Class Outline

The Avid system can either be a daunting experience or a vital tool in your forensic video workflow. Come learn from the experts and save yourself hours of time, frustration, and headaches. Your instructor, Dorothy Stout, is an Avid Certified Instructor and also actively performs casework for Law Enforcement agencies and District Attorney's offices.

The security industry is rapidly expanding. More camera installations mean more potential video evidence. Learning effective processing techniques and industry standard best practices are critical to your success. This class will feature the Avid system utilizing a variety of popular forensic filters.

Forensic Video Analysis with Avid - Level 1 provides the student with a comprehensive overview of the Avid interface and how to optimize that interface for forensic video examinations. Forensic topics include evidence handling procedures, note taking, evidence examination techniques, case deliverables, presentation techniques, and report writing. Basic forensic filters are explained and used extensively while students work on real video cases. Tips and tricks for working in Avid with video evidence will also be explored. Students will receive a manual with step-by-step instructions of all areas covered in the class.

In this course students will learn:

- Video evidence handling procedures
- Avid forensic interface configuration
- Overall forensic examination workflow and forensic filters
- Evidence preparation for print and presentation
- Forensic analysis and image processing practices

Here's what students are saying about Forensic Video Analysis with Avid - Level 1:

"As a complete beginner, I thought the class was very informative and offered a good basic foundation to get us started. The training manual was very helpful."

"With your class, I can better utilize the tools in the Avid system and feel confident in my abilities. You really taught us practical applications."
