- If we said that we would not convert the land to non-forestry use, the county or city may deny development permits on this parcel for the next 6 years.
- The following may result in an unauthorized incidental take of certain endangered or threatened fish species:
  - Conversion of land to non-forestry use.
  - Harvesting within the maximum RMZ on a 20-acre exempt parcel that was acquired after June 5, 2006.
  - Equipment Crossings/Fords in or over Type S and F Waters.

Appendix D. Slope Stability Informational Form

Complete and attach this form to your FPA/N if you answered ‘Yes’ to FPA Question 10. Refer to WAC 222-16-050(1) (d) and Forest Practices Board Manual Section 16—Guidelines for Evaluating Potentially Unstable Slopes for definitions and descriptions of potentially unstable slopes or landforms. Instructions for Appendix D. is located in the Forest Practices Application/Notification Instruction document.

1. a. What preliminary screening tools were used to identify unstable slopes or landform features in and/or around your proposal?
   - X Aerial Photo, X LiDAR, X Landslide Inventory, □ Landslide Hazard Zones, □ GIS,
   □ Other, describe:

   b. Did any of the features identified during the preliminary screening (1.a.) not exist when you performed a field review? If yes, describe:
   Potential deep-seated landslide was detected on hillshade (associated with 9210 road switchbacks). Features are subtle on hillshade and locally indistinct in the field. There are no indicators of recent or historic movement. Feature supports old growth stumps with no apparent deformation. See 2a below.

2. a. Are you conducting forest practices activities in or over potentially unstable slopes or landforms? Check all that apply:
   - X Inner Gorge □ Groundwater recharge areas for glacial deep-seated landslides
   - X Bedrock Hollow □ Convergent Headwall □ Toe of deep-seated landslide
   □ Outer edges of meander bends
   □ Other (Deep-seated landslides or other features of potentially unstable slopes). Describe:
   Feature noted in 1b: No RIL as landslide activity level is considered relict. Toe is mostly <65% gradient with gentle open slopes below with no streams and therefore no sediment delivery potential. Inner gorge and hollow landforms are excluded from unit where sediment delivery potential is possible.

   b. What activities may occur in or over potentially unstable slopes or landforms? Check all that apply:
   - X Timber harvest □ Road construction □ Suspending cables □ Yarding □ Tailholds

3. a. Are you conducting forest practices activities around potentially unstable slopes or landforms? Check all that apply:
   - X Inner Gorge □ Groundwater recharge areas for glacial deep-seated landslides
   - X Bedrock Hollow □ Convergent Headwall □ Toe of deep-seated landslide
   □ Outer edges of meander bends
   □ Other (Deep-seated landslides or other features of potentially unstable slopes). Describe:

   b. What activities may occur around potentially unstable slopes or landforms? Check all that apply:
   - X Timber harvest □ Road construction □ Suspending cables □ Yarding □ Tailholds
4. a. Were any features identified in question 3.a. excluded from your forest practices activity?
   ☐ No, skip to question 5. ☑ Yes, continue to question 4.b.

b. Describe the field indicators you used to exclude potentially unstable slopes or landforms from your forest practices activity (i.e.: flagging was placed a crown width away from the break in slope of the inner gorge.):

   Flagging was generally placed at the 70% break in slope where inner gorge features or bedrock hollows were identified.

5. Are there areas of public use (which may include, but are not limited to: public roads, utilities, designated recreation areas, occupied structures, etc.) located in or around the area of your proposed forest practices activity?
   ☑ No ☐ Yes, show these locations on the map in question 7.

6. Date(s) of field review(s): Summer 2018, July 2019

Continuing Forest Land Obligations (RCW 76.09.060, RCW 76.09.070, RW 76.09.390, and WAC 222-20-055)

Obligations include reforestation, road maintenance and abandonment plans, conversions of forest land to non-forestry use and/or harvest strategies on perennial non-fish habitat (Type Np) waters in Eastern Washington.

Before the sale or transfer of land or perpetual timber rights subject to continuing forest land obligations, the seller must notify the buyer of such an obligation on a form titled “Notice of Continuing Forest Land Obligation”. The seller and buyer must both sign the “Notice of Continuing Forest Land Obligation” form and send it to the DNR Region Office for retention. This form is available at DNR region offices.

If the seller fails to notify the buyer about the continuing forest land obligation, the seller must pay the buyer’s costs related to continuing forest land obligations, including all legal costs and reasonable attorneys’ fees incurred by the buyer in enforcing the continuing forest land obligation against the seller.

Failure by the seller to send the required notice to the DNR at the time of sale will be prima facie evidence in an action by the buyer against the seller for costs related to the continuing forest land obligation prior to sale.
