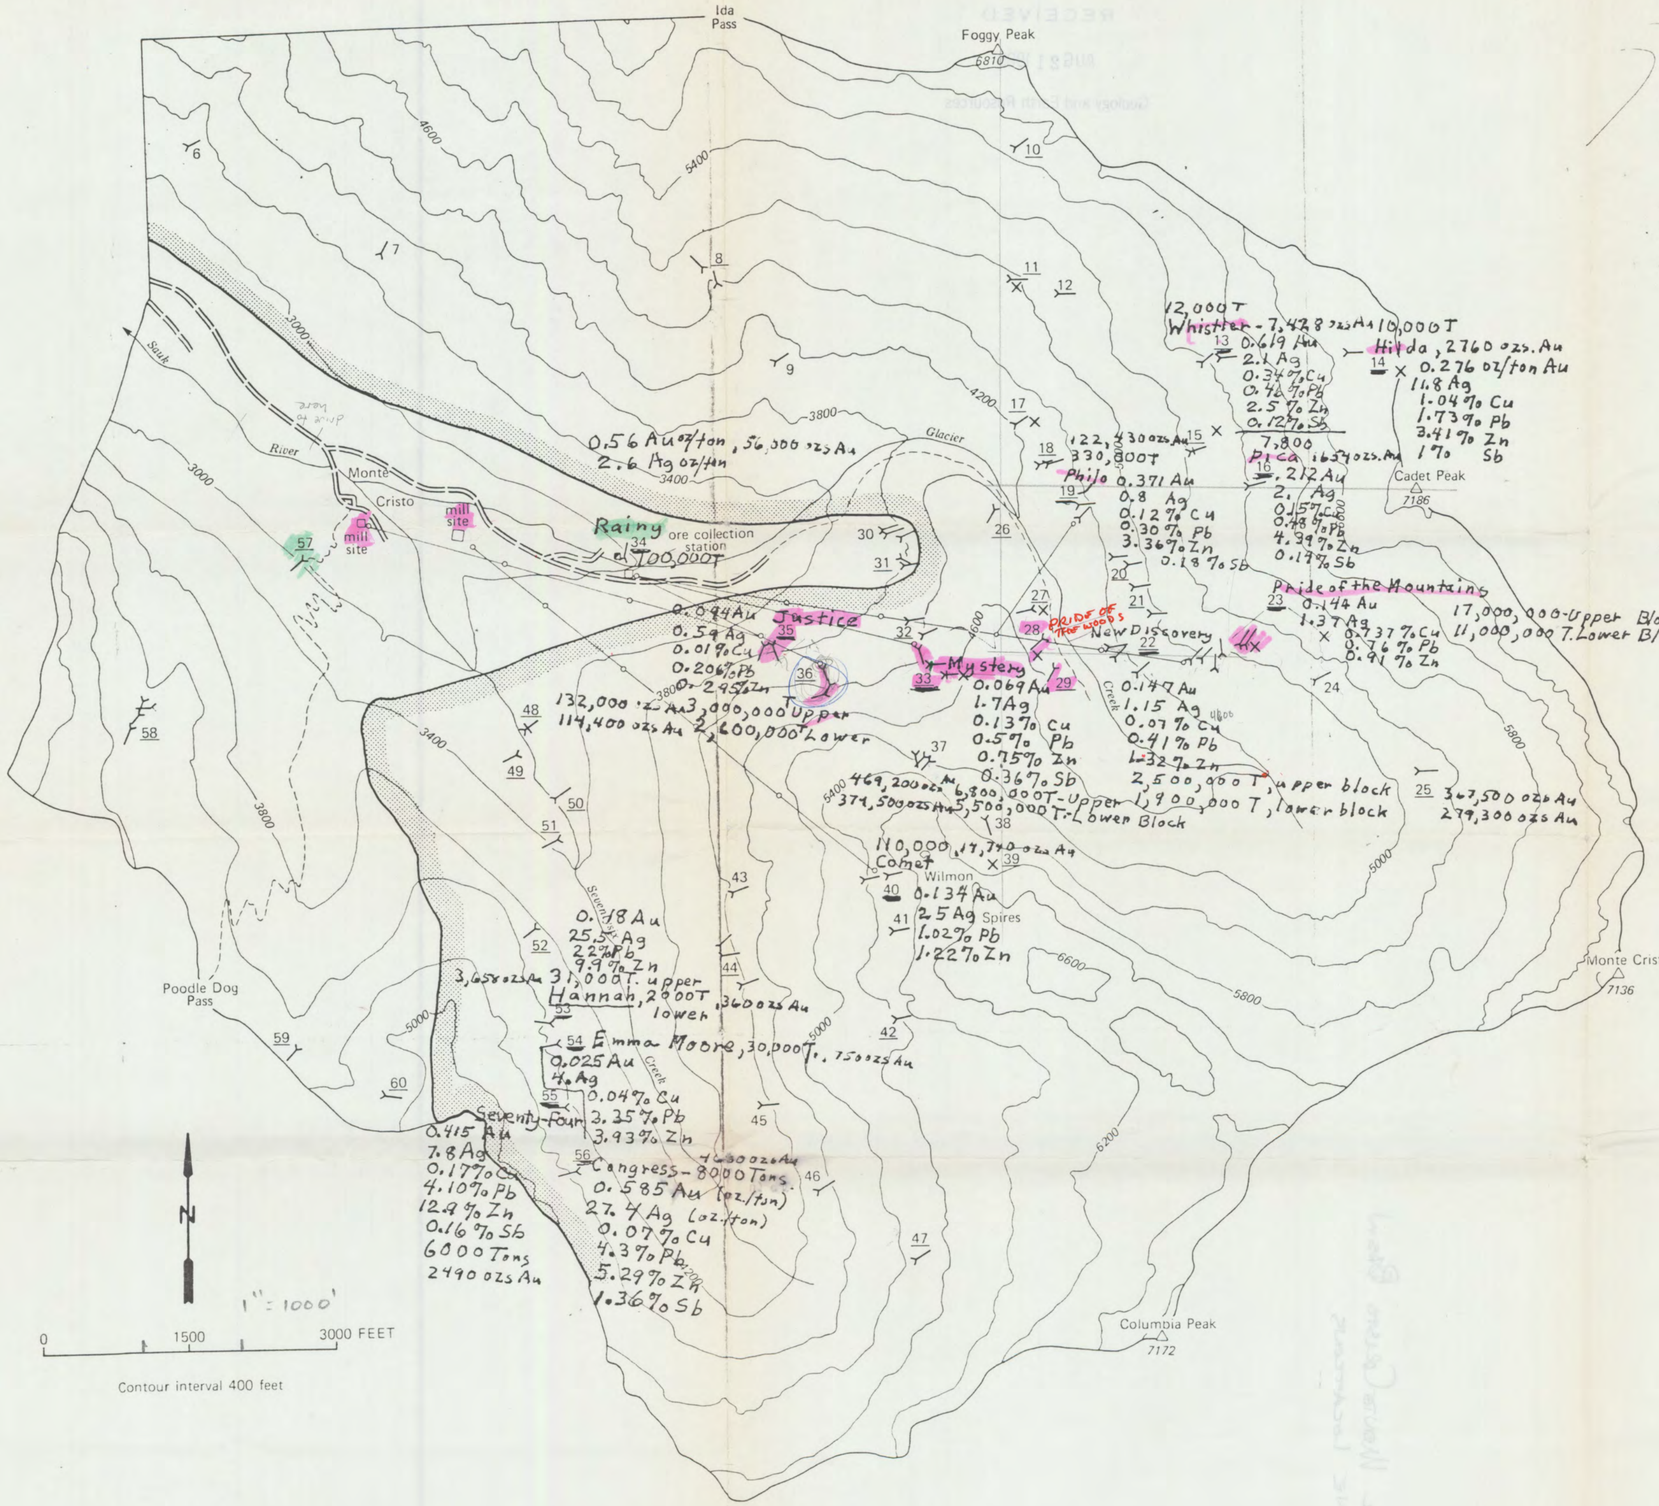
Research, Prospecting, and Exploration Target Map of Monte Cristo - 1985

© Jack Sauers, geologist, August, 1985

Modified partly after U.S. Bureau of Mines data.

The ore zones and veins should all be drilled so as to estimate wall rock grade, and to obtain fresher less weathered and leached samples. Location: Snohomish County, Washington



EXPLANATION

Roadless area boundary

Adit, caved adit

Shaft

Prospect pit, trench, or open cut

Property having indentified mineral resources or potential resources

Approximate tramway site

Symbol indicates resources or potential for that commodity

- Au - gold
- Ag - silver
- Cu - copper
- Pb - lead
- Zn - zinc
- Asb - asbestos
