3. Landownership information: See instructions

   a. ⬜No ☐Yes Are you a small forest landowner per RCW 76.09.450?
      If yes, continue to b.

   b. ☐No ☐Yes Is your entire proposed harvest area on a single contiguous ownership consisting of one or more parcel?

4. If you are harvesting timber, enter the Forest Tax Reporting Account Number of the Timber Owner:

   (PWLC) 800 060 314

   For tax reporting information or to receive a tax number, call the Department of Revenue at 1-800-548-8829.

5. Are you substituting prescriptions from an approved state or federal conservation agreement or watershed analysis?

   ⬜No ☐Yes Write ‘HCP’ or ‘Using Prescriptions’ in tables that apply. Attach or reference prescriptions and/or crosswalks on file at the Region office.
6. What is the legal description of your forest practices?

<table>
<thead>
<tr>
<th>Section</th>
<th>Township</th>
<th>Range</th>
<th>E/W</th>
<th>Tax Parcel Number</th>
<th>County</th>
</tr>
</thead>
<tbody>
<tr>
<td>34</td>
<td>27N</td>
<td>08</td>
<td>E</td>
<td>*Forest Land</td>
<td>Snohomish</td>
</tr>
</tbody>
</table>

7. When are you planning to begin work on the proposed activity?  
   Summer 2017

8. Is the taxpayer eligible for the EARR Tax Credit?  
   ☑ No  ☑ Yes

9. Have you reviewed this forest practices activity area to determine whether it may involve historic sites and/or Native American cultural resources? Read the instructions before answering this question.  
   ☑ No  ☑ Yes

10. Do you have a DNR approved Road Maintenance and Abandonment Plan (RMAP)?
   a. ☑ No  ☑ Yes  List the RMAP number: 240028
      If no, continue to b.
   b. ☑ No  ☑ Yes  Is a Checklist RMAP required (see instructions)?

11. Are there potentially unstable slopes or landforms in the area of your forest practices activity?  
    ☑ No  ☑ Yes – attach Slope Stability Informational Form. If applicable, attach geotechnical report, the SEPA Environmental Checklist, HCP, or Watershed Analysis prescriptions.

12. Are there potentially unstable slopes or landforms around the area of your forest practices activity?  
    ☑ No  ☑ Yes – attach Slope Stability Informational Form. If applicable, attach geotechnical report, HCP, or Watershed Analysis prescriptions.

13. Is this forest practice application/notification (answer every question):
   a. ☑ No  ☑ Yes  Within city limits or inside an urban growth area? If yes, see instructions for additional required documents.
   b. ☑ No  ☑ Yes  For road work that is included in an approved Road Maintenance and Abandonment Plan (RMAP)?
   c. ☑ No  ☑ Yes  Within a public park? If yes, include SEPA Environmental Checklist or SEPA Determination - except for harvest/salvage of less than 5,000 board feet within a developed public park.
   d. ☑ No  ☑ Yes  Within 500 feet of a public park? Park name: ____________________________
   e. ☑ No  ☑ Yes  In an approved Conversion Option Harvest Plan (COHP) from the local government? If yes, include a copy. This only applies to proposals within urban growth areas.
   f. ☑ No  ☑ Yes  Within 200' of the Ordinary High Water Mark (OHWM) or floodway of Type S water? If yes, check with the county or city to determine whether a substantial development permit is required under the local shorelines master plan.
   g. ☑ No  ☑ Yes  A request for a multi-year permit? If yes, length requested: ☑ 4 years or ☑ 5 years. Not everyone qualifies for a multi-year permit. See instructions for details.
h. ☒ No ☐ Yes An Alternate Plan? If yes, include a copy.

i. ☐ No ☒ Yes Within 50 miles of saltwater and do you own more than 500 acres of forest land in Washington State? If yes, include Marbled Murrelet Form or attach/reference HCP prescriptions.

j. ☒ No ☐ Yes In or directly adjacent to a potential Channel Migration Zone (CMZ)? If yes, include CMZ Assessment Form. Attach/reference applicable HCP and/or Watershed Analysis prescriptions.

**** If not working in or over typed waters, skip to Question 18 ****

You are required to verify Type Np and Ns water types within 200 feet of your proposed forest practices activities prior to submitting a Forest Practices Application / Notification. Use the Additional Information section, additional pages, the Water Type Classification Worksheet, and/or a Water Type Modification form to explain how you verified water types. See Water Typing Requirements in the instructions.

Prior to answering Questions 14-17 in this section please refer to the Forest Practices Application Instructions and Forest Practices Board Manual Section 5.

14. Are you proposing any of the following projects NOT permitted by current HPAs from WDFW?

   a. ☒ No ☐ Yes Installing, replacing, or repairing a culvert at or below the bankfull width of Type S or F water(s) that exceeds a five percent gradient?

   b. ☒ No ☐ Yes Constructing, replacing, or repairing a bridge at or below the bankfull width of unconfined streams in Type S or F water(s)?

   c. ☒ No ☐ Yes Placing fill material within the 100-year flood level of unconfined streams in Type S or F water(s)?

15. Have you consulted with DNR and/or WDFW about the proposed hydraulic project(s) in or over Type S or F water? ☒ No ☐ Yes

16. If installing, replacing, removing, or maintaining structures in or over any typed water, complete the table below. Type S and F waters require detailed plan information. Provide plan details in Question 31 or attach plan to the FPA/N. Provide crossing locations and identifiers on your Activity Map. A detailed plan with profiles may also be required for more complex hydraulic projects in Type N Waters per WAC 222-24-042(2).

<table>

22. Reforestation. Check the appropriate box(es).

☒ Planting. Tree Species: Ponderosa or other native conifer
☐ Natural. Include a Natural Regeneration Plan
☐ Not required because of one or more of the following:
☐ I am converting some or all of this land to non-forest land in the next 3 years or lands are exempted under WAC 222-34-050.
☐ Individual dead, dying, down, or wind-thrown trees will be salvaged.
☐ Trees are removed under a thinning program reasonably expected to maximize the long-term productivity of commercial timber.
☐ I am leaving at least 100 vigorous, undamaged, and well-distributed saplings or merchantable trees per acre.
☐ An average of 190 tree seedlings per acre are established on the harvest area and my harvest will not damage it.
☐ Road right-of-way or rock pit development harvest only.

**** If you own MORE than 80 forested acres in Washington, skip to Question 27 ****

23. Are you using the exempt 20-acre parcel riparian management zone (RMZ) rule on type S, F, or Np waters?
☐ No  If no, continue to Question 27.
☐ Yes  If yes, continue to Question 24.  See instructions for qualifications and information.

24. Choose the answer below that best fits your situation. Show all RMZs on the Activity Map.
☐ a. ALL of the following apply to me and my land: (If no, answer b.)
   - Between June 5, 2006 and today's date I have always owned less than 80 acres of forestland in Washington.
   - Between June 5, 2006 and today's date this parcel has always been 20 acres or less of contiguous ownership. See RCW 76.09.020 for definition of 'contiguous'.
   - Between June 5, 2006 and today's date this parcel has always been owned by me or someone else that has owned less than 80 acres of forestland in Washington.
b. ONE OR MORE of the following apply to me and/or my land (check all that apply):

☐ I currently own more than 80 acres of forestland in Washington.

☐ Between June 5, 2006 and today's date I have owned more than 80 acres of forestland in Washington.

☐ Between June 5, 2006 and today's date this parcel has been a part of more than 20 acres of contiguous ownership. See RCW 76.09.020 for definition of 'contiguous'.

☐ Between June 5, 2006 and today's date this parcel has been owned by someone that has owned more than 80 forested acres in Washington.

If any of the statements in (b) above apply AND you use the 20-acre exempt RMZ rule, you are NOT authorized under the State’s Incidental Take Permits (see explanation in FPA instructions under Questions 24).

25. If harvesting within 115 feet of a Type S or F water on an exempt 20-acre parcel, complete the table below. Show RMZs and stream segment identifiers on the Activity Map. If you are harvesting within 75 feet or within the maximum RMZ (whichever is less), stream shade must be assessed and met following harvest. Describe how stream shade was determined to be met, using the ‘Stream Shade Assessment Worksheet’ if necessary.

<table>
<thead>
<tr>
<th>Stream Segment Identifier (letter)</th>
<th>Water Type (S, F)</th>
<th>Segment Length (feet)</th>
<th>Bankfull Width (feet)</th>
<th>Maximum RMZ Width (feet)</th>
<th>Are you harvesting within the maximum RMZ? (Y or N)</th>
</tr>

<td></td>
</tr>
<tr>
<td></td>
<td></td>
<td></td>
<td></td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

26. Are you harvesting within 29 feet of a Type Np water on a 20-acre exempt parcel?

☐ No  Continue to Question 29.

☐ Yes  See instructions and describe leave tree strategy in Question 31. Then continue to Question 29.

27. If harvesting within 200 feet of any of Type S or F water, complete the table below. Include DFC for all inner zone harvests unless you have an HCP prescription. Show RMZs, CMZs, and stream segment identifiers on the Activity Map. If you are harvesting within 75 feet or within the maximum RMZ (whichever is less), stream shade must be assessed and met following harvest. Describe how stream shade was determined to be met, using the ‘Stream Shade Assessment Worksheet’ if necessary.

<table>
<thead>
<tr>
<th>Stream Segment Identifier (letter)</th>
<th>Water Type (S or F)</th>

</thead>
<tbody>
<tr>
<td>D (system)</td>
<td>5726'</td>
<td>2577' (45%)</td>
</tr>
</tbody>
</table>

29. How are the following marked on the ground? *(Flagging, paint, road, fence, etc.)*

- Harvest Boundaries: Orange Timber Harvest Boundary (T.H.B.) Ribbon, Roads or non-merchant timber type
- Clumped Wildlife Reserve Trees/Green Recruitment Trees: Orange Paint or Orange T.H.B
- Right-of-way limits/road centerlines: Blue Ribbon and Paints / Pink with Blue & White Stripe Ribbon
- Stream Crossing Work: Pink with Blue & White Stripe Ribbon
- Riparian Management Zone Boundaries and Leave/Take Trees: Orange T.H.B & Paint on Leave Trees
- Channel Migration Zone: na
- Wetland Management Zone Boundaries and Leave/Take Trees: Lime Green ribbon, same as Orange T.H.B.

30. Are you converting the land to non-forestry use within 3 years of harvest?
   - □ No □ Yes  If yes, include your SEPA Determination and/or SEPA checklist.

31. Additional Information (attach additional pages if necessary): *For hydraulic projects in or over Type S, F, or complex N water(s) see instructions for required plan information.*

   - Unit Number-Name: TW0503 "Sister Pit"
   - Notice: Anyone with a legitimate, specific interest in reviewing this FPA must contact the Office or Forester for access. This extra control is for the safety and protection of everyone on private timberlands.

   - Cultural Resources: GLO survey records from lots 1800's indicate a 125' waterfall on "Youngs River" to the south of unit. No known issues in or near unit. No field evidence of cultural resources was observed within the proposed harvest unit boundaries. In the event of a significant inadvertent discovery, operations will be suspended while appropriate agencies are notified.

   - Owls & Marbled Murrelet: No known Owl or Murrelet issues.

   - Watershed Analysis Unit: NA

   - Streams & Wetlands: Approved DNR stream survey NW-07-10-0010 confirms non-fish status. NW07YY0053 supports Np/Ns breaks made during field layout.

   - Soils and Slope Stability: DNR maps indicate GETCHELL-OSO-ROCK OUTCROP-COMPLEX from VOLC. ASH AND GLACIAL DRIFT OVER BASIC IGNEOUS BEDROCK. No DNR identified landslide hazard zones. Potentially unstable areas have been flagged out of the unit. Soils with potentially high compaction and erosion can create difficult soil conditions for forest operations. Limit operations to relatively dry seasons when possible.

   - Road Construction and Water Crossings: Construction of short spurs over Np streams. Culvert sizing based on stream channel widths and basin size calculations. Basin mean annual precipitation at 75 inches (USGS). Basin size: D7=134 ac, D6=61ac, D5=37ac, D4=35ac. After successful planting is verified and prior to expiration of FPA, landowner/operator reserves the option to remove and pull back culvert fill slopes at 2:1 with straw or grass seed on exposed soils for erosion control.

   - Timber Harvest: Limit ground based operations, where possible, to relatively dry seasons from late spring to fall. Fall & yard away from un-buffered stream sections.

   - Green-Up: Less than 120 contiguous acres surrounded by trees 4 feet or 5 years.
32. We acknowledge the following:

- The information on this application/notification is true.
- We understand this proposed forest practice is subject to:
  o The Forest Practices Act and Rules AND
  o All other federal, state or local regulations.
- Compliance with the Forest Practices Act and Rules does not ensure compliance with the Endangered Species Act or other federal, state or local laws.
- If we said that we would not convert the land to non-forestry use, the county or city may deny development permits on this parcel for the next 6 years.
- The following may result in an unauthorized incidental take of certain endangered or threatened fish species:
  o Conversion of land to non-forestry use.
  o Harvesting within the maximum RMZ on a 20-acre exempt parcel that was acquired after June 5, 2006.
  o Equipment Crossings/Fords in or over Type S and F Waters.
- Inadvertent Discovery – Chapters 27.44, 27.53, 68.50 and 68.60 RCW
  o If you find or suspect you have found an archaeological object or Native American cairn, grave, or glyptic record, immediately cease disturbance activity, protect the area and promptly contact the Department of Archaeology and Historic Preservation at 360 586-3077.
  o If you find or suspect you have found human skeletal remains, immediately cease disturbance activity, protect the area, and contact the County Coroner or Medical Examiner and local law enforcement as soon as possible. Failure to report human remains is a misdemeanor.

The landowner understands that by signing and submitting this FPA, he/she is authorizing the Department of Natural Resources to enter the property in order to review the proposal, inspect harvest operations, and monitor compliance for up to three years after its expiration date. RCW 76.09.150

*NOTE: If you are a “Perpetual Timber Rights Owner,” and are submitting this without the Landowner’s Signature, provide written evidence the landowner has been notified.

Please make a copy of this FPA/N for your records. If this FPA/N contains a hydraulic project requiring WDFW concurrence review, it will not be available online for public review until after the WDFW concurrence review period.
TW0503 "Sister Pit"

Equipment Crossings on Type Np/Ns Streams

When installing culverts for haul road construction in flowing Np or Ns streams, water will be diverted or pumped around crossing location prior to working or placing culvert in wetted channel.

When utilizing stream crossings across Type Np or Ns waters with ground based logging equipment logs and/or slash will be placed in the stream channel to minimize disturbance to the stream bed and banks. Logs will be skidded across the stream at right angles to the channel, as much as is reasonably possible. Upon completion of yarding activity utilizing the crossing, logs and/or slash placed in the channel shall be removed. Slash will be placed on exposed soil within thirty (30) feet of the crossing.

Where the use of a culvert is warranted, the culvert will be placed in the stream channel at the proposed crossing location. The culvert will be armored with logs and/or slash to protect the integrity of the culvert and to provide protection to the stream bed and banks. Upon completion of yarding activity utilizing the crossing, the culvert, logs and/or slash placed in the channel shall be removed.

Straw and/or grass seeding may be used as mitigation if substantial disturbance is noted at the stream crossing location.

Suspending Cables over Type Np/Ns Streams

Where suspending cables over Type Np and Ns waters is required, care shall be taken when changing tailholds over buffered portions of these waters. The lines shall be moved over and around leave trees and vegetation prior to re-tightening and tailholds shall be of sufficient height to minimize damage to riparian vegetation.

Cable Yarding Across Type Np and Ns Streams

Where cable yarding is required across Type Np and Ns waters, timber will be felled and yarded away from the stream channel and the number of yarding roads will be minimized, as much as is reasonably possible. At a minimum, lead end suspension of the logs being yarded will be required.

Where downhill yarding is required, lead end suspension may not be feasible.
Road Construction Notes

TW0503 “Sister Pit”

Total Stations: 17+04

Landings: (Green o/x) 3 each @ 40’x 40’ minimum.

Turn Outs: As needed

Road # 21720

Station/Comments

Starts at junction of 21700 road in pit entrance. Open/Reconstruct ~4+04 feet of existing Grade
0+00 Begin new construction at D4 stream crossing – Install 36” culvert
4+04 End Reconstruction/Shovel Landing.

Road # 21721

Station/Comments

0+00 Start New construction at Junction with 21700 below stockpile pit – 50’ switchback
1+20 Install 48” culvert at D6 stream crossing
2+00 No side Cast on slopes over 60%
3+90 Install 36” culvert
5+90 End New Construction/Cable Landing.

Road # 21740

Station/Comments

Begin re-open/maintenance at junction 21700 & 21740 ~ 1450 feet of maintenance.
0+00 Start Re-construction at un-named logging spur.
5+45 Install 60” culvert at D7 stream crossing
5+70 Begin New construction of stub spur out of RMZ
7+10 End New Construction/Cable Landing.

Road “Decommission” of spur Roads # 21720, # 21721 & 21740 as described above.

Comments

After successful planting is verified and prior to expiration of FPA, landowner/operator reserves the option to “Decommission” the spurs inside the unit by removing and pull back all culverts and culvert fill slopes will be pulled back at 2:1 with straw or grass seed on exposed soils for erosion control.
Existing road surface will be water-barred on each side of removed culverts and periodically as needed to direct any residual ditch water away from streams and onto forest floor.

Water bars and large boulders will be placed in a manner to prohibit vehicular access to "Decommissioned" sections of road.

Source:
Appendix D. Slope Stability Informational Form

Complete and attach this form to your FPA if you answered ‘Yes’ to FPA Question 11 or 12. Refer to WAC 222-16-050(1)(d) and Forest Practices Board Manual Section 16—Guidelines for Evaluating Potentially Unstable Slopes for definitions and descriptions of potentially unstable slopes or landforms.

1. What screening tools were used? ☑ Aerial Photo. ☑ LiDAR. ☑ Landslide Inventory, ☑ Landslide Hazard Zone Polygon, ☐ GIS/Other (describe):

2. Were there any features identified using the screening tools in #1 that did not exist in the field? If yes, describe:

Yes: The area around stream D1 appears to be somewhat convergent from the contours and LiDAR. In reality, on the ground, it is a small, short cliff band with no strongly convergent features.

3. a. What potentially unstable slopes or landforms were identified in the area of your forest practices activity?
Check all that apply:
☐ Inner Gorge ☐ Groundwater recharge areas for glacial deep-seated landslides
☐ Bedrock Hollow ☐ Convergent Headwall ☐ Toe of deep-seated landslide
☐ Outer edges of meander bends
☐ Other (Deep-seated landslides or other features of potentially unstable slopes). Describe:
None

b. What activities may occur in potentially unstable slopes or landforms? Check all that apply:
☐ Timber harvest ☐ Road construction ☐ Suspending cables ☐ Yarding ☐ Tailholds

4. a. What potentially unstable slopes or landforms were identified around the area of your forest practices activity?
Check all that apply:
☒ Inner Gorge ☐ Groundwater recharge areas for glacial deep-seated landslides
☐ Bedrock Hollow ☐ Convergent Headwall ☐ Toe of deep-seated landslide
☐ Outer edges of meander bends
☐ Other (Deep-seated landslides or other features of potentially unstable slopes). Describe:

b. What activities may occur around potentially unstable slopes or landforms? Check all that apply:
☒ Timber harvest ☒ Road construction ☒ Suspending cables ☒ Yarding ☒ Tailholds

For use with FPA/N dated 6/1/2016 or later
5. If any features identified in #3.a. and/or #4.a. were bounded out, describe the manner in which the boundary was determined:

Generally along the western portions of stream D (system) the strongly convergent slopes over 70% were flagged out at a significant break in slope.

6. Were areas of public use (which may include, but are not limited to: public roads, utilities, designated recreation areas, occupied structures, etc.) identified in or around the area of your proposed forest practices activity? Show these locations on the map in #8.

Youngs Creek hydroelectric pen-stock is located ~2000 feet downstream of unit. Pen-stock is integrated into bridge design suspended over stream. Shallow rapid events would not likely impact this structure.
The powerhouse, owned & operated by Snohomish County PUD, is located on the north bank approximately 2.7 miles down stream.
The closest occupied residence appears to be approximately 6.9 miles downstream in the vicinity of Ben Howard Road and Cedar Ponds Road.
There is significant run-out dissipation distance between this unit and any occupied structure.

Person(s) that conducted field review: Grady Steere Forster / Campbell Global

Name Title/position

Name Title/position

8. Show all field reviewed areas for potentially unstable slopes or landforms on a map (may use a forest practices activity map, harvest map or GIS map – See example below). Show locations where areas of public use exist. This map is intended to be developed by the field practitioner.
Hydroelectric Penstock downstream ~2000 feet
Penstock integrated into bridge design
Powerhouse downstream ~ 2.7 miles
Appendix A. Western Washington Water Type Classification Worksheet

Stream/Segment ID: D (System) Stream/Segment ID: D1, D2, D3 Stream/Segment ID: 

Date Observed: 6/14/15, 9/11/15 Date Observed: 8/20/01, 9/11/15 Date Observed: 

1. Do you have a protocol survey? (See the Board Manual Section 13) Or, does the stream have waiver characteristics? (See WAC 222-16-031(3) (b) (iii))
   [ ] No. Continue. [x] Yes. Attach documentation or approved WTMF number: NW-07-10-0010
   [ ] Fish found. Stop. [x] No fish found. Go to 6.

2. Were fish observed or are fish known to use the stream any time of the year?

3. Is there an impoundment (ponded water) upstream of the assessed segment, that is greater than .5 acres?

4. Are there segments within or above the assessed portion of the stream where the average BFW is two feet or greater? AND the average stream gradient is less than or equal to 16%?

5. Are there segments within or above the assessed portion of the stream where the average BFW is two feet or greater? AND the average stream gradient is between 16% and 20%? AND, the contributing basin to the stream is greater than 50 acres?

6. Does the stream segment contain water at all times during a normal rainfall year?

7. Is the stream segment downstream of a perennial source of water?

8. Is the stream physically connected by an above-ground channel to Type S, F, or Np water?
   [ ] Yes, Type Ns water. Stop. [x] Yes, Type Ns water. Stop. [ ] Yes, Type Ns water. Stop. [x] No, non-typed water. [ ] Yes, Type Ns water. Stop. [x] No, non-typed water.

9. Describe how you determined the uppermost point of perennial flow. Include a description of its location and show the point on a map (Use a separate piece of paper if necessary).

Stream/Segment ID ALL Description:

Walk streams to measure channel and observe flow conditions. Approved DNR stream survey NW-07-10-0010 confirms non-fish status. NW07YY0053 supports Np/Ns breaks made during field layout.

6/1/2016
Marbled Murrelet Form
Western Washington Forest Practices Application/Notification

*Complete this form only if you are harvesting timber (including salvage) or constructing roads.*
*Do not complete this form if you have an HCP for marbled murrelets.*

Answer every question.

1. ☒ No ☐ Yes  For this FPA/N, has a protocol survey(s) been completed that includes:
   - Harvest units (and within 300 ft on your ownership), or
   - Salvage units (and within 300 ft on your ownership), or
   - Any area of proposed road construction (and within 300 ft on your ownership)?

   If "Yes", fill out the table and check the appropriate findings below.

<table>
<thead>
<tr>
<th>Survey ID (Name or Unit #)</th>
<th>Township, Range, &amp; Section</th>
<th>Survey was approved by WDFW (Attach approval letter from WDFW)</th>
<th>Survey was disapproved by WDFW and is being resubmitted with this FPA/N (Explain below)</th>
<th>Survey has been submitted to WDFW and survey approval is unknown (Explain below)</th>
<th>Survey is complete but has not yet been submitted to WDFW (Submit survey with FPA/N)</th>
</tr>
</thead>
<tbody>
<tr>
<td>☐ Occupancy</td>
<td>☐ Presence</td>
<td>☐ Occupancy</td>
<td>☐ Occupancy</td>
<td>☐ Occupancy</td>
<td>☐ Occupancy</td>
</tr>
<tr>
<td>☐ No Detections</td>
<td></td>
<td>☐ Presence</td>
<td>☐ Presence</td>
<td>☐ Presence</td>
<td>☐ Presence</td>
</tr>
<tr>
<td></td>
<td></td>
<td>☐ No Detections</td>
<td>☐ No Detections</td>
<td>☐ No Detections</td>
<td>☐ No Detections</td>
</tr>
</tbody>
</table>

Explanation:

2. ☒ No ☐ Yes ☐ Unknown  Will you harvest, salvage, or construct roads within 0.25 miles of an occupied site?

3. ☒ No ☐ Yes ☐ Unknown  Will you fly helicopter(s) over or within 0.25 miles of an occupied site?

4. ☒ No ☐ Yes            Will you harvest *live* trees in a buffer of an occupied site?

   If Yes, describe the leave trees and buffer widths you will leave.
   *NOTE: If you leave less than required in WAC 222-16-080(1) (h) (v) this is a Class IV-Special and an Environmental Checklist is required*

Description of managed buffers:
5. No Yes Are there nesting platforms within any harvest unit (including salvage and road construction) that are within 300 feet that:
   - Are not located within a surveyed area, and;
   - Have a minimum of 2 platforms per acre, and;
   - Are located within 7 or more acres of contiguous habitat, and;
   - Have a least 40% (number not volume) of the dominant and co-dominant trees made up of Douglas-fir, western hemlock, western red cedar, or Sitka spruce?

If “Yes”, complete the table below for those areas.

<table>
<thead>
<tr>
<th>Name or # (as shown on map) of delineated stands of contiguous habitat</th>
<th>Delineated stand acres</th>
<th>Nesting platforms per acre</th>
<th>Number of trees 32 inches dbh or greater with platforms</th>
<th>Platform Assessment Method</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td></td>
<td></td>
<td></td>
<td>Field Sampling Method, Sample Plot Method, 100% Cruise Method, Inventory Model Method, or Other</td>
</tr>
<tr>
<td></td>
<td></td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td></td>
<td></td>
<td></td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

6. No Yes Are there areas within this forest practice or within 300 feet that:
   - Are not surveyed, and;
   - Are not listed in question 5, and;
   - Have trees that are at least 32 inches dbh

If “Yes”, list the forest practice unit numbers from your activity map. Provide brief description of current stand conditions. Such as tree species composition, stand age (if known), and maximum tree size (dbh).

Harvest Unit #(s) □ Within the Unit □ Within 300 feet of the Unit

Description:

Harvest Unit #(s) □ Within the Unit □ Within 300 feet of the Unit

Description:

Harvest Unit #(s) □ Within the Unit □ Within 300 feet of the Unit

Description:

7. If you answered yes to question 1, 4, or 5, include a map (separate from your map that shows your harvest units and/or road construction) See the instructions for the information required on each map.

Forest Practices Application/Notification
Notice of Decision

Decision
[ ] Notification Operations shall not begin before the effective date.
[ ] Approved This Forest Practices Application is subject to the conditions listed below.
[ ] Disapproved This Forest Practices Application is disapproved for the reasons listed below.
[ ] Closed Applicant has withdrawn FPA/N.

FPA/N Classification
[ ] Class II [ ] Class III [ ] Class IVG [ ] Class IVS

Number of Years Granted on Multi-Year Request
[ ] 4 years [ ] 5 years

Conditions on Approval / Reasons for Disapproval
No additional conditions.

FOR YOUR INFORMATION:

Please notify DNR Northwest Region Office (360-856-3500) 48 business hours before commencing timber harvest operations. Please provide the application number and legal description for your operation.

Issued By:  

Steven Huang  

Title: Skykomish Forest Practice Forester

Washington State Department of Natural Resources • Notice of Decision • August 5, 2013
Appeal Information

You have thirty (30) days to appeal this Decision and any related State Environmental Policy Act determinations to the Pollution Control Hearings Board in writing at the following addresses:
Physical address: 1111 Israel Rd. SW, Ste 301, Tumwater, WA 98501
Mailing address: P.O. BOX 40903, OLYMPIA, WA 98504-0903
Information regarding the Pollution Control Hearings Board can be found at: http://www.eluho.wa.gov/
At the same time you file an appeal with the Pollution Control Hearings Board, also send a copy of the appeal to the Department of Natural Resources' region office and the Office of the Attorney General at the following addresses:

Office of the Attorney General
Natural Resources Division
1125 Washington Street SE
PO Box 40100
Olympia, WA 98504-0100

Department Of Natural Resources
Northwest Region
And
919 N Township St
Sedro-Woolley WA 98284

Other Applicable Laws

Operating as described in this application/notification does not ensure compliance with the Endangered Species Act, or other federal, state, or local laws.

Transfer of Forest Practices Application/Notification (WAC 222-20-010)

Use the "Notice of Transfer of Approved Forest Practices Application/Notification" form. This form is available at region offices and on the Forest Practices website: http://www.dnr.wa.gov/businesspermits/forestpractices. Notify DNR of new Operators within 48 hours.

Continuing Forest Land Obligations (RCW 76.09.060, RCW 76.09.070, RCW 76.09.390, and WAC 222-20-055)

Obligations include reforestation, road maintenance and abandonment plans, conversions of forest land to non-forestry use and/or harvest strategies on perennial non-fish habitat (Type Np) waters in Eastern Washington.

Before the sale or transfer of land or perpetual timber rights subject to continuing forest land obligations, the seller must notify the buyer of such an obligation on a form titled "Notice of Continuing Forest Land Obligation". The seller and buyer must both sign the "Notice of Continuing Forest Land Obligation" form and send it to the DNR Region Office for retention. This form is available at DNR region offices.

If the seller fails to notify the buyer about the continuing forest land obligation, the seller must pay the buyer's costs related to continuing forest land obligations, including all legal costs and reasonable attorneys' fees incurred by the buyer in enforcing the continuing forest land obligation against the seller.

Failure by the seller to send the required notice to the DNR at the time of sale will be prima facie evidence in an action by the buyer against the seller for costs related to the continuing forest land obligation prior to sale.
