See Registration notes at bottom of page.

This course is designed to give Instructors the skills to build and present their material with memorable results. Everything matters! From the moment your participant arrives to the time they depart. Attendees will learn and then put into practical application the knowledge and skills to draw their participants totally into the delivery of their presentation. (3-days / 24-hours)

Topics: Based around the refinement of your PowerPoint presentation (*tips and tricks, splash page, video & sound*), Development of the Instructor Manual (*separate from your Lesson Plan*), and then combined with classroom Presentation Skill Building (*your classroom presence*).

This is a very hands-on, intensive and interactive course and students should be prepared to do some work as homework.

A laptop computer along with basic skills in MSWord and MS PowerPoint are a must!

This course is highly recommended for anyone that instructs in the classroom.

Participants remark that our courses are the
“best they’ve ever attended”, and are “well
prepared, presented, and structured.”
