**ALTERNATIVE PRESCRIPTIONS**

- Alternate Plan
- Ten-Year Forest Management Plan
- Columbia River Gorge National Scenic Area
- Watershed Analysis:

**RESOURCES REVIEW**

- Unstable Slopes (Risk: Highway, Water:)
- Soils Map (Highly Erodable & Very Unstable)
- Landslide Hazard Zonation
- Landslide Inventory Polygon
- Rain-on-Snow and Outside Approved WA
- Hydric Soils
- Wetland [ ] Forested, [ ] A, [ ] B
- In WMZ of [ ] A, or [ ] B Wetland
- In RIMZ/ELZ of Type [ ] S, [ ] T, [ ] F, [ ] N water
- Water Verification

**ASSOCIATED NON-SCANNED DOCUMENTS**

- SEPA Checklist/Documents
- Large Landowner Road Maintenance and Abandonment Plan

**ASSOCIATED SCANNED DOCUMENTS**

- Conversion Option Harvest Plan
- FP/HP Plans & Specifications
- Qualified Expert Report; Type:
- Natural Regeneration Plan
- Shoreline Permit
- Marbled Murrelet Form
- FPBM Appendix(s)
- Small Landowner RMAP Checklist
- CMZ Assessment Form

**EARR Tax Credit**

**ADDITIONAL COMMENTS**

Form completed by October, 2015 Version
Forest Practices Application/Notification
Western Washington

PLEASE USE THE INSTRUCTIONS TO COMPLETE THIS APPLICATION.

1. Landowner, Timber Owner and Operator

3. Are you converting the land to non-forestry use within 3 years of harvest?

[ ] No  [ ] Yes  If yes, include your SEPA checklist and SEPA determination (if applicable) and county clearing and grading permit (if applicable).

4. a. If you are harvesting timber, enter the Forest Tax Number of the Timber Owner:

800 059 489

Contact the Department of Revenue at 1-800-548-8829 for tax reporting information or to obtain a number.

b. Are you eligible for EARR Tax Credit?  [ ] No  [ ] Yes

5. Are you a small forest landowner per RCW 76.09.450? See instructions

[ ] No  [ ] Yes  If yes, Check all that apply. If no, skip to Question 6.

[ ] My entire proposed harvest area is on a single contiguous ownership consisting of one or more parcels.
☐ My proposed forest practices activities are within an area covered by an approved Forest Stewardship Plan or Forest Management Plan developed in cooperation with DNR.

☐ I received technical assistance from a DNR small forest landowner Stewardship and Technical Assistance Forester in preparing this FPA/N.

☐ I have participated in a Washington State University Extension Service and/or DNR-sponsored Forest Stewardship Coached Planning course.

☐ I have attended a Washington State University Extension Service and/or DNR-sponsored Family Forest Owner Field Day.

6. Are you substituting prescriptions from an approved state or federal conservation agreement or Watershed Analysis?
   ☑ No  ☐ Yes  Write ‘HCP’ or ‘Using Prescriptions’ in tables that apply. Attach or reference prescriptions and/or crosswalks for approved state or federal conservation agreements or Watershed Analysis on file at the Region office.

7. What is the legal description of your forest practices?

<table>
<thead>
<tr>

8. Have you reviewed this forest practices activity area to determine whether it may involve historic sites and/or Native American cultural resources? Read the instructions before answering this question.
   ☐ No  ☑ Yes  If you made any contacts, please provide information in Question 28.

9. Do you have a DNR approved Road Maintenance and Abandonment Plan (RMAP)?
   a. ☑ No  ☐ Yes  If no, skip to c.,
      If yes, enter your RMAP number: R2800056L, continue to b.
   b. ☑ No  ☐ Yes  Is this Forest Practices Application/Notification for work that is included in this approved RMAP?
   c. ☑ No  ☐ Yes  Is a Checklist RMAP required (see instructions)?

10. Are there potentially unstable slopes or landforms in or around the area of your forest practices activity?
    ☑ No  ☐ Yes  If yes, attach Appendix D. Slope Stability Informational Form and map of areas reviewed for and locations of unstable slopes and landforms found. If applicable, attach a geotechnical letter, memo, or report, Watershed Analysis prescriptions, and/or a SEPA Environmental Checklist.

11. Is this Forest Practices Application/Notification (answer every question):
    a. ☑ No  ☐ Yes  A request for a multi-year permit? If yes, length requested: ☐ 4 years or ☐ 5 years.
       Not everyone qualifies for a multi-year permit. See instructions for details.
    b. ☐ No  ☑ Yes  An Alternate Plan? If yes, include a template or detailed plan. See instructions for details.
c. ☒No ☐Yes For a funded Forest Family Fish Passage Program project?

d. ☒No ☐Yes Within an urban growth area? If yes, see instructions for additional required documents.

e. ☒No ☐Yes Within a public park? If yes, include SEPA Environmental Checklist or SEPA Determination, except for harvest/salvage of less than 5,000 board feet within a developed public park. Park name: ________________________________

f. ☒No ☐Yes Within 500 feet of a public park? Park name: ________________________________

g. ☒No ☐Yes In an approved Conversion Option Harvest Plan (COHP) from the local government? If yes, include a copy. This only applies to proposals within urban growth areas.

h. ☒No ☐Yes Within 200 feet of the Ordinary High Water Mark (OHWM) or floodway of Type S Water? If yes, check with the county or city to determine whether a substantial development permit is required under the local shorelines master plan.

i. ☐No ☒Yes Within 50 miles of saltwater AND you own more than 500 acres of forest land in Washington State? If yes, include Marbled Murrelet Form or attach/reference HCP prescriptions.

j. ☒No ☐Yes In or directly adjacent to a potential Channel Migration Zone (CMZ)? If yes, include CMZ Assessment Form. Attach/reference applicable HCP and/or Watershed Analysis prescriptions.

You are required to verify all waters within 200 feet of your proposed forest practices activities prior to submitting a Forest Practices Application / Notification. Use the Water Type Classification Worksheet and/or a Water Type Modification form to explain how you verified water types. See Water Typing Requirements in the instructions.

* * * * * If not working in or over typed Waters, skip to Question 16 * * * * *

Prior to answering Questions 12-15 in this section please refer to the Forest Practices Application Instructions and Forest Practices Board Manual Section 5.

12. Are you proposing any of the following projects NOT permitted by current HPAs from WDFW?

a. ☒No ☐Yes Installing, replacing, or repairing a culvert at or below the bankfull width of Type S or F Water(s) that exceeds a five percent gradient?

b. ☒No ☐Yes Constructing, replacing, or repairing a bridge at or below the bankfull width of unconfined streams in Type S or F Water(s)?

c. ☒No ☐Yes Placing fill material within the 100-year flood level of unconfined streams in Type S or F Water(s)?

13. Have you consulted with DNR and/or WDFW about the proposed hydraulic project(s) in or over Type S or F Water? ☒No ☐Yes

14. If installing, replacing, removing, or maintaining structures in or over any typed Water, complete the table below. Provide crossing locations and identifiers on your Activity Map. Provide plan details in Question 28 or attach plan to the FPA/N. Type S and F Waters require detailed plan information. Complex hydraulic projects in Type N Waters may also be required per WAC 222-24-042(2). See instructions for detailed plan requirements.
<table>
<thead>
<tr>

20. Reforestation. Check all that apply:

☐ Planting. Tree Species: ________________________

☐ Natural. Include a Natural Regeneration Plan

☒ Not required because of one or more of the following:

☐ I am converting some or all of this land to non-forest land in the next 3 years or lands are exempted under WAC 222-34-050.

☐ Individual dead, dying, down, or wind-thrown trees will be salvaged.

☒ Trees are removed under a thinning program reasonably expected to maximize the long-term productivity of commercial timber.

☒ I am leaving at least 100 vigorous, undamaged, and well-distributed saplings or merchantable trees per acre.

☐ An average of 190 tree seedlings per acre are established on the harvest area and my harvest will not damage them.

☐ Road right-of-way or rock pit development harvest only.

** Do you own MORE than 80 acres of forest land in Washington? If yes, skip to Question 25 **

21. Are you using the exempt 20-acre parcel riparian management zone (RMZ) rule (WAC 222-30-023) on Type S, F, or Np Waters?

☐ No Skip to Question 25.

☐ Yes Continue to Question 22. See instructions for qualifications and information.

22. Choose the answer below that best fits your land. Show all RMZs on the Activity Map.

□ a. ALL of the following apply to me and my land: (If no, answer b.)

  - Between June 5, 2006 and today’s date I have always owned less than 80 acres of forest land in Washington.

  - Between June 5, 2006 and today's date this parcel has always been 20 acres or less of contiguous ownership. See RCW 76.09.020 for definition of 'contiguous'.

  - Between June 5, 2006 and today's date this parcel has always been owned by me or someone else that has owned less than 80 acres of forest land in Washington.

□ b. ONE OR MORE of the following apply to me and/or my land (check all that apply):

*If any of the statements below apply AND you use the exempt 20-acre parcel RMZ rule, you are NOT authorized under the State's Incidental Take Permits (see explanation in FPA instructions under Question 22).*

☐ Between June 5, 2006 and today’s date I have owned more than 80 acres of forest land in Washington.

☐ Between June 5, 2006 and today’s date this parcel has been a part of more than 20 acres of contiguous ownership. See RCW 76.09.020 for definition of ‘contiguous’.

☐ Between June 5, 2006 and today’s date this parcel has been owned by someone that has owned more than 80 forested acres in Washington.
23. If harvesting within 115 feet of a Type S or F Water on an exempt 20-acre parcel, complete the table below. Show RMZs and stream segment identifiers on the Activity Map. If you are harvesting within 75 feet or within the maximum RMZ (whichever is less), stream shade must be assessed and met following harvest. Describe in Question 28 how stream shade was determined to be met, using the 'Appendix F. Stream Shade Assessment Worksheet' if necessary.

<table>
<thead>
<tr>
<th>Stream Segment Identifier (letter)</th>
<th>Water Type (S, F)</th>

</tr>
</tbody>
</table>

24. Are you harvesting within 29 feet of a Type Np Water on an exempt 20-acre parcel?

☐ No  Skip to Question 27.

☐ Yes  See instructions and describe leave tree strategy in Question 28. Then skip to Question 27.

25. If harvesting within 200 feet of any Type S or F Water or periodically inundated areas of their associated wetlands, complete the table below. Include Desired Future Condition (DFC) for all inner zone harvests unless you have an HCP prescription. Show RMZs, CMZs, and stream segment identifiers on the Activity Map. If you are harvesting within 75 feet or within the maximum RMZ, whichever is less, stream shade must be assessed and met following harvest. Describe in Question 28 how stream shade was determined to be met or use the 'Appendix F. Stream Shade Assessment Worksheet' if necessary.

27. How are the following currently marked on the ground? (Flagging color, paint color, road, fence, etc.)

Harvest/Salvage Boundaries: Pink 'Timber Harvest Boundary' flagging. See Alternate Plan

Clumped Wildlife Reserve Trees/Green Recruitment Trees: See Alternate Plan

Right-of-Way Limits/Road Centerlines: N/A

Stream Crossing Work: N/A

Riparian Management Zone Boundaries and Leave/Take Trees: See Alternate Plan

Channel Migration Zone: N/A

Wetland Management Zone Boundaries and Leave/Take Trees: N/A

28. Additional Information (attach additional pages if necessary): For hydraulic projects in or over Type S, F, or complex N Water(s) see instructions for required plan information. If applicable, include mitigation measures from a geotechnical memo, letter, or report.

"Mann THIN" FPA:

- An Alternate Plan is proposed for this FPA (See Attached). This Alternate Plan follows an approach and prescription utilized by many other previously approved harvest FPA's that either this landowner or R.H. Emerson & Sons LLC., have undertaken in the Pacific Cascade Region. This prescription was developed with feedback from representatives from the Yakima Tribe, the Quinault Tribe, Department of Ecology, the Washington State Department of Fish & Wildlife, and the Washington State Department of Natural Resources. Many FPA's have successfully utilized this approach, and examples with documented ICN reports from representatives of the entities described above include the following FPA's: 2924586, 2925342, 2925845, and 2925422. Additional FPA's that utilized this approach include 2927726, 2929094, 2929096, 2929407, 2929768, 2931625, 2933493, 2931498, 2931604, 2931587, and 2934004.
- Stream typing was determined by field review in September, 2018, referencing RMAP records, and referencing stream survey records.
- All streams walked to top of channel.
- Equipment crossings at streams will utilize logs/slash to minimize soil disturbance. Materials will be pulled upon completion of harvest.
- A Water Type Modification Form (WTMF) for Streams F1, Np1, Np2, Np3, and Np4 was submitted on 11/20/2018 and assigned the reference number NW-07-18-0032. This WTMF is currently under review.
29. We acknowledge the following:

- The information on this application/notification is true.
- We understand this proposed forest practice is subject to:
  - The Forest Practices Act and Rules AND
  - All other federal, state or local regulations.
- Compliance with the Forest Practices Act and Rules does not ensure compliance with the Endangered Species Act or other federal, state or local laws.
- If we said that we would not convert the land to non-forestry use, the county or city may deny development permits on this parcel for the next 6 years.
- The following may result in an unauthorized incidental take of certain endangered or threatened fish species:
  - Conversion of land to non-forestry use.
  - Harvesting within the maximum RMZ on a 20-acre exempt parcel that was acquired after June 5, 2006.
  - Equipment Crossings/Fords in or over Type S and F Waters.
- Inadvertent Discovery – Chapters 27.44, 27.53, 68.50 and 68.60 RCW
  - If you find or suspect you have found an archaeological object or Native American cairn, grave, or glyptic record, immediately cease disturbance activity, protect the area and promptly contact the Department of Archaeology and Historic Preservation at 360 586-3077.
  - If you find or suspect you have found human skeletal remains, immediately cease disturbance activity, protect the area, and contact the County Coroner or Medical Examiner and local law enforcement as soon as possible. Failure to report human remains is a misdemeanor.

The landowner understands that by signing and submitting this FPA, he/she is authorizing the Department of Natural Resources to enter the property in order to review the proposal, inspect harvest operations, and monitor compliance for up to three years after its expiration date. RCW 76.09.150

</table>

1. Current conditions and management goals:
   a) List the predominate tree species, average tree height and age; note excessive blowdown, fire damage, root rot or other forest health issues; describe topography.
   b) Describe the resource management goals you wish to achieve through this alternate plan.

Current conditions consist of a 26 year old Douglas-fir dominant stand. Average dbh ranges 8"-10" inches with heights ranging from ~60' to ~85'. The stand has an average of 350 conifer trees per acre, with an additional 50 trees per acre of red alder, maple and cherry mixed throughout the stand. Units do not show signs of excessive blowdown, fire damage, or other major forest health issues. Slopes in the units range from 0 to 60%.

Management objectives include maximizing the growth of conifers on site by removing hardwoods, suppressed or defective trees, which will improve spacing of the existing stand. By conducting these operations down to within 25' of F waters it will better allow the riparian management zones to reach their desired future condition sooner than if they were left in the current condition. This will then allow these RMZ's to better perform their riparian functions.
2. **Proposed Management Activities**: Describe what activities will be conducted (example; harvest, tree planting, road construction, etc). Describe where, how, and when each activity will be conducted. 

   NOTE: A representative sample of the proposed alternate plan area must be flagged on the ground for interdisciplinary team review.

   Activities will include timber harvest of overstocked stands utilizing mechanized cut-to-length equipment. Commercial thinning activities will take place within the boundaries of the units 1, 2, 3, & 4, which are delineated with pink "Timber Harvest Boundary" flagging. Harvest prescription will involve individual tree selection that gives priority to harvest hardwoods first, thin from below second, and remove trees with log defect lastly. Overall target for harvest units are 170 conifer trees per acre. It is proposed to thin 100% the length of Np waters where sidelzones are generally less than 40% and an average of 120 dominant conifer trees can be maintained. All trees that are growing within Np stream channels, or contributing to the streambank integrity of Np waters, will be left. However, channel trees may be cut in isolated areas to facilitate skid trail crossings. By thinning 100% of the length of Np streams it will better allow the Np RMZs to perform their functions for the reasons previously stated above. Depending on the hardwood component, log defect, and minor forest health issues, isolated areas may be reduced down to 120 trees per acre. Operations are proposed to take place in the balance of 2019, 2020, or 2021 depending on markets, weather conditions, and other factors.

3. **Describe how your proposed management activity would affect the alternate plan area**

   For activities in a riparian area:
   a) Describe the current level of large woody debris, shade, bank stability, sediment filtering and nutrient input.
   b) Explain the short and long term changes in the amount of large woody debris, shade, bank stability, sediment filtering and nutrient input from the current level. Be as specific as possible. See Board Manual Section 21

   Throughout stream segment F-1 and F-2 logs and root wads are present on a moderate basis. Stands adjacent to the F streams provide 80-100% canopy closure during the summer months. In general, stream banks appear to be stable. Where portions of the type F buffers approach 25 feet from BFW side slopes generally less than 20%. As sideslopes increase buffer distance increase proportionately up to 40% sideslopes. In general, areas that are adjacent to type F waters, and greater than 40% have been bounded out of the unit. It is anticipated that sediment filtering impacts should be minimal. Nutrient input appears to be normal for site II ground.

   The large woody debris input will be relatively unaffected in the short term. It is expected that long term large woody debris will increase as a result increased diameter growth. Short term stream shade impacts will be low, as portions of the Type F streams have a 25’ minimum no cut buffer. Long term, shade is expected to be maintained or increase through the removal of hardwood and promoting the growth of larger dominant conifer trees. Short and long term bank stability is not expected to change. Sediment filtering will likely recover from what minimal change will occur with harvest operations. It is expected that nutrient input in the short term will be slightly reduced, with an overall increase in the long term through increased growth of conifer trees and diversity of understory vegetation.
4. If you are planning activities in the riparian area, fill in the table below.

<table>
<thead>
<tr>
<th>Stream Segment Identifier</th>

Marbled Murrelet Form
Western Washington Forest Practices Application/Notification

Complete this form only if you are harvesting timber (including salvage) or constructing roads. Do not complete this form if you have an HCP for marbled murrelets.

Answer every question.

1. ☒ No ☐ Yes For this FPA/N, has a protocol survey(s) been completed that includes:
   - Harvest units (and within 300 ft on your ownership), or
   - Salvage units (and within 300 ft on your ownership), or
   - Any area of proposed road construction (and within 300 ft on your ownership)?

   If 'Yes', fill out the table and check the appropriate findings below.

<table>
<thead>
<tr>
<th>Survey ID (Name or Unit #)</th>
<th>Township, Range, &amp; Section</th>
<th>Survey was approved by WDFW (Attach approval letter from WDFW)</th>
<th>Survey was disapproved by WDFW and is being resubmitted with this FPA/N (Explain below)</th>
<th>Survey has been submitted to WDFW and survey approval is unknown (Explain below)</th>
<th>Survey is complete but has not yet been submitted to WDFW (Submit survey with FPA/N)</th>

Explanation:

2. ☒ No ☐ Yes ☐ Unknown Will you harvest, salvage, or construct roads within 0.25 miles of an occupied site?

3. ☒ No ☐ Yes ☐ Unknown Will you fly helicopter(s) over or within 0.25 miles of an occupied site?

4. ☒ No ☐ Yes Description of managed buffers:

   If Yes, describe the leave trees and buffer widths you will leave. NOTE: if you leave less than required in WAC 222-16-080(1) (j) (v) this is a Class IV-Special and an Environmental Checklist is required

Form QQ46 (05-14-05) 1 of 2
5. **No** [ ] **Yes**  
Are there nesting platforms within any harvest unit (including salvage and road construction) that are within 300 feet that:
- Are not located within a surveyed area, **and**;
- Have a minimum of 2 platforms per acre, **and**;
- Are located within 7 or more acres of contiguous habitat, **and**;
- Have a least 40% (number not volume) of the dominant and co-dominant trees made up of Douglas-fir, western hemlock, western red cedar, or Sitka spruce?

If "Yes", complete the table below for those areas.

<table>
<thead>
<tr>
<th>Name or # (as shown on map) of delineated stands of contiguous habitat</th>
<th>Delineated stand acres</th>
<th>Nesting platforms per acre</th>
<th>Number of trees 32 inches dbh or greater with platforms</th>
<th>Platform Assessment Method</th>
</tr>
</thead>

</table>

6. **No** [ ] **Yes**  
Are there areas within this forest practice or within 300 feet that:
- Are not surveyed, **and**;
- Are not listed in question 5, **and**;
- Have trees that are at least 32 inches dbh

If "Yes", list the forest practice unit numbers from your activity map. Provide brief description of current stand conditions. Such as tree species composition, stand age (if known), and maximum tree size (dbh).

Harvest Unit #(s) 1-4 [ ] Within the Unit [ ] Within 300 feet of the Unit

Description:
Scattered 32" trees exist. However, does not meet minimum platform criteria.

Harvest Unit #(s) 1-4 [ ] Within the Unit [ ] Within 300 feet of the Unit

Description:
Scattered 32" trees exist. However, does not meet minimum platform criteria.

Harvest Unit #(s) [ ] Within the Unit [ ] Within 300 feet of the Unit

Description:

7. If you answered yes to question 1, 4, or 5, include a map (separate from your map that shows your harvest units and/or road construction) See the instructions for the information required on each map.

Linda,

Please include this additional information with my submittal for FPA# 2816772 "Mann THIN":

Additional information regarding the stand condition of the proposed harvest unit:

(a) F-Type harvest buffers in the proposed FPA area have a 95% understory component of riparian vegetation (determined by 1/100th-acre fixed area vegetation cover plots), with salmon berry, sword fern, vine maple, and various herbaceous species dominating these areas. Conifer-dominant and densely-stocked areas within the core and inner zones of F-Type streams, which are proposed for thinning, contain similar species, however there is only 30% understory cover averaged in these areas due to lack of sunlight. Understory cover and diversity is expected to increase after thinning and this is expected to improve the abundance and diversity of nutrient input to these F-Type stream systems.

(b) Current shade percent was determined by averaging ten shade cover plots taken with a densiometer. After thinning occurs, it is expected that shade will temporarily be reduced to 85%. We anticipate shade cover to return to 90% or greater within ten years of thinning.

(c) The majority of woody debris is legacy debris from historic operations. Thinning near Type-F waters is expected to accelerate the development of large trees as compared to a no-thinning option. With the quicker development of large trees, a corresponding improvement in the availability of large woody debris is the likely outcome.

After receiving feedback from the field review team today, I would like to add the following self-imposed conditions to apply to my FPA request:

(1) Harvest buffers on all F-Type waters will be variable-width buffers with a minimum 25-foot riparian harvest buffer. These buffers typically exceed 25-feet due to an intentional effort to avoid hardwood-dominated areas, slopes in excess of 40%, and under-stocked areas (less than 170 trees per acre presently).

(2) Target thinning spacing will be 170 trees per acre for all areas within the proposed harvest areas in this FPA.

(3) Equipment will be restricted to traveling over slopes of 40% or less. Trees on slopes of 40%-65% slopes may be harvested if they can be reached by equipment stationed on slopes of 40% or less.

---

**Other Applicable Laws**

Operating as described in this application/notification does not ensure compliance with the Endangered Species Act, or other federal, state, or local laws.

**Transfer of Forest Practices Application/Notification (WAC 222-20-010)**

Use the “Notice of Transfer of Approved Forest Practices Application/Notification” form. This form is available at region offices and on the Forest Practices website: [http://www.dnr.wa.gov/businesspermits/forestpractices](http://www.dnr.wa.gov/businesspermits/forestpractices). Notify DNR of new Operators within 48 hours.

**Continuing Forest Land Obligations (RCW 76.09.060, RCW 76.09.070, RCW 76.09.390, and WAC 222-20-055)**

Obligations include reforestation, road maintenance and abandonment plans, conversions of forest land to non-forestry use and/or harvest strategies on perennial non-fish habitat (Type Np) waters in Eastern Washington.

Before the sale or transfer of land or perpetual timber rights subject to continuing forest land obligations, the seller must notify the buyer of such an obligation on a form titled “Notice of Continuing Forest Land Obligation”. The seller and buyer must both sign the “Notice of Continuing Forest Land Obligation” form and send it to the DNR Region Office for retention. This form is available at DNR region offices.

If the seller fails to notify the buyer about the continuing forest land obligation, the seller must pay the buyer’s costs related to continuing forest land obligations, including all legal costs and reasonable attorneys’ fees incurred by the buyer in enforcing the continuing forest land obligation against the seller.

Failure by the seller to send the required notice to the DNR at the time of sale will be prima facie evidence in an action by the buyer against the seller for costs related to the continuing forest land obligation prior to sale.
