Culvert/Bridge Installation Narrative

SkyTrib Bridge Removal

Additional Information

Re-vegetation/Onsite Restoration Plan – All native vegetation cleared from the work site will be placed inside the RMZ on exposed soils and fill slopes. Logs cut from right-of-way will be placed in, over and/or near the stream as appropriate to maintain stream shade and large woody debris.

Dewatering Plan – The work will be done above the stream, but soil and wood may fall into the site. Tarping below the bridge will be done to capture falling material. If the falling material becomes too much to manage, sand bags and/or cofferdam will be placed in the stream to stop the flow of water into the work site. Either pumping or diverting will be done to direct the flow of water around the work area until the job is complete.

Plan for Fish Capture and Exclusion – Hand netting will be done to remove any remaining fish in the work site after the water is removed. A fish screen with maximum 1/16 in mesh size will be installed around the intake of the pump or inlet of diversion pipe.

Type of Material Used to Fill the Culvert – Bridge Removal, no fill.

Sediment or Erosion Control Measures – Exposed soils with potential to deliver sediment to the stream will be seeded and mulched.

Equipment to be Used – Excavator, crawler tractor, dump truck, and hand tools.

Waste area/s – The remaining rock on top of the stringers will be pulled back and used to create a undriveable water bar to prevent traffic from entering the site. The stringers will be spread out and allowed to decompose outside the stream channel adjacent to the worksite.

Transfer of Forest Practices Application/Notification (WAC 222-20-010)

Continuing Forest Land Obligations (RCW 76.09.060, RCW 76.09.070, RCW 76.09.390, and WAC 222-20-055)

Obligations include reforestation, road maintenance and abandonment plans, conversions of forest land to non-forestry use and/or harvest strategies on perennial non-fish habitat (Type Np) waters in Eastern Washington.

Before the sale or transfer of land or perpetual timber rights subject to continuing forest land obligations, the seller must notify the buyer of such an obligation on a form titled "Notice of Continuing Forest Land Obligation". The seller and buyer must both sign the "Notice of Continuing Forest Land Obligation" form and send it to the DNR Region Office for retention. This form is available at DNR region offices.

If the seller fails to notify the buyer about the continuing forest land obligation, the seller must pay the buyer's costs related to continuing forest land obligations, including all legal costs and reasonable attorneys' fees incurred by the buyer in enforcing the continuing forest land obligation against the seller.

Failure by the seller to send the required notice to the DNR at the time of sale will be prima facie evidence in an action by the buyer against the seller for costs related to the continuing forest land obligation prior to sale.
