Arrest-Related and In-Custody Death Investigative Specialist™

August 14-16, 2013

Host Agency: West Richland Police Department
Co-Host Agency: Richland Police Department
Training Facility: Richland Police Dept. Training Room
871 George Washington Way | Richland Wa. 99354
For onsite info: Duane Olsen
Email: dolsen@westrichland.org | Phone: 509-967-3425

REGISTRATION DEADLINE: August 4, 2013

TIME: 8:00am - 5:06pm (One Hour For Lunch)

Program Content:

Detectives and investigators (Internal, Criminal, and/or Civil) are often called upon to investigate arrest-related and/or in-custody deaths that are often associated with electronic control devices (ECD), restraint methods, use of force, illicit drugs, prescription drugs, synthetic drugs, excited delirium, and/or other agitated chaotic event™

- Investigating arrest-related deaths: A blueprint
- Investigating sudden, in-custody deaths
- Investigating ECD alleged excessive use-of-force complaints
- Investigating ECD associated deaths
- Investigating restraint associated deaths
- Investigating excited delirium associated deaths
- National use-of-force standards and how they are applied to use-of-force events
- Americans with Disabilities Act and its application to arrested individuals
- Manufacturer product warnings, training, etc. and how they are applied to use-of-force events (including death events)
- Manufacturer lesson plans and how they are used by the agency
- Manufacturer lesson plans and how they are used by the agency
- Agency lesson plans and how they are used in use-of-force events, including death events
- Agency policy and procedures and how they can be used against the agency
- Four categorical causes of excited delirium
- Excited Delirium events: Best practices.
- Agitated Chaotic Events™: causes, best practices, and outcomes
- Contemporary sudden death theories (e.g., SUDEP, synthetic drugs, ECDs, restraint methods, etc.)
- ECD Models (e.g., TASER®, Stinger, Karbon Arms, NOVA)
- The importance of event timelines (especially in ECD-associated deaths)
- Understanding ECD Firing Records, Time Stamps, and their discrepancies
- ECD evidence collection do's and don'ts
- ECD cartridge, wire, probe, and trace evidence analysis
- Plus much more.

REGISTRATION DEADLINE: August 2, 2013

TIME: 8:00am - 5:00pm (One Hour For Lunch)

Program Content:

This IPICD Instructor program is based upon scientific, medical, experimental, and legal research, and is the most current multidisciplinary program available on this subject.

- History of sudden death
- Who is at risk for sudden death?
- Pre-disposing factors
- History of excited delirium
- Categories of excited delirium
- Excited delirium syndrome
- Agitated Chaotic Events™ (ACE) and sudden death (categories, behaviors, & responses)
- Causation (scientific, legal, medical, general, & specific)
- Behavioral Cues (psychological, communication, & physiological)
- Excited Delirium Intervention "Best Practices"
- Electronic control devices (ECD)-associated deaths
- Positional asphyxia (science v. non-science)
- Neck restraints and arrest-related/sudden deaths (AR-SD)
- Restraint methods and AR-SD
- Pepper spray and AR-SD
- Illicit drugs and AR-SD (e.g., cocaine, methamphetamine, Ecstasy, etc.)
- Prescription drugs and AR-SD (e.g., Zoloft®, Adderall XR®, Ritalin®, etc.)
- Organic "drugs" and AR-SD (e.g., Salvia, etc.)
- Synthetic drugs and AR-SD (e.g., bath salts, etc.)
- Over-the-Counter drugs and AR-SD (e.g., Aspirin, etc.)
- Poly-drug combinations and AR-SD
- Causation (scientific, legal, medical)
- Liability issues
- Contemporary theories of sudden death (including electronic control devices, hog tying, neck restraints, restraint methods, OC, Etc.)
- ADA Issues
- Transport Issues
- Investigation excited delirium and sudden, in-custody deaths: A blueprint
- Psychological autopsy
- Report writing for excited delirium and sudden, in-custody deaths
- Teaching a user-level program
