## Course Overview

Cannabis legalization is a reality, and today's cannabis laws are going through a major overhaul. Trying to negotiate within the crazy quilt of the laws can be difficult. Understanding the cannabis culture and recognizing the cannabis induced state has never been more important. This specialized course candidly offers necessary information on cannabis. What does the "high" experience look like? This course guides participants through systematic steps of detecting someone suspected of being under the influence of cannabis. If you are not aware of the often subtle signs to look for, those signs will go unnoticed, and use may go undetected. The speaker displays visual aids of current paraphernalia, hidden compartments and pro-drug clothing, during this very popular multimedia presentation.

**Speaker** Sergeant Mike Graddon, M.Ed.
