Western Washington Forest Practices Application/Notification

Complete this form only if you are harvesting timber (including salvage) or constructing roads.  Do not complete this form if you have an HCP for marbled murrelets.

Answer every question.

1. ☐ No ☐ Yes  For this FPA/N, has a protocol survey(s) been completed that includes:
   - Harvest units (and within 300 ft on your ownership), or
   - Salvage units (and within 300 ft on your ownership), or
   - Any area of proposed road construction (and within 300 ft on your ownership)?

   If 'Yes', fill out the table and check the appropriate findings below.

3. ☐ No ☐ Yes ☐ Unknown  Will you fly helicopter(s) over or within 0.25 miles of an occupied site?

4. ☐ No ☐ Yes  Will you harvest live trees in a buffer of an occupied site?

If Yes, describe the leave trees and buffer widths you will leave.  
NOTE: If you leave less than required in WAC 222-16-080(1) (f) (v) this is a Class IV-Special and an Environmental Checklist is required

Equipment Crossings on Type Np/Ns Streams

When installing culverts for haul road construction in flowing Np or Ns streams, water will be diverted or pumped around crossing location prior to working or placing culvert in wetted channel.

When utilizing stream crossings across Type Np or Ns waters with ground based logging equipment logs and/or slash will be placed in the stream channel to minimize disturbance to the stream bed and banks. Logs will be skidded across the stream at right angles to the channel, as much as is reasonably possible. Upon completion of yarding activity utilizing the crossing, logs and/or slash placed in the channel shall be removed. Slash will be placed on exposed soil within thirty (30) feet of the crossing.

Where the use of a culvert is warranted, the culvert will be placed in the stream channel at the proposed crossing location. The culvert will be armored with logs and/or slash to protect the integrity of the culvert and to provide protection to the stream bed and banks. Upon completion of yarding activity utilizing the crossing, the culvert, logs and/or slash placed in the channel shall be removed.

Straw and/or grass seeding may be used as mitigation if substantial disturbance is noted at the stream crossing location.

Use the “Notice of Transfer of Approved Forest Practices Application/Notification” form. This form is available at region offices and on the Forest Practices website: [http://www.dnr.wa.gov/businesspermits/forestpractices](http://www.dnr.wa.gov/businesspermits/forestpractices). **Continuing Forestland Obligations (RCW 76.09.060, RCW 76.09.070, RCW 76.09.390, and WAC 222-20-055)**
Obligations include reforestation, road maintenance and abandonment plans, conversions of forestland to non-forestry use and/or harvest strategies on perennial non-fish habitat (Type Np) waters in Eastern Washington.

Before the sale or transfer of land or perpetual timber rights subject to continuing forest and obligations, the seller must notify the buyer of such an obligation on a form titled “Notice of Continuing Forest Land Obligation”. The seller and buyer must both sign the “Notice of Continuing Forest Land Obligation” form and send it to the DNR Region Office for retention. This form is available at DNR region offices.

If the seller fails to notify the buyer about the continuing forestland obligation, the seller must pay the buyer’s costs related to continuing forestland obligations, including all legal costs and reasonable attorneys’ fees incurred by the buyer in enforcing the continuing forestland obligation against the seller.

Failure by the seller to send the required notice to DNR at the time of sale will be prima facie evidence in an action by the buyer against the seller for costs related to the continuing forestland obligation prior to sale.
