Cost: \$295/Person

Includes licensing fee for 2016.

- Does your facility have a training program in place that empowers your staff to WIN during a Violent Intruder attack?
- Have you done all that you can to keep your facility safe and decrease your liability exposure?

“Even when law enforcement was present or able to respond within minutes, civilians often had to make life and death decisions, and, therefore, should be engaged in training and discussions on decisions they may face.”

2014 FBI ACTIVE SHOOTER REPORT

While many training programs only teach what to do when a Violent Intruder is at your door, our training system is different from others on the market. It is designed to provide organizations with a comprehensive plan to prepare your building and your people to not only survive, but to WIN during a Violent Intruder Event. During our V.I.P.I.R. Instructor Certification Training you will receive training in the following areas:

- "Why Teens Kill: Warning Signs, Causes, Triggers and Prevention" developed by youth homicide expert Phil Chalmers.
- The mentality of a Violent Intruder and discussions of actual incidents to better understand what we are preparing others to defend against.
- Crime Prevention Through Environmental Design (CPTED) strategies which will aid facilities in preparing the physical environment to potentially deter and interrupt an attacker.
- Threat assessment principles to help identify potential problems with a building or area and to come up with solutions to address them.
- Violent Intruder response guidelines designed to encourage a new way of thinking which stresses a pro-active response to deal with a Violent Intruder Event. This training will empower users to effectively respond to, and ultimately WIN during a Violent Intruder Event for yourself and those in your care. What you will teach others will allow them to minimize the negative impact on the facility and people, and preserve human life.
- To train others on what to expect during the police response to a Violent Intruder Event and what needs to be done to support the evacuation and life saving process.
- How to identify strategic areas and functions that must be established to provide ongoing support during the aftermath of a Violent Intruder Event.

This training is offered to law enforcement, school administration, security and/or selected employees, hospital administration, security and/or selected employees. After successful completion of the training, instructors will have the ability to train their primary organization for an annual material licensing fee of \$50.00 per year due by January 1st. Those persons wanting to train outside of their assigned organization or for profit, will need to contact Nate at [nate@schoolrisksolutions.org](mailto:nate@schoolrisksolutions.org) in order to learn about our independent contractor/business licensing options.
