☐ Not required because of one or more of the following:

☐ I am converting some or all of this land to non-forest land in the next 3 years or lands are exempt under WAC 222-34-050.

☐ Individual dead, dying, down, or wind-thrown trees will be salvaged.

☐ Trees are removed under a thinning program reasonably expected to maximize the long-term productivity of commercial timber.

☐ I am leaving at least 100 vigorous, undamaged, and well-distributed saplings or merchantable trees per acre.

☐ An average of 190 tree seedlings per acre are established on the harvest area and my harvest will not damage them.

☐ Road right-of-way or rock pit development harvest only.

** *Do you own MORE than 80 acres of forest land in Washington? If yes, skip to Question 25* **

21. Are you using the exempt 20-acre parcel riparian management zone (RMZ) rule (WAC 222-30-023) on Type S, F, or Np Waters?

☐ No  Skip to Question 25.

☐ Yes  Continue to Question 22. See instructions for qualifications and information.

22. Choose the answer below that best fits your situation. Show all RMZs on the Activity Map.

• Between June 5, 2006 and today’s date this parcel has always been owned by me or someone else that has owned less than 80 acres of forest land in Washington.

☐ b. ONE OR MORE of the following apply to me and/or my land (check all that apply):

If any of the statements below apply AND you use the exempt 20-acre parcel RMZ rule, you are NOT authorized under the State’s Incidental Take Permits (see explanation in FPA instructions under Question 22).

☐ Between June 5, 2006 and today’s date I have owned more than 80 acres of forest land in Washington.

☐ Between June 5, 2006 and today’s date this parcel has been a part of more than 20 acres of contiguous ownership. See RCW 76.09.020 for definition of ‘contiguous’.

January 2020 – Western Washington FPA/N
27. How are the following currently marked on the ground? *(Flagging color, paint color, road, fence, etc.)*

- Harvest/Salvage Boundaries: Not Applicable
- Clumped Wildlife Reserve Trees/Green Recruitment Trees: Not Applicable
- Right-of-Way Limits/Road Centerlines: Existing Road Grade
- Stream Crossing Work: Where existing road intersects with stream
- Riparian Management Zone Boundaries and Leave/Take Trees: Not Applicable
- Channel Migration Zone: Not Applicable
- Wetland Management Zone Boundaries and Leave/Take Trees: Not Applicable

28. Additional Information (attach additional pages if necessary): For hydraulic projects in or over Type S, F, or complex N Water(s) see instructions for required plan information. If applicable, include mitigation measures from a geotechnical memo, letter, or report.

Road abandonment will include:

- Removing any cross-drain culverts and replacing them with water bars
- Remove culvert crossing A
- Slope Channel banks back 2H:1V (pull back will be approximately 30' on the south side of the crossing and 35' on the north side of the crossing)
- Build a high berm on the north side of the crossing to keep high water from flowing down the abandoned road (minimum 3' tall)
- Block road at the junction with the mainline
- Put a cross-drain culvert across the mainline at the junction of the WF spur

Ford Specifications:

- Armor outlet of ford with rip rap rock
- Harden ford with 4"+rock
- Outslope ford 4% for proper drainage

No merchantable timber is accessible from crossing B for nearly 40 years. Until that time this crossing will be used for silviculture and fire protection. Use will be limited to pickups and fire equipment. Crossing will not be used during storm events where crossing could contribute sediment to the stream.
29. We acknowledge the following:
   - The information on this application/notification is true.
   - We understand this proposed forest practice is subject to:
     - The Forest Practices Act and Rules AND
     - All other federal, state or local regulations.
   - Compliance with the Forest Practices Act and Rules does not ensure compliance with the Endangered Species Act or other federal, state or local laws.
   - If we said that we would not convert any portion of the land to non-forestry use, the county or city may deny development permits on this parcel for the next 6 years.
   - The following may result in an unauthorized incidental take of certain endangered or threatened fish species:
     - Conversion of land to non-forestry use.
     - Harvesting within the maximum RMZ on a 20-acre exempt parcel that was acquired after June 5, 2006.
     - Equipment Crossings/Fords in or over Type S and F Waters.
   - Inadvertent Discovery – Chapters 27.44, 27.53, 68.50 and 68.60 RCW
     - If you find or suspect you have found an archaeological object or Native American cairn, grave, or glyptic record, immediately cease disturbance activity, protect the area and promptly contact the Department of Archaeology and Historic Preservation at 360 586-3077.
     - If you find or suspect you have found human skeletal remains, immediately cease disturbance activity, protect the area, and contact the County Coroner or Medical Examiner and local law enforcement as soon as possible. Failure to report human remains is a misdemeanor.

The landowner understands that by signing and submitting this FPA, he/she is authorizing the Department of Natural Resources to enter the property in order to review the proposal, inspect harvest operations, and monitor compliance for up to three years after its expiration date. RCW 76.09.150

Compute Water Level using Manning's Equation

\[ V = \frac{1.486}{n} \cdot R^{0.67} \cdot S^{0.5} \]

Location: Proctor Crossing B

Date: 2/7/2020

By: Wes Worden

Procedure:
1) Measure and plot cross-section shape to scale, measure stream slope, observe Manning's "n", compute 100-year flow
2) Assume a Trial Water Surface Elevation. Plotted on the cross-section, this yields a water End Area and Wetted Perimeter
3) Compute Hydraulic Radius and then Velocity for that trial water level
4) Check whether the Velocity with that Water End Area closely equals the 100-year flow
5) If not close enough to equal, adjust to a new assumed water level elevation and recompute
6) Repeat Steps 2 through 5 until computed Q is close enough to the pre-computed 100-year flow. That is the 100-year flood elevation at the cross-section.

Marbled Murrelet Form
Western Washington Forest Practices Application/Notification

Complete this form only if you are harvesting timber (including salvage) or constructing roads. Do not complete this form if you have an HCP for marbled murrelets.

Answer every question.

1. □ No  □ Yes For this FPA/N, has a protocol survey(s) been completed that includes:
   • Harvest units (and within 300 ft on your ownership), or
   • Salvage units (and within 300 ft on your ownership), or
   • Any area of proposed road construction (and within 300 ft on your ownership)?
   If 'Yes', fill out the table and check the appropriate findings below.

Explanation:

2. □ No  □ Yes  □ Unknown Will you harvest, salvage, or construct roads within 0.25 miles of an occupied site?

3. □ No  □ Yes  □ Unknown Will you fly helicopter(s) over or within 0.25 miles of an occupied site?

4. □ No  □ Yes Will you harvest live trees in a buffer of an occupied site?

   If Yes, describe the live trees and buffer widths you will leave. NOTE: if you leave less than required in WAC 222-16-080(1) (j) (v) this is a Class IV-Special and an Environmental Checklist is required

Description of managed buffers:
5.  X No  □ Yes  Are there nesting platforms within any harvest unit (including salvage and road construction) that are within 300 feet that:
   • Are not located within a surveyed area, and;
   • Have a minimum of 2 platforms per acre, and;
   • Are located within 7 or more acres of contiguous habitat, and;
   • Have a least 40% (number not volume) of the dominant and co-dominant trees made up of Douglas-fir, western hemlock, western red cedar, or Sitka spruce?

   If "Yes", complete the table below for those areas.

<thead>
<tr>
<th>Name or # (as shown on map) of delineated stands of contiguous habitat</th>
<th>Delineated stand acres</th>

   • Are not surveyed, and;
   • Are not listed in question 5, and;
   • Have trees that are at least 32 inches dbh

   If "Yes", list the forest practice unit numbers from your activity map. Provide brief description of current stand conditions. Such as tree species composition, stand age (if known), and maximum tree size (dbh).

**Continuing Forest Land Obligations (RCW 76.09.060, RCW 76.09.070, RCW 76.09.390, and WAC 222-20-055)**

Obligations include reforestation, road maintenance and abandonment plans, conversions of forest land to non-forestry use and/or harvest strategies on perennial non-fish habitat (Type Np) waters in Eastern Washington.

Before the sale or transfer of land or perpetual timber rights subject to continuing forest land obligations, the seller must notify the buyer of such an obligation on a form titled "Notice of Continuing Forest Land Obligation". The seller and buyer must both sign the "Notice of Continuing Forest Land Obligation" form and send it to the DNR Region Office for retention. This form is available at DNR region offices.

If the seller fails to notify the buyer about the continuing forest land obligation, the seller must pay the buyer's costs related to continuing forest land obligations, including all legal costs and reasonable attorneys' fees incurred by the buyer in enforcing the continuing forest land obligation against the seller.

Failure by the seller to send the required notice to the DNR at the time of sale will be prima facie evidence in an action by the buyer against the seller for costs related to the continuing forest land obligation prior to sale.
