

## Butane Hash Oil Investigations

We have been having explosions constantly because butane hash oil labs are popping up throughout our county. We knew it was a matter of time before someone was killed or seriously injured. We attended this training and it was invaluable. The investigative techniques we learned were excellent and came from seasoned narcotic investigators. Shortly after attending the training, we had an explosion that seriously hurt an innocent bystander. This training helped us get a successful prosecution. Detective "B"- Undercover California Task Force Officer

### Get ready for the next BHO explosion in your jurisdiction. You will learn

- Learn what you need to know to testify as an expert in court
- Response procedures for both patrol and narcotics units
- Understand the process, step by step, of how to make butane hash oil
- Know the history of BHO and other types of hashish extraction through traditional BHO labs as well as closed circuit labs
- Have an understanding of THC and why it makes BHO so popular
- Learn what it takes to ignite a BHO Lab, including what equipment you have that will ignite a lab
- The class will culminate with a case debrief where a person was killed in a BHO explosion... know what went right and what went wrong

#### Blue Line Training
