3. Landownership information: See instructions

   a. ☑No ☐Yes Are you a small forest landowner per RCW 76.09.450?  

   If yes, continue to b.

   b. ☑No ☐Yes Is your entire proposed harvest area on a single contiguous ownership consisting of one or more parcel?

4. If you are harvesting timber, enter the Forest Tax Reporting Account Number of the Timber Owner:  

   (TW) 800 082 158

   For tax reporting information or to receive a tax number, call the Department of Revenue at 1-800-548-8829.

5. Are you substituting prescriptions from an approved state or federal conservation agreement or watershed analysis?

   ☑No ☐Yes Write ‘HCP’ or ‘Using Prescriptions’ in tables that apply. Attach or reference prescriptions and/or crosswalks on file at the Region office.
5. What is the legal description of your forest practices?

<table>

7. When are you planning to begin work on the proposed activity? _Fall 2017 (Roads)_

8. Is the taxpayer eligible for the EARR Tax Credit?

☐ No  ☑ Yes

9. Have you reviewed this forest practices activity area to determine whether it may involve historic sites and/or Native American cultural resources? Read the instructions before answering this question.

☐ No  ☑ Yes

10. Do you have a DNR approved Road Maintenance and Abandonment Plan (RMAP)?

a. ☐ No  ☑ Yes  List the RMAP number: 240028
   If no, continue to b.

b. ☐ No  ☐ Yes  Is a Checklist RMAP required (see instructions)?

11. Are there potentially unstable slopes or landforms in the area of your forest practices activity?

☑ No  ☐ Yes – attach Slope Stability Informational Form. If applicable, attach geotechnical report, the SEPA Environmental Checklist, HCP, or Watershed Analysis prescriptions.

12. Are there potentially unstable slopes or landforms around the area of your forest practices activity?

☑ No  ☐ Yes – attach Slope Stability Informational Form. If applicable, attach geotechnical report, HCP, or Watershed Analysis prescriptions.

13. Is this forest practice application/notification (answer every question):

a. ☑ No  ☐ Yes  Within city limits or inside an urban growth area? If yes, see instructions for additional required documents.

b. ☑ No  ☐ Yes  For road work that is included in an approved Road Maintenance and Abandonment Plan (RMAP)?

c. ☑ No  ☐ Yes  Within a public park? If yes, include SEPA Environmental Checklist or SEPA Determination - except for harvest/salvage of less than 5,000 board feet within a developed public park.

d. ☑ No  ☐ Yes  Within 500 feet of a public park? Park name: ________________________________

e. ☑ No  ☐ Yes  In an approved Conversion Option Harvest Plan (COHP) from the local government? If yes, include a copy. This only applies to proposals within urban growth areas.

f. ☐ No  ☑ Yes  Within 200' of the Ordinary High Water Mark (OHWM) or floodway of Type S water? If yes, check with the county or city to determine whether a substantial development permit is required under the local shorelines master plan.

g. ☑ No  ☐ Yes  A request for a multi-year permit? If yes, length requested: ☐ 4 years or ☐ 5 years. Not everyone qualifies for a multi-year permit. See instructions for details.
h. ☒ No ☐ Yes An Alternate Plan? If yes, include a copy.

i. ☐ No ☒ Yes Within 50 miles of saltwater and do you own more than 500 acres of forest land in Washington State? If yes, include Marbled Murrelet Form or attach/reference HCP prescriptions.

j. ☐ No ☒ Yes In or directly adjacent to a potential Channel Migration Zone (CMZ)? If yes, include CMZ Assessment Form. Attach/reference applicable HCP and/or Watershed Analysis prescriptions.

***** If not working in or over typed waters, skip to Question 18 *****

You are required to verify Type Np and Ns water types within 200 feet of your proposed forest practices activities prior to submitting a Forest Practices Application / Notification. Use the Additional Information section, additional pages, the Water Type Classification Worksheet, and/or a Water Type Modification form to explain how you verified water types. See Water Typing Requirements in the instructions.

Prior to answering Questions 14-17 in this section please refer to the Forest Practices Application Instructions and Forest Practices Board Manual Section 5.

14. Are you proposing any of the following projects NOT permitted by current HPAs from WDFW?
   a. ☐ No ☒ Yes Installing, replacing, or repairing a culvert at or below the bankfull width of Type S or F water(s) that exceeds a five percent gradient?
   b. ☒ No ☐ Yes Constructing, replacing, or repairing a bridge at or below the bankfull width of unconfined streams in Type S or F water(s)?
   c. ☐ No ☒ Yes Placing fill material within the 100-year flood level of unconfined streams in Type S or F water(s)?

15. Have you consulted with DNR and/or WDFW about the proposed hydraulic project(s) in or over Type S or F water? ☒ No ☐ Yes

16. If installing, replacing, removing, or maintaining structures in or over any typed water, complete the table below. Type S and F waters require detailed plan information. Provide plan details in Question 31 or attach plan to the FPA/N. Provide crossing locations and identifiers on your Activity Map. A detailed plan with profiles may also be required for more complex hydraulic projects in Type N Waters per WAC 222-24-042(2).

<table>
<thead>
<tr>

</tbody>
</table>

22. Reforestation. Check the appropriate box(es).

- [x] Planting. Tree Species: Douglas, Noble, Native conifer
- [ ] Natural. Include a Natural Regeneration Plan
- [ ] Not required because of one or more of the following:
  - [ ] I am converting some or all of this land to non-forest land in the next 3 years or lands are exempted under WAC 222-34-050.
  - [ ] Individual dead, dying, down, or wind-thrown trees will be salvaged.
  - [ ] Trees are removed under a thinning program reasonably expected to maximize the long-term productivity of commercial timber.
  - [ ] I am leaving at least 100 vigorous, undamaged, and well-distributed saplings or merchantable trees per acre.
  - [ ] An average of 190 tree seedlings per acre are established on the harvest area and my harvest will not damage it.
  - [ ] Road right-of-way or rock pit development harvest only.

*** If you own MORE than 80 forested acres in Washington, skip to Question 27 ***

23. Are you using the exempt 20-acre parcel riparian management zone (RMZ) rule on type S, F, or Np waters?

- [ ] No  If no, continue to Question 27.
- [ ] Yes  If yes, continue to Question 24. See instructions for qualifications and information.

24. Choose the answer below that best fits your situation. Show all RMZs on the Activity Map.

- [ ] a. ALL of the following apply to me and my land: (If no, answer b.)
  - Between June 5, 2006 and today’s date I have always owned less than 80 acres of forestland in Washington.
  - Between June 5, 2006 and today’s date this parcel has always been 20 acres or less of contiguous ownership. See RCW 76.09.020 for definition of ‘contiguous’.
  - Between June 5, 2006 and today’s date this parcel has always been owned by me or someone else that has owned less than 80 acres of forestland in Washington.
b. ONE OR MORE of the following apply to me and/or my land (check all that apply):

☐ I currently own more than 80 acres of forestland in Washington.

☐ Between June 5, 2006 and today’s date I have owned more than 80 acres of forestland in Washington.

☐ Between June 5, 2006 and today’s date this parcel has been a part of more than 20 acres of contiguous ownership. See RCW 76.09.020 for definition of ‘contiguous’.

☐ Between June 5, 2006 and today’s date this parcel has been owned by someone that has owned more than 80 forested acres in Washington.

If any of the statements in (b) above apply AND you use the 20-acre exempt RMZ rule, you are NOT authorized under the State’s Incidental Take Permits (see explanation in FPA instructions under Questions 24).

25. If harvesting within 115 feet of a Type S or F water on an exempt 20-acre parcel, complete the table below. Show RMZs and stream segment identifiers on the Activity Map. If you are harvesting within 75 feet or within the maximum RMZ (whichever is less), stream shade must be assessed and met following harvest. Describe how stream shade was determined to be met, using the ‘Stream Shade Assessment Worksheet’ if necessary.

<table>
<thead>
<tr>

26. Are you harvesting within 29 feet of a Type Np water on a 20-acre exempt parcel?

☐ No Continue to Question 29.

☐ Yes See instructions and describe leave tree strategy in Question 31. Then continue to Question 29.

27. If harvesting within 200 feet of any of Type S or F water, complete the table below. Include DFC for all inner zone harvests unless you have an HCP prescription. Show RMZs, CMZs, and stream segment identifiers on the Activity Map. If you are harvesting within 75 feet or within the maximum RMZ (whichever is less), stream shade must be assessed and met following harvest. Describe how stream shade was determined to be met, using the ‘Stream Shade Assessment Worksheet’ if necessary.

</thead>
</table>

29. How are the following marked on the ground? *(Flagging, paint, road, fence, etc.)*

Harvest Boundaries: Orange Timber Harvest Boundary (T.H.B.) Ribbon, Roads or non-merch timber type

Clumped Wildlife Reserve Trees/Green Recruitment Trees: Orange Paint or Orange T.H.B

Right-of-way limits/road centerlines: Blue Ribbon and Paints / Pink with Blue & White Stripe Ribbon

Stream Crossing Work: Pink with Blue & White Stripe Ribbon

Riparian Management Zone Boundaries and Leave/Take Trees: Orange T.H.B & Paint on Leave Trees

Channel Migration Zone: Yellow / Lime Green Ribbon (where applicable) BFW

Wetland Management Zone Boundaries and Leave/Take Trees: Lime Green ribbon, same as Orange T.H.B.

30. Are you converting the land to non-forestry use within 3 years of harvest?

☒ No ☐ Yes If yes, include your SEPA Determination and/or SEPA checklist.

31. Additional Information (attach additional pages if necessary): For hydraulic projects in or over Type S, F, or complex N water(s) see instructions for required plan information.

Unit Number-Name: TW0486 "Rocky Toad"

Notice: Anyone with a legitimate, specific interest in reviewing this FPA must contact the Office or Forester for access. This extra control is for the safety and protection of everyone on private timberlands.

Cultural Resources: GLO survey records from late 1800's indicate... No known issues. No field evidence of cultural resources was observed within the proposed harvest unit boundaries. In the event of a significant inadvertent discovery, operations will be suspended while appropriate agencies are notified.

Owls & Marbled Murrelet: No known Owl or Murrelet issues.

Watershed Analysis Unit: YOUNGS CREEK

Streams & Wetlands: Youngs Creek and tributaries. End of fish habitat calls on tributary stream C, D, E based on physical gradients over 20% and bank full width at 3 feet or less.

Soils and Slope Stability: HARTNIT-POTCHUB-ROCK OUTCROP-COMPLEX, VOLC. ASH OVER BEDROCK. No evidence of landslides or unstable slopes.

Road Construction and Water Crossings: Short spurs and landings off existing road system. Ground based may utilize a temporary stream "B" crossing at the lower 23300 for access to the bottom of the unit. See attached for details.

Timber Harvest: Lead end suspension tower cable logging with a significant part of unit being cut with ground based feller buncher. Cable ground will also likely have a significant amount of shovel assisted swinging to tower cables.

Green-Up: Less than 120 contiguous acres surrounded by trees 4 feet or 5 years.
32. We acknowledge the following:

- The information on this application/notification is true.
- We understand this proposed forest practice is subject to:
  - The Forest Practices Act and Rules AND
  - All other federal, state or local regulations.
- Compliance with the Forest Practices Act and Rules does not ensure compliance with the Endangered Species Act or other federal, state or local laws.
- If we said that we would not convert the land to non-forestry use, the county or city may deny development permits on this parcel for the next 6 years.
- The following may result in an unauthorized incidental take of certain endangered or threatened fish species:
  - Conversion of land to non-forestry use.
  - Harvesting within the maximum RMZ on a 20-acre exempt parcel that was acquired after June 5, 2006.
  - Equipment Crossings/Fords in or over Type S and F Waters.
- Inadvertent Discovery – Chapters 27.44, 27.53, 68.50 and 68.60 RCW
  - If you find or suspect you have found an archaeological object or Native American cairn, grave, or glyptic record, immediately cease disturbance activity, protect the area and promptly contact the Department of Archaeology and Historic Preservation at 360 586-3077.
  - If you find or suspect you have found human skeletal remains, immediately cease disturbance activity, protect the area, and contact the County Coroner or Medical Examiner and local law enforcement as soon as possible. Failure to report human remains is a misdemeanor.

The landowner understands that by signing and submitting this FPA, he/she is authorizing the Department of Natural Resources to enter the property in order to review the proposal, inspect harvest operations, and monitor compliance for up to three years after its expiration date. RCW 76.08.150

4. Are there segments within or above the assessed portion of the stream where the average BFW is two feet or greater? AND the average stream gradient is less than or equal to 16%?
   [X] Yes. Type F water. Stop.
   [X] No. Continue.

5. Are there segments within or above the assessed portion of the stream where the average BFW is two feet or greater? AND the average stream gradient is between 16% and 20%? AND, the contributing basin to the stream is greater than 50 acres?
   [X] Yes. Type F water. Stop.
   [X] No. Continue.

6. Does the stream segment contain water at all times during a normal rainfall year?
   [X] Yes. Type Np water. Go to 9.
   [X] No. Continue.

7. Is the stream segment downstream of a perennial source of water?
   [X] Yes. Type Np water. Go to 9.
   [X] No. Continue.

8. Is the stream physically connected by an above-ground channel to Type S, F, or Np water?
   [X] Yes, Type Ns water. Stop.
   [X] No, non-typed water.
     [X] Yes, Type Ns water. Stop.
     [X] No, non-typed water.

9. Describe how you determined the uppermost point of perennial flow. Include a description of its location and show the point on a map (Use a separate piece of paper if necessary).

Stream/Segment ID B  Description:

Stream B has an old End of Fish Habitat placard dated 8/8/2006 just below the 23300 road crossing, but I could not locate any information in DNR or our records. Since it was done prior to removal of RMAP crossing, it must not have been approved due to low gradients upstream. I used physical break over 30% gradient near 2520' contour:

Washington Department of Natural Resources · Water Classification Worksheet · August 15, 2013
Appendix E. CMZ Assessment Form

Township: 27N  Range: 08E  Section: 26, 35

Complete and attach this informational form to your FPA if you answered "Yes" to FPA question 13 j. Refer to Forest Practices Board Manual Section 2—Standard Methods for Identifying Bankfull Channel Features and Channel Migration Zones for guidance on evaluating Channel Migration Zones (forms within BM 2 are optional).

Applicant Office Review:

1. Screening tools used: ☒ GIS ☒ Aerial Photo Years: 2015, 1990 ☒ LiDAR ☒ USGS Topographic Map ☒ Other (describe):
   Walk and observe channel characteristics on the ground.

2. Are you aware of channel movement or did you observe obvious channel movement between aerial photograph years?
   ☒ No, continue with to question 3  ☐ Yes, skip to question 5

3. Evaluate valley confinement using USGS topographic map(s) or aerial photographs.
   ☒ Valley floor is significantly wider than the channel. Channel migration may be occurring.
   ☐ Valley floor is very narrow, obviously less than twice as wide as the channel. If you can clearly see this circumstance on the aerial photographs, it is unlikely that channel migration is occurring.

4. Did you observe any of the following on the aerial photographs?
   ☒ Side Channels  ☐ Multiple Channels (Braiding)
   ☐ Large Gravel Bars  ☐ Wood Jams
   ☐ Eroding Banks  ☒ High Sinuosity or Sharp Channel Bends
   ☐ New Channels Occurring Between Photo Years (Avulsions)

Field Review:

5. Date of field review: 6/1/2015 & 9/26/2017

6. Person(s) that conducted field review:

<table>
<thead>
<tr>
<th>Name</th>
<th>Title/position</th>
</tr>
</thead>
<tbody>
<tr>
<td>Eric Sievers</td>
<td>Forest Tech. / Contractor</td>
</tr>
<tr>
<td>Grady Steere</td>
<td>Forester / Campbell Global</td>
</tr>
</tbody>
</table>

7. If CMZ is present check the component(s) present in your CMZ delineation.
   ☒ Avulsion hazard area  ☐ Erosion hazard area (attach erosion rate calculations)

8. What was the distance of channel walked? What was the length of CMZ boundary delineated?
   Stream A (Youngs Creek) walked 3250 feet. Length of CMZ approximately 1080 feet.
   Stream B walked 1665 feet. Length of CMZ is approximately 1490 feet.

9. Briefly describe how you determined a CMZ exists, how you delineated the outer edge of the CMZ, and how you marked the outer edge of the CMZ on the ground (flagging color, paint, etc.):
   Existing and historical side channels or topographical areas that could be reoccupied by modern flow conditions.
   CMZ is delineated with Lime Green/yellow ribbon at significant topographical breaks in slope.

6/1/2016

TW0486 "Rocky Toad"

Equipment Crossings on Type Np/Ns Streams

When utilizing stream crossings across Type Np or Ns waters with ground based logging equipment logs and/or slash will be placed in the stream channel to minimize disturbance to the stream bed and banks. Logs will be skidded across the stream at right angles to the channel, as much as is reasonably possible. Upon completion of yarding activity utilizing the crossing, logs and/or slash placed in the channel shall be removed. Slash will be placed on exposed soil within thirty (30) feet of the crossing.

Where the use of a culvert is warranted, the culvert will be placed in the stream channel at the proposed crossing location. The culvert will be armored with logs and/or slash to protect the integrity of the culvert and to provide protection to the stream bed and banks. Upon completion of yarding activity utilizing the crossing, the culvert, logs and/or slash placed in the channel shall be removed.

Straw and/or grass seeding may be used as mitigation if substantial disturbance is noted at the stream crossing location.

Suspending Cables over Type Np/Ns Streams

Where suspending cables over Type Np and Ns waters is required, care shall be taken when changing tailholds over buffered portions of these waters. The lines shall be moved over and around leave trees and vegetation prior to re-tightening and tailholds shall be of sufficient height to minimize damage to riparian vegetation.

Cable Yarding Across Type Np and Ns Streams

Where cable yarding is required across Type Np and Ns waters, timber will be felled and yarded away from the stream channel and the number of yarding roads will be minimized, as much as is reasonably possible. At a minimum, lead end suspension of the logs being yarded will be required.

Where downhill yarding is required, lead end suspension may not be feasible.
Temporary Crossings of Type F waters
Stream “B”

1. Work across or in Type F waters shall be restricted to installation of 60 inch culvert in stream “B” at existing pulled road crossing on 23300 road.
2. Stream crossing will be limited to the dry season between July 1 – September 30 unless modified by WADNR.
3. Stream was observed dry at crossing on 9/8/2017.
4. Logs and or slash will be placed in the channel and on side slopes, prior to crossing, in order to minimize disturbance to the channel.
5. Culvert will be strapped for future removal, placed on existing stream grade and backfilled 1.5 feet with clean round rock.
6. Clean round rock will be sourced from the 23580 road pit in Sec. 12 T26N R08E.
7. Existing stockpiles on each side of crossing may be used for subsequent backfill.
8. Reconstruct 23300 as needed and remove water bars from 21900 within unit to facilitate seasonal ground based logging.
9. No timber shall be yarded over Type S or F waters
10. Minimize damage to riparian vegetation.
11. Culvert and backfill will be removed from stream channel crossing location prior to September 30.
12. 23300 road and 21900 road will be “decommissioned” again by installing water bars as needed to divert water off onto forest floor.
13. Stream pull-back and channel widths after temporary culvert install will conform to existing pulled culvert conditions as specified in attached topography.
14. Stock piles may be moved further away or off of road surface prism.
15. If sedimentation of type S or F waters occurs as a result of equipment crossing activities, operation shall cease and the source of the sedimentation shall be controlled using established erosion control methods. These methods may include, but are not limited to the application of straw, logging slash or fiber mats to the exposed soil to prevent erosion from raindrop splash. Cover all exposed soils with non-invasive plant species as soon as possible (native plants are preferred). In some cases where soils have been severely disturbed additional sediment control methods such as silt fence, berms or straw bales may be required. Work may resume when the sedimentation source has been eliminated.
GENERAL CONDITIONS
1. IN-STREAM WORK WILL BE COMPLETED BETWEEN JULY 1 AND SEPTEMBER 30, UNLESS MODIFIED BY WDNR.
2. ALL NECESSARY MEASURES WILL BE TAKEN THROUGHOUT ALL PHASES OF THIS PROJECT TO MINIMIZE DELIVERY OF SILT TO THE STREAM OR ANY STATE WATERS.
3. ALL EXPOSED OR DISTURBED AREAS WITH THE POTENTIAL TO DELIVER SEDIMENT TO THE ALL STREAM OR ANY TYPED WATERS WILL BE PROTECTED FROM EROSION WITH GRASS SEED AND STRAW MULCH OR HYDROSEEDING IMMEDIATELY UPON COMPLETION OF THE PROJECT.
4. DISTURBANCE OF THE STREAMBED AND BANKS WILL BE LIMITED TO THAT NECESSARY TO REMOVE AND/OR REPLACE THE CULVERT AND ANY REQUIRED CHANNEL MODIFICATION AS SHOWN IN THE PLANS.
5. STREAMFLOW WILL BE ISOLATED FROM ACTIVE WORK AREA THROUGH RELOCATION INTO A BYPASS CULVERT OR PUMPING SIMILARLY TO AS SHOWN IN THE PLANS. NO BYPASS WILL BE NECESSARY IF CHANNEL IS DRY DURING OPERATIONS.
6. THE CONTRACTOR WILL CAPTURE AND SAFELY MOVE ALL FISH FROM THE JOB SITE. THE CONTRACTOR WILL HAVE FISH CAPTURE AND TRANSPORTATION EQUIPMENT READY AND ON THE JOB SITE. CAPTURED FISH WILL BE IMMEDIATELY AND SAFELY TRANSFERRED TO FREE-FLOWING WATER DOWNSTREAM OF THE PROJECT SITE.
7. PRIOR TO RELEASING THE WATER FLOW TO THE PROJECT AREA, ALL BANK PROTECTION OR CHANNEL MAPPING WILL BE COMPLETED.
8. UPON COMPLETION OF THE PROJECT, ALL MATERIAL USED IN THE TEMPORARY BYPASS WILL BE REMOVED FROM THE SITE AND THE SITE RETURNED TO PRE-PROJECT OR IMPROVED CONDITIONS.
9. SEDIMENT-LADEN WASTEWATER FROM DEWATERING OR PUMPING WILL BE ROUTED TO AN AREA OUTSIDE THE ORDINARY HIGH WATER LINE TO ALLOW REMOVAL OF FINE SEDIMENT AND CONTAMINANTS PRIOR TO BEING DISCHARGED TO THE STREAM.
10. EQUIPMENT USED FOR PUMPING/BYPASSING WATER WILL BE EQUIPPED WITH A FISH GUARD TO PREVENT PASSAGE OF FISH INTO THE DIVERSION DEVICE PURSUANT TO RCW 77.57.010 AND 77.57.070. THE PUMP INTAKE WILL BE SCREENED BY ONE OF THE FOLLOWING:
a. PERFORATED PLATE: 0.084 INCH (MAXIMUM OPENING DIAMETER).
b. PROFILE BAR: 0.069 INCH (MAXIMUM WIDTH OPENING).
c. WOVEN WIRE: 0.087 INCH (MAXIMUM OPENING IN THE NARROW DIRECTION).
THE MINIMUM OPEN AREA FOR THE FISH GUARD IS 27%. THE SCREENED INTAKE SHALL CONSIST OF A FACILITY WITH ENOUGH SURFACE AREA TO ENSURE THAT THE VELOCITY THROUGH THE SCREEN IS LESS THAN 0.4 FEET PER SECOND. SCREEN MAINTENANCE SHALL BE ADEQUATE TO PREVENT INJURY OR ENTRAPMENT OF JUVENILE FISH AND THE SCREEN SHALL REMAIN IN PLACE WHenever WATER IS WITHDRAWN FROM THE STREAM THROUGH THE PUMP INTAKE.

Marbled Murrelet Form
Western Washington Forest Practices Application/Notification

Complete this form only if you are harvesting timber (including salvage) or constructing roads. Do not complete this form if you have an HCP for marbled murrelets.

Answer every question.

1. ☒ No ☐ Yes For this FPA/N, has a protocol survey(s) been completed that includes:
   - Harvest units (and within 300 ft on your ownership), or
   - Salvage units (and within 300 ft on your ownership), or
   - Any area of proposed road construction (and within 300 ft on your ownership)?

   If 'Yes', fill out the table and check the appropriate findings below.

<table>
<thead>
<tr>
<th>Survey ID (Name or Unit #)</th>
<th>Township, Range, &amp; Section</th>
<th>Survey was approved by WDFW (Attach approval letter from WDFW)</th>
<th>Survey was disapproved by WDFW and is being resubmitted with this FPA/N (Explain below)</th>
<th>Survey has been submitted to WDFW and survey approval is unknown (Explain below)</th>
<th>Survey is complete but has not yet been submitted to WDFW (Submit survey with FPA/N)</th>

Explanation:

2. ☒ No ☐ Yes ☐ Unknown Will you harvest, salvage, or construct roads within 0.25 miles of an occupied site?

3. ☒ No ☐ Yes ☐ Unknown Will you fly helicopter(s) over or within 0.25 miles of an occupied site?

4. ☒ No ☐ Yes Will you harvest live trees in a buffer of an occupied site?

   If Yes, describe the leave trees and buffer widths you will leave. NOTE: If you leave less than required in WAC 222-16-080(1) (j) (v) this is a Class IV-Special and an Environmental Checklist is required

Description of managed buffers:

Form QQ46 (05-14-05) 1 of 2
5. **X** No  ☐ Yes  
Are there nesting platforms within any harvest unit (including salvage and road construction) that are within 300 feet that:

- Are not located within a surveyed area, **and**;
- Have a minimum of 2 platforms per acre, **and**;
- Are located within 7 or more acres of contiguous habitat, **and**;
- Have a least 40% (number not volume) of the dominant and co-dominant trees made up of Douglas-fir, western hemlock, western red cedar, or Sitka spruce?

*If "Yes", complete the table below for those areas.*

<table>
<thead>
<tr>
<th>Name or # (as shown on map) of delineated stands of contiguous habitat</th>
<th>Delineated stand acres</th>
<th>Nesting platforms per acre</th>
<th>Number of trees 32 inches dbh or greater with platforms</th>
<th>Platform Assessment Method</th>

Issued in person:  [ ] Landowner  [ ] Timber Owner  [ ] Operator  By:
Appeal Information

You have thirty (30) days to appeal this Decision and any related State Environmental Policy Act determinations to the Pollution Control Hearings Board in writing at the following addresses:

Physical address: 1111 Israel Rd. SW, Ste 301, Tumwater, WA 98501
Mailing address: P.O. BOX 40903, OLYMPIA, WA 98504-0903

Information regarding the Pollution Control Hearings Board can be found at: http://www.eluho.wa.gov/

At the same time you file an appeal with the Pollution Control Hearings Board, also send a copy of the appeal to the Department of Natural Resources’ region office and the Office of the Attorney General at the following addresses:

Office of the Attorney General
Natural Resources Division
1125 Washington Street SE
PO Box 40100
Olympia, WA 98504-0100

And

Department Of Natural Resources
Northwest Region
919 N Township St
Sedro-Woolley WA 98284

Other Applicable Laws

Operating as described in this application/notification does not ensure compliance with the Endangered Species Act, or other federal, state, or local laws.

Transfer of Forest Practices Application/Notification (WAC 222-20-010)

Use the “Notice of Transfer of Approved Forest Practices Application/Notification” form. This form is available at region offices and on the Forest Practices website: http://www.dnr.wa.gov/businesspermits/forestpractices.

Notify DNR of new Operators within 48 hours.

Continuing Forest Land Obligations (RCW 76.09.060, RCW 76.09.070, RCW 76.09.390, and WAC 222-20-055)

Obligations include reforestation, road maintenance and abandonment plans, conversions of forest land to non-forestry use and/or harvest strategies on perennial non-fish habitat (Type Np) waters in Eastern Washington.

Before the sale or transfer of land or perpetual timber rights subject to continuing forest land obligations, the seller must notify the buyer of such an obligation on a form titled “Notice of Continuing Forest Land Obligation”. The seller and buyer must both sign the “Notice of Continuing Forest Land Obligation” form and send it to the DNR Region Office for retention. This form is available at DNR region offices.

If the seller fails to notify the buyer about the continuing forest land obligation, the seller must pay the buyer’s costs related to continuing forest land obligations, including all legal costs and reasonable attorneys’ fees incurred by the buyer in enforcing the continuing forest land obligation against the seller.

Failure by the seller to send the required notice to the DNR at the time of sale will be prima facie evidence in an action by the buyer against the seller for costs related to the continuing forest land obligation prior to sale.

DNR affidavit of mailing:

On this day 12/8/2017, I placed in the United States mail at Sedro-Woolley, WA, (date) (post office location)

postage paid, a true and accurate copy of this document. Notice of Decision FPA # 2816113

L Utgard (Printed name) ____________________________ (Signature)
