

Advanced Threat Assessment & Management

*Friday, May 2, 2014 9 a.m. - 5 p.m.
Student Center 160*

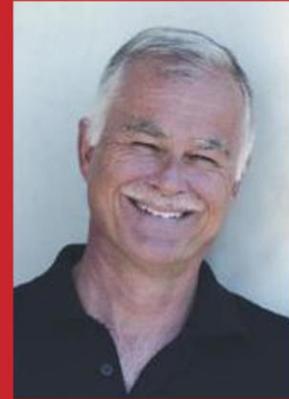

This training will focus on threat assessment for targeted or intended violence. Content will include differences between threat assessment and more traditional violence risk assessment and new data on affective vs. predatory violence, a theoretical typology of warning behaviors --accelerating patterns of risk in such cases-- and some confirmatory empirical data, and specific findings from various domains of targeted violence. The content aspects of psychosis-- "psychotic action" -- and its relationship to targeted violence and research on threats, typologies, and risk management strategies will be included.

Participants will:

1. Describe three differences between TA and VRA
2. Identify eight warning behaviors in potential cases of targeted violence
3. List three dynamic characteristics of adolescent and adult mass murders
4. Compare clinical and motivational differences between public figure stalkers and prior sexually intimate stalkers
5. More fully understand the importance of psychotic content in targeted violence
6. Be introduced to new threat research from Australia
7. Be able to formulate two risk management strategies for targeted violence

Cost:

\$250 General Public
\$200 Alumni & Campus Community
\$100 Students

Dr. Reid Meloy holds an ABPP in forensic psychology, conducts research, and consults on criminal matters in the US and Europe. He is a clinical professor of psychiatry at the University of California, San Diego; and faculty member, the San Diego Psychoanalytic Institute. He is co-editor of the International Handbook of Threat Assessment (Oxford Univ. Press, 2014). His other publications include The Psychopathic Mind (1988) and The Psychology of Stalking (1998).
