Recommended for 2016 Construction Loan Funding:

Point Roberts Water District No. 4

Water Main Replacement

County: Whatcom
 Legislative District: 42nd
 PWB Loan Request: \$4,732,125
 Other Funds: \$0
 Total Project Cost: \$4,732,125

The proposed project is for replacement of the system's most vulnerable asbestos concrete water main with ductile iron pipe, including the installation of hydrants to ensure adequate fire protection. The District's 2007 Water System Plan identified replacement of aging AC water mains as the highest priority. The aging main, installed in 1964, is further compromised by substandard bedding. Frequent failures cause damage to property, waste substantial amounts of water, increase the risk of contamination to the line, and pose a risk to public safety.

Previously Funded PWTF Projects	Amount	Year	PWTF Program	Status
2010 Water Main Replacement	\$ 426,731	2012	Construction	Complete
	\$ 426,731
