

## **Investigative Resources Course**

When: October 3, 2012 1300 - 1730

Where: Embassy Suites @ Portland Airport

Description: This course is designed for ALL law criminal justice-based officers, detectives, investigators, analysts, and others whose responsibilities include investigating or supporting the investigative efforts of criminal activities, and/or the accurate assessment and tracking of current criminal trends.

Today, conducting a successful investigation involves considerably more than just a confession and a quick trip to the records unit. The databases, technology, and other resources available to law enforcement are growing every day. These resources significantly increase the speed, accuracy, and efficiency with which investigation can be completed and convictions obtained.

The FBI, Oregon Department of Justice, Naval Criminal Intelligence Service, utility companies, and other agencies and organization will present time and case-saving information on resources and tools available with a simple phone and/or several keystrokes on your computer.
