Small Forest Landowner
Long-Term Forest Practice Application
Office Review Checklist
Northwest Region

STEP 2: FPA Classification: [ILIVG] IVS
Landowner: [Name]
Term of Long Term Application (3 to 15 years): 15
Project Name: [Name]
WRIA: Snohomish
WRIA: [Name]
WAU: Skagit River
WAU: [Name]
Legal Description: 43329.9E, 17, 13, 14, 20, 21, 22, 23, 24, 25, 26, 27, 28, 29, 30, 33, 34, 35

Resource Review – Step 1
- Saltwater Islands
- Rain-on-Snow and Outside Approved WA
- Unstable Features
  - Soils Map (Highly Erodible & Very Unstable)
  - SLPSTAB
  - Landslide Hazard Zonation
  - Landslide Polygon
- Hydric Soils
- Wetland: [Forested, A, B]
- Streams [S, F, M, N, ] CMZ, [ ] Pond
- Sensitive sites
- Bald Eagle nest or roost within 660 feet
- Water Verification
- RMP # 838000126
  - Stream Crossing(s)
  - Hatchery (TRAX code FS)
- Group A or B Water Supply (TRAX code DM or MU)
- Bull Trout Overlay
- HCP Bull Trout Population

Strategies & Prescriptions – Step 2
- Alternate Plan: attach plan
- Watershed Analysis Prescriptions
- Columbia River Gorge National Scenic Area
- Timber Harvesting 2,400 acres
  - Within Unstable Land forms
    - Within WMZ of A [ ] B
  - Within [ ] A [ ] B Forested wetland
    - Wetland Mitigation Plan
  - Within RMZ/ELZ of type [S, X. F] [ ] N water
  - Hardwood Conversion: attach form
    - Volume greater than 5 MBF per acre
    - Even-aged Harvest greater than 120 acres
    - Ground-based equipment on slopes > 40%
  - Road construction ________ feet
  - on stopes > 65%
  - stream crossing(s) ________
  - Road abandonment ________ feet
  - Cooperative Habitat Enhancement Agreement
  - Landowner Option Plan for Northern Spotted Owl
  - Other: ________
  - Slope Stability Informational Form
  - CMZ Assessment Form

ASSOCIATED NON-SCANNED DOCUMENTS– On file with the FPA/N at the region office.
- SEPA Checklist/Documents
- Large Landowner Road Maintenance and Abandonment Plan

ASSOCIATED SCANNED DOCUMENTS
- Wetland Mitigation
- Qualified Expert Report
- Natural Regeneration
- Shoreline Permit
- Small Landowner RMAP Checklist
- Conversion Option Harvest Plan
- FPH Plans & Specifications
- Marbled Murrelet Form
- FPBM Appendix(s)
- Shade Documentation
- DFC Printout
- Water Classification Worksheet
- Watershed Analysis Worksheet
- Water Protocol Survey [ ] Modification

ADDITIONAL COMMENTS: EARR Tax Credit [ ] Yes [ ] No

Form completed by [Signature]
- 4.6 Mile Disturbance Avoidance
- Salvage, Biomass or Spray
Step 2

RECEIVED NW REGION

JUL 27 2017

3. For how many years do you want this Long-term FPA to be valid? 15 years. Long-term FPAs are valid from 4 to 15 years.

4. Are you selling standing timber? ☐ Yes ☒ No

If Yes, record your Forest Tax Registration Account Number: ________
For tax reporting information or to receive a tax number, call the Department of Revenue at 1-800-548-8829.

5. Is this forest practice application: (Answer each question)

a. ☒ No ☐ Yes Within the city limits or inside an urban growth area? If Yes, SEE INSTRUCTIONS FOR ADDITIONAL REQUIRED DOCUMENTS.

b. ☒ No ☐ Yes Within a public park? If Yes, include SEPA Environmental Checklist or SEPA Determination, except for Harvesting/salvaging less than 5,000 board feet within a developed public park.

c. ☒ No ☐ Yes Include an approved Conversion Option Harvest Plan (COHP) from the local government? If yes, include a copy.

d. ☐ No ☒ Yes Within 200' of the Ordinary High Water Mark (OHWM) or floodway of Type S water? If yes, check with the county or city to determine whether a substantial development permit is required under the local shorelines master plan.

e. ☒ No ☐ Yes Include an Alternate Plan? If yes, include a copy.
6. Are you substituting prescriptions from an approved state or federal conservation agreement or watershed analysis?  
☐ No  ☐ Yes Write "Using Prescriptions" in tables that apply. Attach or reference prescriptions/crosswalk on file.
7. Is the taxpayer eligible for the EARR Tax Credit?  
☐ No  ☒ Yes

**********************************************************************If not working in or over typed waters, skip to number 12**********************************************************************

Prior to answering number 8-11 in this section please refer to the Forest Practices Application Instructions and Forest Practices Board Manual Section 5 (BM 5).

8. Are you proposing any of the following projects NOT permitted by current HPAs from WDFW?  
   a. ☐ No  ☐ Yes Installing, replacing or repairing a culvert at or below the bankfull width of Type S or F Water(s) that exceeds a five percent gradient?
   b. ☐ No  ☐ Yes Constructing, replacing, or repairing a bridge at or below the bankfull width of unconfined streams in Type S or F water(s)?
   c. ☐ No  ☐ Yes Placing fill material within the 100-year flood level of unconfined streams in Type S or F water(s)?

9. Have you consulted with DNR and/or WDFW about the proposed hydraulic project(s) in or over Type S or F water?  ☐ No  ☐ Yes

10. If installing, replacing, removing or maintaining structures in or over any typed water, complete the table below. Type S and F waters require detailed plan information. Provide plan details in number 23 or attach plan to the FPA/N. Provide crossing locations and identifiers on your Activity Map. (A detailed plan with profiles may also be required for more complex hydraulic projects in Type N Waters per WAC 222-24-042(2)).

<table>
<thead>
<tr>
<th>Crossing Identifier (Site and/or number)</th>
<th>Water Type (S, F, Ns)</th>
<th>Existing HPA Number (if applicable)</th>
<th>HPA Expiration (if applicable)</th>
<th>Planned Activity (install, replace, temporary, maintenance)</th>
<th>Structure (culvert, bridge, etc.)</th>
<th>Proposed Size (dimensions of structure)</th>
<th>Culvert Design Method (Hydraulic, Environmental, F and S only)</th>
<th>Channel Bed Width (ft)</th>
<th>Stream Gradient (%)</th>
<th>RMAP Project (Y or N)</th>
<th>FFPP Project (Y or N)</th>

*Existing HPAs issued by WDFW will be compiled and enforced by WDFW until expiration. Plan details are not required for hydraulic projects permitted with an existing HPA (see instructions).

** Fords and equipment crossings on Type S and F Waters may result in an unauthorized incidental take of certain endangered or threatened fish species. For more information, see "Background for the state's Incidental Take Permits for certain endangered and threatened fish species" following number 16 of the Long-term FPA/N Instructions.
11. If conducting any of the following activities in or over typed water, complete the table below. Some activities will require identifiers on your Activity map and/or more information in number 23, Additional Information. See instructions.

<table>
<thead>
<tr>
<th><em>Activity</em></th>

</tbody>
</table>

If not using the exempt 20 acre parcel RMZ rule, skip to number 19

16. If using the exempt 20-acre parcel RMZ rule on Type S, F, or NP Waters answer the following questions. Show all RMZs on your Activity Map.

a. ☐ No ☐ Yes Was this parcel 20 acres or less before June 5, 2006?

b. ☐ No ☐ Yes Have you owned less than 80 forested acres on or before June 4, 2006?

17. If harvesting within the Maximum RMZ widths of a Type S or F Water on a 20-acre exempt parcel, complete the table below. Show RMZs, along with their associated stream segment identifiers, on your Activity Map. (Include stream shade assessment methodology if you are harvesting within 75 feet, or the maximum RMZ, whichever is LESS. If using BM1 to evaluate shade, you may use the "Stream Shade Assessment Worksheet").

<table>
<thead>
<tr>
<th>Stream Segment Identifier (letter)</th>
<th>Water Type (S, F)</th>
<th>Segment Length (feet)</th>
<th>Bankfull Width (feet)</th>
<th>Maximum RMZ Width (feet)</th>
<th>Are you harvesting within the maximum RMZ? (Y or N)</th>

</table>

18. Are you harvesting within 29 feet of a Type NP water on a 20 acre exempt parcel?

☐ No Skip to number 21.

☐ Yes See instructions and describe leave tree strategy in number 23. Then skip to number 21.
19. If harvesting within 200 feet of any of Type S or F Waters, complete the table below. Include DFC for all inner zone harvest, unless you have an HCP prescription. Show RMZs and CMZs, along with their associated stream segment identifiers, on your Activity Map. (Include stream shade assessment methodology if you are harvesting within 75 feet, or the maximum RMZ, whichever is LESS. If using BM1 to evaluate shade, you may use the "Stream Shade Assessment Worksheet").

<table>
<thead>
<tr>
<th>Stream Segment Identifier (letter)</th>

</table>

21. How are the following marked on the ground? (Flagging, paint, road, fence, etc)

- Harvest Boundaries: n/a
- Clumped Wildlife Reserve Trees/Green Recruitment Trees: n/a
- Right-of-way limits/road centerlines: n/a
- Stream Crossing Work: n/a
- Riparian Management Zone Boundaries and Leave/Take Trees: n/a
- Extents of unstable feature(s): n/a
- Channel Migration Zone(s): n/a
- Wetland Management Zone Boundaries and Leave/Take Trees: n/a

22. Have you reviewed the proposed activity area to determine if it may involve historic sites and/or Native American cultural resources? Read the instructions carefully before answering this question.

☐ No  ☒ Yes
23. Additional Information: (attach additional paper, if needed)
   For hydraulic projects in or over F or S water(s) see instructions for additional required plan information.

   Project will begin in 2017 in the south half of Sections 21 & 22 of Township 29N Range 09E.

   See Question #13 Addendum submitted with LTA Step #1 for project description, resource protection plan, and parcel list.

24. We acknowledge the following:
   - The information on this application is true.
   - We understand this proposed forest practice is subject to:
     - The Forest Practices Act and Rules
     - All other federal, state or local regulations
   - Compliance with the Forest Practices Act and Rules does not ensure compliance with the Endangered Species Act or other federal, state or local laws.
   - This isn’t a conversion application to non-forestry use. The county or city may deny development permits on this parcel for the next 6 years.
   - The following may result in an unauthorized incidental take of certain endangered or threatened fish species
     - Conversion of land to non-forestry use
     - Harvesting within the maximum RMZ on a 20-acre exempt parcel that was acquired after June 5, 2006

   *NOTE: If you are a "Perpetual Timber Rights Owner," and are submitting this without the Landowner's Signature, provide written evidence the landowner has been notified.

**RECEIVED NW REGION**

**JUN 6 2017**
4. Are there potentially unstable slopes or landforms within the boundaries of your forest practices activity area?
   - No  □ Yes – attach geotechnical report and “Slope Stability Informational Form.” If applicable, attach the SEPA checklist, HCP or Watershed Analysis prescriptions.

5. Are there potentially unstable slopes or landforms adjacent to your forest practices activity area?
   - No  □ Yes – complete and attach the “Slope Stability Informational Form.” If applicable, attach geotechnical report, HCP or Watershed Analysis prescriptions.

6. Is the area included in this assessment: (Answer each question)
   a. □ No  □ Yes Within 500 feet of a public park? Park name: ________________
   b. □ No  □ Yes Using forest roads that are included in a Road Maintenance and Abandonment Plan (RMAP)?
      i. If yes, What is the RMAP number? ________________
      ii. For any forest roads that aren’t included in an RMAP complete number 10, Road Assessment.
   c. □ No  □ Yes Within 50 miles of saltwater and do you own more than 500 acres of forest land in Washington State? If Yes - include the “Marbled Murrelet Form” or attach/reference HCP prescriptions.
   d. □ No  □ Yes Including areas of critical wildlife habitat? If yes, document types of habitat and their locations on a separate Activity Map from the one(s) used for the rest of your assessment.
   e. □ No  □ Yes In or directly adjacent to a potential Channel Migration Zone (CMZ)? If Yes – include the “CMZ Assessment Form.” Attach/reference applicable HCP and/or Watershed Analysis prescriptions.

7. Streams, Lakes, and Ponds inventory. List each one separately. Show them, along with their Identifiers, on your Activity Map.

*NOTE: If you are a “Perpetual Timber Rights Owner,” and are submitting this without the Landowner's Signature, provide written evidence the landowner has been notified.
Question #13 Addendum

**Overall objectives:**

This application is submitted to cover the creation of individual snags and canopy gaps as part of an effort to increase the biocomplexity of wildlife habitat found in the Spada Lake Tract. Canopy gap and individual snag creation methodology will be guided by the Terrestrial Resource Management Plan (TRMP) for the Henry M. Jackson Hydroelectric Project (2009; available upon request from Snohomish County PUD #1) and will meet or exceed all State of Washington Forest Practices Rules. **No timber removals will take place as part of this proposal and no logs will be sent to any mill.**

**Canopy Gaps:**

Within dense conifer patches, our plan is to create “clumped” snags from groups of approximately 10 to 20 trees from all size classes (6-16” DBH). Several live limbs will be retained on the largest trees to retard decomposition, while the smaller trees will be killed by topping or girdling. This procedure will result in one canopy gap, approximately 0.1 acres in size (maximum of .25 acre), for every 5 acres within the proposal area. No part of the affected trees will be removed from the site. Beyond snag creation, this effort is intended to increase understory forage opportunities and provide growing space for conifer trees surrounding the canopy gaps. No canopy gaps will be created within 100 feet of Spada Lake or any other non-forested wetland 0.25 acre or greater in size. Additionally, no gaps will be created within forested wetlands, within 50 feet of any typed water, within 300 feet of suitable marbled murrelet habitat, or on any rule identified potentially unstable landform (including inner gorge, bedrock hollow, convergent headwall, the toe of a deep-seated landslide, outer edges of meander bends, or groundwater recharge areas for glacial deep-seated landslides). A representative of Snohomish P.U.D. #1 will be locating and marking individual gaps with the professional contracted forester and will be present during all operations. Consequently, as per previously approved applications #2809342 and #2807274, none of the “harvest” boundaries are pre-marked.

**Individual Snag Creation:**

In addition to clumped snag canopy gaps, an average of three individual snags or decaying live trees per acre will be created in forest stands less than 100 years old and that have at least 40 live trees per acre over 10 inches DBH. All three snags will be created from the larger live trees (by DBH) in the stand. Snags will be created by removing all live limbs. Decaying live trees will be created by topping trees but leaving enough live limbs to keep the tree alive for at least 5 years. At least one of the three will be a created snag and one will be a decaying live tree. The third will be determined on a site-specific basis. No individual snags will be created within the core zone of any Type S or F water, but individual snags will be created within the inner zone and outer zones of Type S and F water. Three snags per acre will be created where appropriate within RMZs of Type N water and within WMZs and forested wetlands. The
number of live trees remaining in RMZs and WMZs post snag creation will greatly exceed the number of leave trees required in Forest Practices rules. No individual snags will be created on any rule identified potentially unstable landform (including inner gorge, bedrock hollow, convergent headwall, toe of a deep-seated landslide, outer edges of meander bends, or groundwater recharge areas for glacial deep-seated landslides) or within 300 feet of suitable marbled murrelet habitat. A representative of Snohomish P.U.D. #1 will be locating and marking individual gaps with the professional contracted forester and will be present during all operations. Consequently, as per previously approved applications #2809342 and #2807274, none of the “harvest” boundaries are pre-marked.

Potentially Unstable Slopes:

An office review of the proposal area using GIS and lidar data was completed and potentially unstable areas are shown on the attached maps. All areas will be field assessed prior to operations and no operations will occur on any rule identified landform as defined in the Washington State Forest Practices Board Manual Section 16 and WAC 222-16-50.

Appendix D. Slope Stability Informational Form

Complete and attach this form to your FPA if you answered 'Yes' to FPA Question 11 or 12. Refer to WAC 222-16-050(1)(d) and Forest Practices Board Manual Section 16—Guidelines for Evaluating Potentially Unstable Slopes for definitions and descriptions of potentially unstable slopes or landforms.

1. What screening tools were used? ☑ Aerial Photo, ☑ LiDAR, ☑ Landslide Inventory, ☑ Landslide Hazard Zone Polygon, ☑ GIS/Other (describe):

2. Were there any features identified using the screening tools in #1 that did not exist in the field? If yes, describe:
   No.

3. a. What potentially unstable slopes or landforms were identified in the area of your forest practices activity? Check all that apply:
   ☐ Inner Gorge ☐ Groundwater recharge areas for glacial deep-seated landslides
   ☐ Bedrock Hollow ☐ Convergent Headwall ☐ Toe of deep-seated landslide
   ☐ Outer edges of meander bends
   ☐ Other (Deep-seated landslides or other features of potentially unstable slopes). Describe:
   None

   b. What activities may occur in potentially unstable slopes or landforms? Check all that apply:
      ☐ Timber harvest ☐ Road construction ☐ Suspending cables ☐ Yarding ☐ Tailholds

4. a. What potentially unstable slopes or landforms were identified around the area of your forest practices activity? Check all that apply:
   ☑ Inner Gorge ☐ Groundwater recharge areas for glacial deep-seated landslides
   ☐ Bedrock Hollow ☐ Convergent Headwall ☐ Toe of deep-seated landslide
   ☐ Outer edges of meander bends
   ☑ Other (Deep-seated landslides or other features of potentially unstable slopes). Describe:

   b. What activities may occur around potentially unstable slopes or landforms? Check all that apply:
      ☐ Timber harvest ☐ Road construction ☐ Suspending cables ☐ Yarding ☐ Tailholds

For use with FPA/N dated 6/1/2016 or later
5. If any features identified in #3.a. and/or #4.a. were bounded out, describe the manner in which the boundary was determined:

All areas to be assessed in the field using a combination of GIS, clinometer, laser rangefinder, and GPS, and bounded out with pink "Timber Harvest Boundary" flagging. Per the Forest Practices Board Manual, the upper boundaries of the inner gorge are identified as the first break in slope of at least 10 degrees, or the line above where slopes are mostly gentler than 35 degrees (70%) and convex.

6. Were areas of public use (which may include, but are not limited to: public roads, utilities, designated recreation areas, occupied structures, etc.) identified in or around the area of your proposed forest practices activity? Show these locations on the map in #8.

Spada Lake is in the vicinity of the proposal area.

7. Date of field review: Ongoing

Person(s) that conducted field review: Travis Miranda

Name Title/position

8. Show all field reviewed areas for potentially unstable slopes or landforms on a map (may use a forest practices activity map, harvest map or GIS map – See example below). Show locations where areas of public use exist. This map is intended to be developed by the field practitioner.

Appendix A. Western Washington Water Type Classification Worksheet

Stream/Segment ID: All Np

Date Observed: Spring 2017

1. Do you have a protocol survey? (See the Board Manual Section 13) Or, does the stream have waiver characteristics? (See WAC 222-16-031(3) (b) (ii))
   [ ] No. Continue.
   [X] Yes. Attach documentation or approved WTMF number:
      [ ] Fish found. Stop.
      [ ] No fish found. Go to 6.

2. Were fish observed or are fish known to use the stream any time of the year?
   [X] Yes. Type F water. Stop.
   [ ] No. Continue.

3. Is there an impoundment (ponded water) upstream of the assessed segment, that is greater than .5 acres?
   [X] Yes. Type F water. Stop.
   [ ] No. Continue.

4. Are there segments within or above the assessed portion of the stream where the average BFW is two feet or greater? AND the average stream gradient is less than or equal to 16%?
   [X] Yes. Type F water. Stop.
   [ ] No. Continue.

5. Are there segments within or above the assessed portion of the stream where the average BFW is two feet or greater? AND the average stream gradient is between 16% and 20%? AND, the contributing basin to the stream is greater than 50 acres?
   [X] Yes. Type F water. Stop.
   [ ] No. Continue.

6. Does the stream segment contain water at all times during a normal rainfall year?
   [X] Yes. Type Np water. Go to 9.
   [ ] No. Continue.

7. Is the stream segment downstream of a perennial source of water?
   [X] Yes. Type Np water. Go to 9.
   [ ] No. Continue.

8. Is the stream physically connected by an above-ground channel to Type S, F, or Np water?
   [X] Yes, Type Ns water. Stop.
   [ ] No, non-typed water.

9. Describe how you determined the uppermost point of perennial flow. Include a description of its location and show the point on a map (Use a separate piece of paper if necessary).

Stream/Segment ID: n/a

Not applicable as no timber removals will take place as a result of this proposal.

6/1/2016
Marbled Murrelet Form
Western Washington Forest Practices Application/Notification

Complete this form only if you are harvesting timber (including salvage) or constructing roads. Do not complete this form if you have an HCP for marbled murrelets.

Answer every question.

1. ☒ No ☐ Yes For this FPA/N, has a protocol survey(s) been completed that includes:
   - Harvest units (and within 300 ft on your ownership), or
   - Salvage units (and within 300 ft on your ownership), or
   - Any area of proposed road construction (and within 300 ft on your ownership)?

   If 'Yes', fill out the table and check the appropriate findings below.

   | Explanation: |

   | 2. ☒ No ☐ Yes ☐ Unknown Will you harvest, salvage, or construct roads within 0.25 miles of an occupied site? |

   | 3. ☒ No ☐ Yes ☐ Unknown Will you fly helicopter(s) over or within 0.25 miles of an occupied site? |

   | 4. ☒ No ☐ Yes Will you harvest live trees in a buffer of an occupied site? |

   If Yes, describe the leave trees and buffer widths you will leave. 

   NOTE: If you leave less than required in WAC 222-16-080(1)(h)(v) this is a Class IV-Special and an Environmental Checklist is required

Description of managed buffers:
5. **No** □ **Yes**  Are there nesting platforms within any harvest unit (including salvage and road construction) that are within 300 feet that:
- Are not located within a surveyed area, and;
- Have a minimum of 2 platforms per acre, and;
- Are located within 7 or more acres of contiguous habitat, and;
- Have a least 40% (number not volume) of the dominant and co-dominant trees made up of Douglas-fir, western hemlock, western red cedar, or Sitka spruce?

If "Yes", complete the table below for those areas.

<table>
<thead>
<tr>
<th>Name or # (as shown on map) of delineated stands of contiguous habitat</th>
<th>Delineated stand acres</th>
<th>Nesting platforms per acre</th>
<th>Number of trees 32 inches dbh or greater with platforms</th>
<th>Platform Assessment Method</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td></td>
<td></td>
<td></td>
<td>Field Sampling Method, Sample Plot Method, 100% Cruise Method, Inventory Model Method, or Other</td>
</tr>
</tbody>
</table>

6. **No** □ **Yes**  Are there areas within this forest practice or within 300 feet that:
- Are not surveyed, and;
- Are not listed in question 5, and;
- Have trees that are at least 32 inches dbh

If "Yes", list the forest practice unit numbers from your activity map. Provide brief description of current stand conditions. Such as tree species composition, stand age (if known), and maximum tree size (dbh).

Harvest Unit #(s)_________ □ Within the Unit □ Within 300 feet of the Unit
Description:

Harvest Unit #(s)_________ □ Within the Unit □ Within 300 feet of the Unit
Description:

Harvest Unit #(s)_________ □ Within the Unit □ Within 300 feet of the Unit
Description:

7. If you answered yes to question 1, 4, or 5, include a map (separate from your map that shows your harvest units and/or road construction) See the instructions for the information required on each map.
Small Forest Landowner
Long-term Forest Practices Application

Step 1
Resource and Roads Assessment
Notice of Decision

**Decision**

[ ] Validated
[ ] Rejected
[ ] Closed

- Landowner has correctly identified resources and completed road assessment.
- This Forest Practices Application is rejected for the reason listed below.
- Applicant has withdrawn Step 1 of the long-term FPA

**Reasons for Rejection**

NOTE: Validation of Step 1 is not an approved application for forest practices activities. You must obtain an approved Step 2 Resources Protection Strategies of the Long-term Application and submit a 5 Day Notice of Operation prior to starting any forest practices activity per WAC 222-20-016.

Appeal Information

You have thirty (30) days to appeal this Decision and any related State Environmental Policy Act determinations to the Pollution Control Hearings Board in writing at the following addresses:

Physical address: 1111 Israel Rd. SW, Ste 301, Tumwater, WA 98501
Mailing address: P.O. BOX 40903, OLYMPIA, WA 98504-0903

Information regarding the Pollution Control Hearings Board can be found at: http://www.eluho.wa.gov/

At the same time you file an appeal with the Pollution Control Hearings Board, also send a copy of the appeal to the Department of Natural Resources' region office and the Office of the Attorney General at the following addresses:

Office of the Attorney General
Natural Resources Division
1125 Washington Street SE
PO Box 40100
Olympia, WA 98504-0100

Department Of Natural Resources
Northwest Region
919 N Township St
Sedro-Woolley WA 98284

Other Applicable Laws

Operating as described in this application/notification does not ensure compliance with the Endangered Species Act, or other federal, state, or local laws.

Transfer of Forest Practices Application/Notification (WAC 222-20-010)

Use the “Notice of Transfer of Approved Forest Practices Application/Notification” form. This form is available at region offices and on the Forest Practices website: http://www.dnr.wa.gov/businesspermits/forestpractices. Notify DNR of new Operators within 48 hours.

Continuing Forest Land Obligations (RCW 76.09.060, RCW 76.09.070, RCW 76.09.390, and WAC 222-20-055)

Obligations include reforestation, road maintenance and abandonment plans, conversions of forest land to non-forestry use and/or harvest strategies on perennial non-fish habitat (Type Np) waters in Eastern Washington.

Before the sale or transfer of land or perpetual timber rights subject to continuing forest land obligations, the seller must notify the buyer of such an obligation on a form titled “Notice of Continuing Forest Land Obligation”. The seller and buyer must both sign the “Notice of Continuing Forest Land Obligation” form and send it to the DNR Region Office for retention. This form is available at DNR region offices.

If the seller fails to notify the buyer about the continuing forest land obligation, the seller must pay the buyer's costs related to continuing forest land obligations, including all legal costs and reasonable attorneys’ fees incurred by the buyer in enforcing the continuing forest land obligation against the seller.

Failure by the seller to send the required notice to the DNR at the time of sale will be prima facie evidence in an action by the buyer against the seller for costs related to the continuing forest land obligation prior to sale.

DNR affidavit of mailing:

On this day 7/12/2017, I placed in the United States mail at Sedro-Woolley, WA, postage paid, a true and accurate copy of this document. Notice of Decision FPA # 2815806
