**Course Description**

Tactical Medicine for High Risk First Responders is designed to familiarize the experienced medical tactical law enforcement personnel (or other field medics) with the next operational level of first responder medical support. The course curriculum includes an overview of Tactical Casualty Care (TCCC), battlefield medication as well as advanced field medicine. Including Needle Chest Decompression, Cricothyrotomy, Advanced Airway Management and Advanced Bleeding Control procedures including the latest in TCCC application. This course can be tailored to agency-specific needs. The Tactical Medicine for High Risk First Responders course is available for units with a medical focus and advanced medical protocols and SOPs. The course combines classroom learning and hands-on skill stations. Scenario assessment stations enable you to put your learning to work in simulated trauma situations.

In keeping with the intermediate nature of this course, students will plan, facilitate, and evaluate a culminating scenario-driven practical exercise. Student performance will be carefully evaluated and in-depth feedback will be provided during a comprehensive after-action debriefing.

**Topics included**

- Introduction to tactical medicine
- Phases of Tactical Combat Casualty Care (TC3)
- Medical Terminology
- Bleeding Control
- Chest Trauma
- Battlefield Medications
- Shock Management
- Fluid resuscitation
- Tactical Casualty Movements

**Course Length** Tactical Medicine for High Risk First Responders is a 3-day course

**Prerequisites** There are no prerequisites to attend this course
