Dynamic Cell Extraction

ARC Tactical Development's Dynamic Cell Extraction Course is designed for a wide range of applications. Anyone from the new line officer to the CERT veteran can attend and get something from this course.

Not every agency has the resources for a dedicated response team. If you want well rounded staff that can problem solve these types of situations or if you are an officer that has a desire to expand your skill set, then this course is for you!

Subjects covered:
- Cell entries
- Shield application
- Ground control
- After action protocols
- Documentation
- Use of force

$149.99 Per Student
