5. Does this plan propose to remove hardwood trees within a riparian area in order to plant conifers?

No [ ] Yes [x] If yes, describe the species to be planted. Include a schedule of brush control activities to ensure the planted trees will be vigorous and free to grow after three growing seasons.

Western Red Cedar in the wet areas and Douglas Fir in the dryer areas. I will plant 350 TPA by spring 2020.

6. List the specific parts of the Forest Practices Board Rules that the proposal departs from:
See Washington Forest Practices Board Rules at;

7. Attach map(s) (preferably 1" = 400' scale) with updated stream locations, wetlands, unstable slopes and roads. Clearly designate proposed alternate plan area. The alternate plan area must also be shown on the forest practices activity map.

8. Attach information, such as a timber cruise, water type modification forms, technical field notes, literature references, etc., that support the alternate plan.

9. Small Forest Landowner Office Monitoring
The Small Forest Landowner Office (SFLO) is required to monitor small forest landowner alternate plans for cumulative effects.

   a) Does this alternate plan contain a monitoring strategy

   Yes [x] No [ ] If yes, please attach.

   b) May SFLO staff access the alternate plan site to conduct monitoring?

   Yes [x] No [ ]
2. **Proposed Management Activities**: Describe what activities will be conducted (example; harvest, tree planting, road construction, etc). Describe where, how, and when each activity will be conducted. 

*NOTE: A representative sample of the proposed alternate plan area must be flagged on the ground for interdisciplinary team review.*

Propose 30' RMXZ buffer. Remove all hardwood outside the 30' RMZ leaving all conifers from 30' RMZ to 85' buffer.

---

3. **Describe how your proposed management activity would affect the alternate plan area**

For activities in a riparian area:

a) Describe the current level of large woody debris, shade, bank stability, sediment filtering and nutrient input.

b) Explain the short and long term changes in the amount of large woody debris, shade, bank stability, sediment filtering and nutrient input from the current level. Be as specific as possible. See Board Manual Section 21

Reforest with mostly conifer with Cedar in the wet areas and Doug Fir in the dryer areas with a 30' buffer that would not significantly reduce the shade for the Type "F" water.

**Other Applicable Laws**

Operating as described in this application/notification does not ensure compliance with the Endangered Species Act, or other federal, state, or local laws.

**Transfer of Forest Practices Application/Notification (WAC 222-20-010)**

**Continuing Forest Land Obligations (RCW 76.09.060, RCW 76.09.070, RCW 76.09.390, and WAC 222-20-055)**

Obligations include reforestation, road maintenance and abandonment plans, conversions of forest land to non-forestry use and/or harvest strategies on perennial non-fish habitat (Type Np) waters in Eastern Washington.

Before the sale or transfer of land or perpetual timber rights subject to continuing forest land obligations, the seller must notify the buyer of such an obligation on a form titled "Notice of Continuing Forest Land Obligation". The seller and buyer must both sign the "Notice of Continuing Forest Land Obligation" form and send it to the DNR Region Office for retention. This form is available at DNR region offices.

If the seller fails to notify the buyer about the continuing forest land obligation, the seller must pay the buyer’s costs related to continuing forest land obligations, including all legal costs and reasonable attorneys’ fees incurred by the buyer in enforcing the continuing forest land obligation against the seller.

Failure by the seller to send the required notice to the DNR at the time of sale will be prima facie evidence in an action by the buyer against the seller for costs related to the continuing forest land obligation prior to sale.
