

# Street Level Pharmaceutical Investigations

I am a pretty active street officer. I was making a lot of arrests, but they all revolved around meth and heroin. I knew I was missing more. After attending this class, I realized I was missing a lot of enforcement opportunities. This class was a perfect balance of how pharmaceutical fraud is committed, indicators of pharmaceutical drug influence, and how to find the indicators of pharmaceutical drug abuse. This should be mandatory training in every police academy. The drug world is changing and we need to change with it. "Officer G"- a California police officer

Change with the times; there are new drugs replacing street drugs. In this dynamic class, you will learn

- Patrol procedures for in progress prescription fraud calls
- The controlled substances act and how it applies to enforcement
- Legal review of pharmaceutical diversion
- Diversion methods
- Doctor shopping
- Faking injuries for prescriptions
- Prescription fraud
- Internet pharmacies
- Drug impairment as it relates to abused pharmaceuticals
