

## ***ATTN: TRAINING OFFICERS AND ALL INVESTIGATORS***

### ***Turn every investigator into a "walking polygraph"!***

The LSI Basic Course on SCAN and LSI Advanced Workshop on SCAN will be held in **Richland, Washington** on **February 17-20, 2015** at the Richland Police Department.

**SCAN by LSI**, sometimes referred to as "statement analysis" -

- is a unique, effective technique for obtaining information and detecting deception strictly by means of verbal communication.
- **SCAN** (Scientific Content Analysis) gives you the maximum information from every interview.
- in preliminary screening, **SCAN** eliminates individuals who are not involved, enabling you to concentrate on the real suspects.
- **SCAN** taps the most effective source of information - the person's own words!

**SCAN gives the investigator a major effective tool** for obtaining information and detecting deception from every statement. SCAN transforms the investigator from an ordinary "collector of information" into a "walking polygraph".

**SCAN will reduce the time of investigation** for your department; it will avoid costly unnecessary investigation, thus saving money, work time, and manpower; **and it will solve cases that otherwise would be left unsolved.**

### ***Training your personnel in the SCAN technique will be the best investment in their law enforcement career!***

Tuition fees: Basic Course: \$600 per student  
(or \$450 for groups of two or more students)

Advanced Workshop: \$375 per student

Combined tuition for the Basic Course and Advanced Workshop: \$800

**Special group rate** for departments registering students for both classes:  
\$700 per student if registering 2 or more students

Registrations may be paid by check (payable to LSI), credit card or purchase order.
