3. **Are you converting the land to non-forestry use within 3 years of harvest?**

- ☒ No  ☐ Yes  
  If yes, include your SEPA checklist and SEPA determination (if applicable) and county clearing and grading permit (if applicable).

4. **a. If you are harvesting timber, enter the Forest Tax Number of the Timber Owner:**

   800 059 489

   *Contact the Department of Revenue at 1-800-548-8829 for tax reporting information or to obtain a number.*

   **b. Are you eligible for EARR Tax Credit?**  
   ☐ No  ☒ Yes

5. **Are you a small forest landowner per RCW 76.09.450? See instructions**

- ☒ No  ☐ Yes  
  If yes, Check all that apply. If no, skip to Question 6.

  - [ ] My entire proposed harvest area is on a single contiguous ownership consisting of one or more parcels.
☐ My proposed forest practices activities are within an area covered by an approved Forest Stewardship Plan or Forest Management Plan developed in cooperation with DNR.

☐ I received technical assistance from a DNR small forest landowner Stewardship and Technical Assistance Forester in preparing this FPA/N.

☐ I have participated in a Washington State University Extension Service and/or DNR-sponsored Forest Stewardship Coached Planning course.

☐ I have attended a Washington State University Extension Service and/or DNR-sponsored Family Forest Owner Field Day.

6. Are you substituting prescriptions from an approved state or federal conservation agreement or Watershed Analysis?
   ☒ No ☐ Yes Write 'HCP' or 'Using Prescriptions' in tables that apply. Attach or reference prescriptions and/or crosswalks for approved state or federal conservation agreements or Watershed Analysis on file at the Region office.

7. What is the legal description of your forest practices?

<table>

8. Have you reviewed this forest practices activity area to determine whether it may involve historic sites and/or Native American cultural resources? Read the instructions before answering this question.
   ☐ No ☒ Yes If you made any contacts, please provide information in Question 28.

9. Do you have a DNR approved Road Maintenance and Abandonment Plan (RMAP)?
   a. ☐ No ☒ Yes If no, skip to c.
      If yes, enter your RMAP number: R2800056L, continue to b.
   b. ☒ No ☐ Yes Is this Forest Practices Application/Notification for work that is included in this approved RMAP?
   c. ☒ No ☐ Yes Is a Checklist RMAP required (see instructions)?

10. Are there potentially unstable slopes or landforms in or around the area of your forest practices activity?
    ☒ No ☐ Yes If yes, attach Appendix D. Slope Stability Informational Form and map of areas reviewed for and locations of unstable slopes and landforms found. If applicable, attach a geotechnical letter, memo, or report, Watershed Analysis prescriptions, and/or a SEPA Environmental Checklist.

11. Is this Forest Practices Application/Notification (answer every question):
    a. ☒ No ☐ Yes A request for a multi-year permit? If yes, length requested: ☐ 4 years or ☐ 5 years. Not everyone qualifies for a multi-year permit. See instructions for details.
    b. ☐ No ☒ Yes An Alternate Plan? If yes, include a template or detailed plan. See instructions for details.
c. No ☐ Yes For a funded Forest Family Fish Passage Program project?

d. No ☐ Yes Within an urban growth area? If yes, see instructions for additional required documents.

e. No ☐ Yes Within a public park? If yes, include SEPA Environmental Checklist or SEPA Determination, except for harvest/salvage of less than 5,000 board feet within a developed public park. Park name: ________________________________

f. No ☐ Yes Within 500 feet of a public park? Park name: ________________________________

g. No ☐ Yes In an approved Conversion Option Harvest Plan (COHP) from the local government? If yes, include a copy. This only applies to proposals within urban growth areas.

h. ☐ No ☒ Yes Within 200 feet of the Ordinary High Water Mark (OHWM) or floodway of Type S Water? If yes, check with the county or city to determine whether a substantial development permit is required under the local shorelines master plan.

i. ☐ No ☒ Yes Within 50 miles of saltwater AND you own more than 500 acres of forest land in Washington State? If yes, include Marbled Murrelet Form or attach/reference HCP prescriptions.

j. ☐ No ☒ Yes In or directly adjacent to a potential Channel Migration Zone (CMZ)? If yes, include CMZ Assessment Form. Attach/reference applicable HCP and/or Watershed Analysis prescriptions.

You are required to verify all waters within 200 feet of your proposed forest practices activities prior to submitting a Forest Practices Application / Notification. Use the Water Type Classification Worksheet and/or a Water Type Modification form to explain how you verified water types. See Water Typing Requirements in the instructions.

* * * * * If not working in or over typed Waters, skip to Question 16 * * * * *

Prior to answering Questions 12-15 in this section please refer to the Forest Practices Application Instructions and Forest Practices Board Manual Section 5.

12. Are you proposing any of the following projects NOT permitted by current HPAs from WDFW?
   a. No ☐ Yes Installing, replacing, or repairing a culvert at or below the bankfull width of Type S or F Water(s) that exceeds a five percent gradient?
   b. No ☐ Yes Constructing, replacing, or repairing a bridge at or below the bankfull width of unconfined streams in Type S or F Water(s)?
   c. No ☐ Yes Placing fill material within the 100-year flood level of unconfined streams in Type S or F Water(s)?

13. Have you consulted with DNR and/or WDFW about the proposed hydraulic project(s) in or over Type S or F Water? No ☐ Yes

14. If installing, replacing, removing, or maintaining structures in or over any typed Water, complete the table below. Provide crossing locations and identifiers on your Activity Map. Provide plan details in Question 28 or attach plan to the FPA/N. Type S and F Waters require detailed plan information. Complex hydraulic projects in Type N Waters may also be required per WAC 222-24-042(2). See instructions for detailed plan requirements.
<table>

</table>
20. Reforestation. Check all that apply:

☐ Planting. Tree Species: __________________________

☐ Natural. Include a Natural Regeneration Plan

☒ Not required because of one or more of the following:

☐ I am converting some or all of this land to non-forest land in the next 3 years or lands are exempted under WAC 222-34-050.

☐ Individual dead, dying, down, or wind-thrown trees will be salvaged.

☒ Trees are removed under a thinning program reasonably expected to maximize the long-term productivity of commercial timber.

☒ I am leaving at least 100 vigorous, undamaged, and well-distributed saplings or merchantable trees per acre.

☐ An average of 190 tree seedlings per acre are established on the harvest area and my harvest will not damage them.

☐ Road right-of-way or rock pit development harvest only.

** Do you own MORE than 80 acres of forest land in Washington? If yes, skip to Question 25 **

21. Are you using the exempt 20-acre parcel riparian management zone (RMZ) rule (WAC 222-30-023) on Type S, F, or Np Waters?

☐ No  Skip to Question 25.

☐ Yes  Continue to Question 22. See instructions for qualifications and information.

22. Choose the answer below that best fits your situation. Show all RMZs on the Activity Map.

☐ a. ALL of the following apply to me and my land: (If no, answer b.)

• Between June 5, 2006 and today’s date I have always owned less than 80 acres of forest land in Washington.

• Between June 5, 2006 and today’s date this parcel has always been 20 acres or less of contiguous ownership. See RCW 76.09.020 for definition of ‘contiguous’.

• Between June 5, 2006 and today’s date this parcel has always been owned by me or someone else that has owned less than 80 acres of forest land in Washington.

b. ONE OR MORE of the following apply to me and/or my land (check all that apply):

*If any of the statements below apply AND you use the exempt 20-acre parcel RMZ rule, you are NOT authorized under the State’s Incidental Take Permits (see explanation in FPA instructions under Question 22).*

☐ Between June 5, 2006 and today’s date I have owned more than 80 acres of forest land in Washington.

☐ Between June 5, 2006 and today’s date this parcel has been a part of more than 20 acres of contiguous ownership. See RCW 76.09.020 for definition of ‘contiguous’.

☐ Between June 5, 2006 and today’s date this parcel has been owned by someone that has owned more than 80 forested acres in Washington.
23. If harvesting within 115 feet of a Type S or F Water on an exempt 20-acre parcel, complete the table below. Show RMZs and stream segment identifiers on the Activity Map. If you are harvesting within 75 feet or within the maximum RMZ (whichever is less), stream shade must be assessed and met following harvest. Describe in Question 28 how stream shade was determined to be met, using the 'Appendix F. Stream Shade Assessment Worksheet' if necessary.

<table>
<thead>
<tr>
<th>Stream Segment Identifier (letter)</th>
<th>Water Type (S, F)</th>

<td></td>
<td></td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

24. Are you harvesting within 29 feet of a Type Np Water on an exempt 20-acre parcel?

☐ No  Skip to Question 27.

☐ Yes  See instructions and describe leave tree strategy in Question 28. Then skip to Question 27.

25. If harvesting within 200 feet of any Type S or F Water or periodically inundated areas of their associated wetlands, complete the table below. Include Desired Future Condition (DFC) for all inner zone harvests unless you have an HCP prescription. Show RMZs, CMZs, and stream segment identifiers on the Activity Map. If you are harvesting within 75 feet or within the maximum RMZ, whichever is less, stream shade must be assessed and met following harvest. Describe in Question 28 how stream shade was determined to be met or use the 'Appendix F. Stream Shade Assessment Worksheet' if necessary.

<table>
<thead>

</tr>
</thead>
</table>
27. How are the following currently marked on the ground? *(Flagging color, paint color, road, fence, etc.)*

Harvest/Salvage Boundaries: Pink 'Timber Harvest Boundary' flagging. See Alternate Plan

Clumped Wildlife Reserve Trees/Green Recruitment Trees: See Alternate Plan

Right-of-Way Limits/Road Centerlines: N/A

Stream Crossing Work: N/A

Riparian Management Zone Boundaries and Leave/Take Trees: See Alternate Plan

Channel Migration Zone: See CMZ Worksheet

Wetland Management Zone Boundaries and Leave/Take Trees: N/A

28. Additional Information (attach additional pages if necessary): For hydraulic projects in or over Type S, F, or complex N Water(s) see instructions for required plan information. If applicable, include mitigation measures from a geotechnical memo, letter, or report.

"Friendly THIN" FPA:

- An Alternate Plan is proposed for this FPA (See Attached).
- Stream typing was determined by field review on the dates of July 15, 2012 and January 22, 2019, and referencing RMAP records.
- All streams walked to top of channel.
- Equipment crossings at streams will utilize logs/slash to minimize soil disturbance. Materials will be pulled upon completion of harvest.
29. We acknowledge the following:
   - The information on this application/notification is true.
   - We understand this proposed forest practice is subject to:
     - The Forest Practices Act and Rules AND
     - All other federal, state or local regulations.
   - Compliance with the Forest Practices Act and Rules does not ensure compliance with the Endangered Species Act or other federal, state or local laws.
   - If we said that we would not convert the land to non-forestry use, the county or city may deny development permits on this parcel for the next 6 years.
   - The following may result in an unauthorized incidental take of certain endangered or threatened fish species:
     - Conversion of land to non-forestry use.
     - Harvesting within the maximum RMZ on a 20-acre exempt parcel that was acquired after June 5, 2006.
     - Equipment Crossings/Fords in or over Type S and F Waters.
   - Inadvertent Discovery – Chapters 27.44, 27.53, 68.50 and 68.60 RCW
     - If you find or suspect you have found an archaeological object or Native American cairn, grave, or glyptic record, immediately cease disturbance activity, protect the area and promptly contact the Department of Archaeology and Historic Preservation at 360 586-3077.
     - If you find or suspect you have found human skeletal remains, immediately cease disturbance activity, protect the area, and contact the County Coroner or Medical Examiner and local law enforcement as soon as possible. Failure to report human remains is a misdemeanor.

The landowner understands that by signing and submitting this FPA, he/she is authorizing the Department of Natural Resources to enter the property in order to review the proposal, inspect harvest operations, and monitor compliance for up to three years after its expiration date. RCW 76.09.150

*NOTE: If you are a "Perpetual Timber Rights Owner," and are submitting this without the Landowner’s Signature, provide written evidence the landowner has been notified.

Please make a copy of this FPA/N for your records. If this FPA/N contains a hydraulic project requiring WDFW concurrence review, it will not be available online for public review until after the WDFW concurrence review period.
Appendix E. CMZ Assessment Form

Section 23, 24, Township 28N, Range 08E

Complete and attach this informational form to your FPA/N if you answered 'Yes' to FPA Question 11j. Refer to Forest Practices Board Manual Section 2—Standard Methods for Identifying Bankfull Channel Features and Channel Migration Zones for guidance on evaluating Channel Migration Zones (forms within Forest Practices Board Manual 2 are optional).

Applicant Office Review:

1. Screening tools used: ☒ GIS ☒ Aerial Photo Years: 2009, '11, '13, '15, '17 ☒ LiDAR ☐ USGS Topographic Map
   ☐ Other (describe): Field Review on 1/22/2019

2. Are you aware of channel movement or did you observe obvious channel movement between aerial photograph years?
   ☒ No, continue to question 3 ☐ Yes, continue to question 5

3. Evaluate valley confinement using USGS topographic map(s) or aerial photographs.
   ☒ Valley floor is significantly wider than the channel. Channel migration may be occurring.
   ☐ Valley floor is very narrow, obviously less than twice as wide as the channel. If you can clearly see this circumstance on the aerial photographs, it is unlikely that channel migration is occurring.

4. Did you observe any of the following on the aerial photographs?
   ☐ Side Channels ☐ Large Gravel Bars ☐ Eroding Banks ☐ New Channels Occurring Between Photo Years (Avulsions)
   ☒ Multiple Channels (Braiding) ☐ Wood Jams ☐ High Sinuosity or Sharp Channel Bends

Field Review:

Date of field review: 1/22/2019

Person(s) that conducted field review: Josh Misener

Josh Misener District Forester

Name

Title/position

Name

Title/position

5. If CMZ is present check the component(s) present in your CMZ delineation.
   ☐ Avulsion hazard area ☐ Erosion hazard area (attach erosion rate calculations)

6. What was the distance of channel walked? What was the length of CMZ boundary delineated?
   Walked 1,600 feet of channel. CMZ boundary delineated is 1,240 feet.

Briefly describe how you determined a CMZ exists, how you delineated the outer edge of the CMZ, and how you marked the outer edge of the CMZ on the ground (flagging color, paint, etc.):

Aerial photo imagery and LiDAR images suggested that multiple stream beds existed in the area I designated as CMZ. Field review confirmed that old stream beds exist in the valley floor and the outer edge of the CMZ was marked with blue flagging. In some cases the banks an old stream bed marks the outer edge of the CMZ, in other cases it is the outer edge of the valley floor.
Forest Practices Application/Notification
Alternate Plan Form

This form provides an outline for preparing an Alternate Plan. Although not required, it will help you prepare your Alternate Plan. Include the completed form with your Forest Practices Application. Refer to Board Manual Section 21 for help in developing your alternate plan, or contact your DNR region office for assistance.

1. Current conditions and management goals:
   a) List the predominate tree species, average tree height and age; note excessive blowdown, fire damage, root rot or other forest health issues; describe topography.
   b) Describe the resource management goals you wish to achieve through this alternate plan.

Current conditions consist of a 29 year old Douglas-fir dominant stand. Average dbh ranges 10"-12" inches with heights ranging from ~60' to ~80'. The stand has an average of 325 conifer trees per acre, with an additional 60 trees per acre of red alder, maple and cherry mixed throughout the stand. There are no signs of excessive blowdown, fire damage, or other major forest health issues. Slopes in the units range from 0 to 40%. A large Channel Migration Zone (CMZ) surrounds most of the S-Type stream. The outer edge of this CMZ lies, on average, about 130 feet away from the active S-Type channel.

Management objectives include maximizing the growth of conifers on site by removing hardwoods, suppressed or defective trees, which will improve spacing of the existing stand. By conducting these operations to within 25' of the S-Type stream, F-Type stream, and/or the outer edge of the CMZ, it will better allow the riparian management zones to reach their desired future condition sooner than if they were left in the current condition. This will then allow these RMZ's to better perform their riparian functions.
2. **Proposed Management Activities**: Describe what activities will be conducted (example; harvest, tree planting, road construction, etc). Describe where, how, and when each activity will be conducted. 

   *NOTE: A representative sample of the proposed alternate plan area must be flagged on the ground for interdisciplinary team review.*

   Activities will include timber harvest of overstocked stands utilizing mechanized cut-to-length equipment. Commercial thinning activities will take place within the boundaries of unit 1 and unit 2, which are delineated with pink "Timber Harvest Boundary" flagging. Harvest prescription will involve individual tree selection that gives priority to harvest hardwoods first, thin from below second, and remove trees with log defect last. Overall target for harvest unit is 170 conifer trees per acre. Harvest buffers on all S-Type or F-Type streams will be variable-width buffers with a minimum buffer width of 25' from the CMZ outer edge or from Type-S or Type-F stream banks, whichever provides for the larger buffer. Where streambank integrity is a concern, additional trees will be left to increase stability. Dripline trees along the type Np stream are to be left unharvested. The majority of the thinning will be over 130' from the active S-Type stream channel. By thinning to within 25' of the RMZ it will better allow the RMZs to perform their functions for the reasons stated in this Alternate Plan. Depending on the hardwood component, log defect, and minor forest health issues, isolated areas may be reduced down to 120 trees per acre, but the overall target spacing for all areas in this FPA is 170 trees per acre. Operations are proposed to take place in 2019, or 2020 depending on markets, weather conditions, and other factors. Equipment will only travel on slopes of 40% or less. Trees on slopes of 40%-65% slopes may be harvested if they can be reached by equipment stationed on slopes of 40% or less.

3. **Describe how your proposed management activity would affect the alternate plan area**

   For activities in a riparian area:
   a) Describe the current level of large woody debris, shade, bank stability, sediment filtering and nutrient input.
   b) Explain the short and long term changes in the amount of large woody debris, shade, bank stability, sediment filtering and nutrient input from the current level. Be as specific as possible. See Board Manual Section 21

   The S and F streams have a solid component of riparian vegetation with vine maple, salmon berry, sword fern, and other herbaceous species. In these areas the slopes appear stable. There are approximately 325 trees per acre and frequently woody shrubs contributing to bank stability. Large woody debris of various sizes (<1"-48") is currently present and distributed throughout the riparian area. The majority of woody debris is legacy debris from historic operations. The riparian area currently experiences about 95% shade cover. The hardwood-dominated portion of the RMZ is not proposed for thinning and contains a 93% understory component of riparian vegetation (determined by 1/100th-acre fixed area vegetation cover plots), with vine maple, sword fern, and salmon berry dominating these areas. Conifer-dominant and densely-stocked areas within the core and inner zones of S-Type and F-Type RMZ's which are proposed for thinning, contain similar species, however there is only 45% understory cover average in these areas due to lack of sunlight. Understory cover and diversity is expected to increase after thinning and this is expected to improve the abundance and diversity of nutrient input.

   The large woody debris input will be relatively unaffected in the short term with likely a small increase in <5" diameter material from the commercial thinning operation. It is expected that the long term large woody debris will increase as a result of increased diameter growth in remaining timber. Short term stream shade impacts will be low as most of the buffer on the S and F streams is greater than 130'. A current shade percent of 95% was determined by averaging ten shade cover plots taken with a densiometer. The RMZ that has potential to be thinned will have at least 60% canopy closure remaining post-thinning. We anticipate shade will return to >90% within ten years of thinning. Long term shade is expected to be maintained or increase through the removal of hardwood and promoting growth of larger dominant conifer trees. Short and long term bank stability is not expected to change. Sediment filtering will likely recover from what minimal change will occur with harvest operations. It is expected that nutrient input in the short term will be slightly reduced, with an overall increase in the long term through increased growth of conifer trees and diversity of understory vegetation.
4. If you are planning activities in the riparian area, fill in the table below.

<table>
<thead>
<tr>
<th>Stream Segment Identifier</th>

5. Does this plan propose to remove hardwood trees within a riparian area in order to plant conifers?  
   No ☒ Yes ☐ If yes, describe the species to be planted. Include a schedule of brush control activities to ensure the planted trees will be vigorous and free to grow after three growing seasons.

6. List the specific parts of the Forest Practices Board Rules that the proposal departs from:  
   See Washington Forest Practices Board Rules at;  
   http://www.dnr.wa.gov/BusinessPermits/Topics/ForestPracticesRules

7. Attach map(s) (preferably 1" = 400’ scale) with updated stream locations, wetlands, unstable slopes and roads. Clearly designate proposed alternate plan area. The alternate plan area must also be shown on the forest practices activity map.

8. Attach information, such as a timber cruise, water type modification forms, technical field notes, literature references, etc., that support the alternate plan.

9. Small Forest Landowner Office Monitoring  
   The Small Forest Landowner Office (SFLO) is required to monitor small forest landowner alternate plans for cumulative effects.
   a) Does this alternate plan contain a monitoring strategy  
      □ Yes □ No If yes, please attach.
   b) May SFLO staff access the alternate plan site to conduct monitoring?  
      □ Yes □ No

Appendix E. CMZ Assessment Form

Section __23, 24______, Township ______28N______, Range ________08E______

Complete and attach this informational form to your FPA/N if you answered ‘Yes’ to FPA Question 11]. Refer to Forest Practices Board Manual Section 2—Standard Methods for Identifying Bankfull Channel Features and Channel Migration Zones for guidance on evaluating Channel Migration Zones (forms within Forest Practices Board Manual 2 are optional).

**Applicant Office Review:**

2. Are you aware of channel movement or did you observe obvious channel movement between aerial photograph years?
   - ☒ No, continue to question 3  ☐ Yes, continue to question 5

3. Evaluate valley confinement using USGS topographic map(s) or aerial photographs.
   - ☒ Valley floor is significantly wider than the channel. Channel migration may be occurring.
   - ☐ Valley floor is very narrow, obviously less than twice as wide as the channel. If you can clearly see this circumstance on the aerial photographs, it is unlikely that channel migration is occurring.

4. Did you observe any of the following on the aerial photographs?
   - ☐ Side Channels  ☐ Multiple Channels (Braiding)
   - ☒ Large Gravel Bars  ☐ Wood Jams
   - ☐ Eroding Banks  ☐ High Sinuosity or Sharp Channel Bends
   - ☐ New Channels Occurring Between Photo Years (Avulsions)

**Field Review:**

Date of field review: 1/22/2019

Person(s) that conducted field review:

<table>

</tr>
</tbody>
</table>

5. If CMZ is present check the component(s) present in your CMZ delineation.
   - ☐ Avulsion hazard area  ☐ Erosion hazard area (attach erosion rate calculations)

6. What was the distance of channel walked? What was the length of CMZ boundary delineated?
   - Walked 1,600 feet of channel. CMZ boundary delineated is 1,240 feet.

Briefly describe how you determined a CMZ exists, how you delineated the outer edge of the CMZ, and how you marked the outer edge of the CMZ on the ground (flagging color, paint, etc.):

Aerial photo imagery and LiDAR images suggested that multiple stream beds existed in the area I designated as CMZ. Field review confirmed that old stream beds exist in the valley floor and the outer edge of the CMZ was marked with blue flagging. In some cases the banks an old steam bed marks the outer edge of the CMZ, in other cases it is the outer edge of the valley floor.
Marbled Murrelet Form
Western Washington Forest Practices Application/Notification

Complete this form only if you are harvesting timber (including salvage) or constructing roads. Do not complete this form if you have an HCP for marbled murrelets.

Answer every question.

1. □ No □ Yes For this FPA/N, has a protocol survey(s) been completed that includes:
   - Harvest units (and within 300 ft on your ownership), or
   - Salvage units (and within 300 ft on your ownership), or
   - Any area of proposed road construction (and within 300 ft on your ownership)?

   If 'Yes', fill out the table and check the appropriate findings below.

Explanation:

2. □ No □ Yes □ Unknown Will you harvest, salvage, or construct roads within 0.25 miles of an occupied site?

3. □ No □ Yes □ Unknown Will you fly helicopter(s) over or within 0.25 miles of an occupied site?

4. □ No □ Yes Will you harvest live trees in a buffer of an occupied site?

   If Yes, describe the leave trees and buffer widths you will leave. NOTE: If you leave less than required in WAC 222-16-080(1) (j) (v) this is a Class IV-Special and an Environmental Checklist is required

Description of managed buffers:
5. [X] No  [ ] Yes  Are there nesting platforms within any harvest unit (including salvage and road construction) that are within 300 feet that:
   - Are not located within a surveyed area, and;
   - Have a minimum of 2 platforms per acre, and;
   - Are located within 7 or more acres of contiguous habitat, and;
   - Have a least 40% (number not volume) of the dominant and co-dominant trees made up of Douglas-fir, western hemlock, western red cedar, or Sitka spruce?

   If "Yes", complete the table below for those areas.

<table>
<thead>
<tr>
<th>Name or # (as shown on map) of delineated stands of contiguous habitat</th>
<th>Delineated stand acres</th>
<th>Nesting platforms per acre</th>
<th>Number of trees 32 inches dbh or greater with platforms</th>
<th>Platform Assessment Method</th>

Additional Comments for FPA 2816807 ‘Friendly THIN’

1) Total width of the RMZ for Streams S1 & F1 is 90’ and 140’ (See Attached Site Class Map).
2) For Question 6 of the Alternate Plan, please add the following to the list of ‘parts of the Forest Practices Board Rules that the proposal departs from:’
   a. WAC 222-30-021 (a) for Core Zone
   b. WAC 222-30-021 (b) for Inner Zone
3) Remove Stream ‘Np1’ from the list given for Question 26 of the main FPA Form. No timber harvest will occur within 50’ of Np1.
4) Add Stream segment Ns2. See Attached Map. See Attached Water Type Classification Worksheet

Issued in person: [ ] Landowner [ ] Timber Owner [ ] Operator By:
Appeal Information

You have thirty (30) days to appeal this Decision and any related State Environmental Policy Act determinations to the Pollution Control Hearings Board in writing at the following addresses:
Physical address: 1111 Israel Rd. SW, Ste 301, Tumwater, WA 98501
Mailing address: P.O. BOX 40903, OLYMPIA, WA 98504-0903
Information regarding the Pollution Control Hearings Board can be found at: http://www.eluho.wa.gov/
At the same time you file an appeal with the Pollution Control Hearings Board, also send a copy of the appeal to the Department of Natural Resources' region office and the Office of the Attorney General at the following addresses:

Office of the Attorney General
Natural Resources Division
1125 Washington Street SE
PO Box 40100
Olympia, WA 98504-0100

Department Of Natural Resources
Northwest Region
919 N Township Street
Sedro-Woolley, WA 98284

Other Applicable Laws

Operating as described in this application/notification does not ensure compliance with the Endangered Species Act, or other federal, state, or local laws.

Transfer of Forest Practices Application/Notification (WAC 222-20-010)

Use the “Notice of Transfer of Approved Forest Practices Application/Notification” form. This form is available at region offices and on the Forest Practices website: http://www.dnr.wa.gov/businesspermits/forestpractices. Notify DNR of new Operators within 48 hours.

Continuing Forest Land Obligations (RCW 76.09.060, RCW 76.09.070, RCW 76.09.390, and WAC 222-20-055)

Obligations include reforestation, road maintenance and abandonment plans, conversions of forest land to non-forestry use and/or harvest strategies on perennial non-fish habitat (Type Np) waters in Eastern Washington.

Before the sale or transfer of land or perpetual timber rights subject to continuing forest land obligations, the seller must notify the buyer of such an obligation on a form titled “Notice of Continuing Forest Land Obligation”. The seller and buyer must both sign the “Notice of Continuing Forest Land Obligation” form and send it to the DNR Region Office for retention. This form is available at DNR region offices.

If the seller fails to notify the buyer about the continuing forest land obligation, the seller must pay the buyer’s costs related to continuing forest land obligations, including all legal costs and reasonable attorneys’ fees incurred by the buyer in enforcing the continuing forest land obligation against the seller.

Failure by the seller to send the required notice to the DNR at the time of sale will be prima facie evidence in an action by the buyer against the seller for costs related to the continuing forest land obligation prior to sale.

DNR affidavit of mailing:

On this day 2/22/2019, I placed in the United States mail at Sedro-Woolley, WA, postage paid, a true and accurate copy of this document, Notice of Decision FPA # 2816807

Braelyn Hamilton

Subject: Request to withdraw FPA 2816807

Linda,

Please use this email as my official written request to withdraw FPA 2816638 (named “Friendly THIN”) from the application process.

I will plan to re-submit this proposal on 2/21/19 with the hopes that weather will allow us to review the site during the new review period.
