Course Overview Marijuana has been used since ancient times; however, today marijuana laws are going through a major overhaul. Many states have legalized medical marijuana, and now Washington and Colorado have legalized its recreational use. Understanding the cannabis culture and recognizing the observable effects of its use has never been more important. This course guides participants through systematic steps of detecting someone suspected of being under the influence of cannabis, with attention being placed on the new laws. Discover what to do when a student is suspected of cannabis use. Learn what to look for and where. Easy to use strategies will be explored along with helpful ways of identifying a potential cannabis user. You will walk out of this training with the tools necessary to immediately take on the next incident that comes your way.

Speaker Sergeant Mike Graddon, M.Ed.
