FORENSIC PIECES OF CRIME SCENE RECONSTRUCTION

By

Jan Johnson, CSCSA

Retired Senior Crime Laboratory Analyst
Certified by State of Florida in Crime Scene
Analysis and Bloodstain Pattern Analysis

Certified

by the International Association for
Identification
in Crime Scene Analysis.

ABOUT YOUR INSTRUCTOR:

Jan Johnson is retired from the State of Florida with over forty years experience in law enforcement. After ten years with the F.B.I., Jan made the transition to crime scene analysis. She is recognized by the IAI as a Certified Senior Crime Scene Analyst and worked for FDLE in Pensacola, Florida for over twenty-two years. As a laboratory analyst and crime scene examiner, her field of experience includes detection, collection, and preservation of physical evidence, bloodstain pattern interpretation, trajectory analysis, buried body and skeletal remains recovery, clandestine laboratories, and numerous other procedures involving crime scene investigations. Due to her expertise in bloodstain pattern interpretation and crime scene reconstruction and analysis, Jan has testified in hundreds of criminal cases as an expert witness. Before retiring in 2004, Jan spent three years with the Escambia County Sheriff's Office as supervisor of the Crime Scene and Latent Print units, as well as overseer of ECSO's new crime lab, which she designed. Jan served in the highly distinguished role of President of the IAI in 2004, and Chairman of the Board in 2005, and considers herself honored to have been on the IAI's original Crime Scene Certification Board. Jan has served as President for the Florida Division of the IAI in 2007 as well as Chairman of the Board in 2008. She continues to serve on various committees within both the IAI and FDIAl. Jan has taught numerous courses in the areas of both Crime Scene and Bloodstain Pattern Interpretation and Crime Scene Reconstruction in the United States and abroad, including South Africa, Brazil, and Bermuda.

COURSE DESCRIPTION:

This comprehensive 40-hour course is designed for crime scene investigators, detectives, crime laboratory analysts and others in the field of forensic science that have the basic training and skills for crime scene examinations. This course will provide assistance in connecting all of the forensic pieces for the purpose of crime scene reconstruction. A crime scene is a huge puzzle, and piece by piece we compile the physical evidence in each case. The more difficult job is to try and connect those pieces to obtain the big picture, the scene reconstruction. This course will also assist in the documentation of physical evidence at the scene. Mock scenes for this course were designed to assist the student in the importance of scene documentation, and to obtain the maximum amount of accurate information for ultimate scene reconstruction. Some of the topics to be discussed include handling of major crime scenes, buried body and surface skeleton physical evidence recovery, bloodstain documentation and analysis, and shooting event analysis. These training hours can be applied toward the International Association for Identification Crime Scene Certification application.
