

*Washington Association of Technical Accident Investigators*

**CRASH DATA RETRIEVAL TECH 1 & 2  
(CERTIFIED)**

Instructor: Ron Sanders

DATES: Jan 6 & 7, 2014

Cost: \$224 (WATAI Member) \$249 (non member)

Location: Spokane County Sheriff's Training Ctr.  
10319 E. Appleway Blvd. Spokane Valley, WA 99206

**TECH 1 – Course Description:**

The basic technician level training exposes the CDR System user to the basic functions of the Bosch CDR system so that, at a minimum, the user can confidently image data from supported vehicles using the standard OBD II (“DLC”) port and, in most cases, directly from the airbag control module (ACM).

**TECH 2 – Course Description:**

This is the hands-on extension follow up to the Basic CDR Technician course offering individual or optimally small group guided instruction in (1) in-vehicle DLC data imaging, (2) module location and identification and direct-to-module data imaging, (3) practical booster and adapter applications and (4) “back powering” in-vehicle systems to enable DLC data imaging. This” hands on” instruction and then evaluation by a Trainer/Mentor would complete the CDR Technician Level certification.

Contact Dave Wells (WATAI President) (425) 327-5526 if you have any questions.

**Registration:**

To register for the two day class simply fill in the information below and mail this form to:
