Target Audience:

This course is targeted for any forensic or law enforcement professional with the goal of proficiency and competence in the recovery and investigative value of footwear and tire track evidence. This course is appropriate for novice and experienced crime scene personnel, investigators, detectives, and for footwear and tire track examiners. Basic competency with camera operation is recommended. Since the proper recovery of evidence is important in the field, in the laboratory and to an investigation, attendees involved with any phase of footwear and/or tire track evidence will benefit from this course.

Attendees Should Bring:

Students should bring a SLR camera with remote flash or cord for the extension of flash 6 to 10 feet, flashlight, tape measure and tripod. A variety of scales are recommended including L shaped and 6" forensic scales. Attire should include necessary dress for outdoor activity, including local weather considerations as well as the use of casting and blood enhancement materials.
