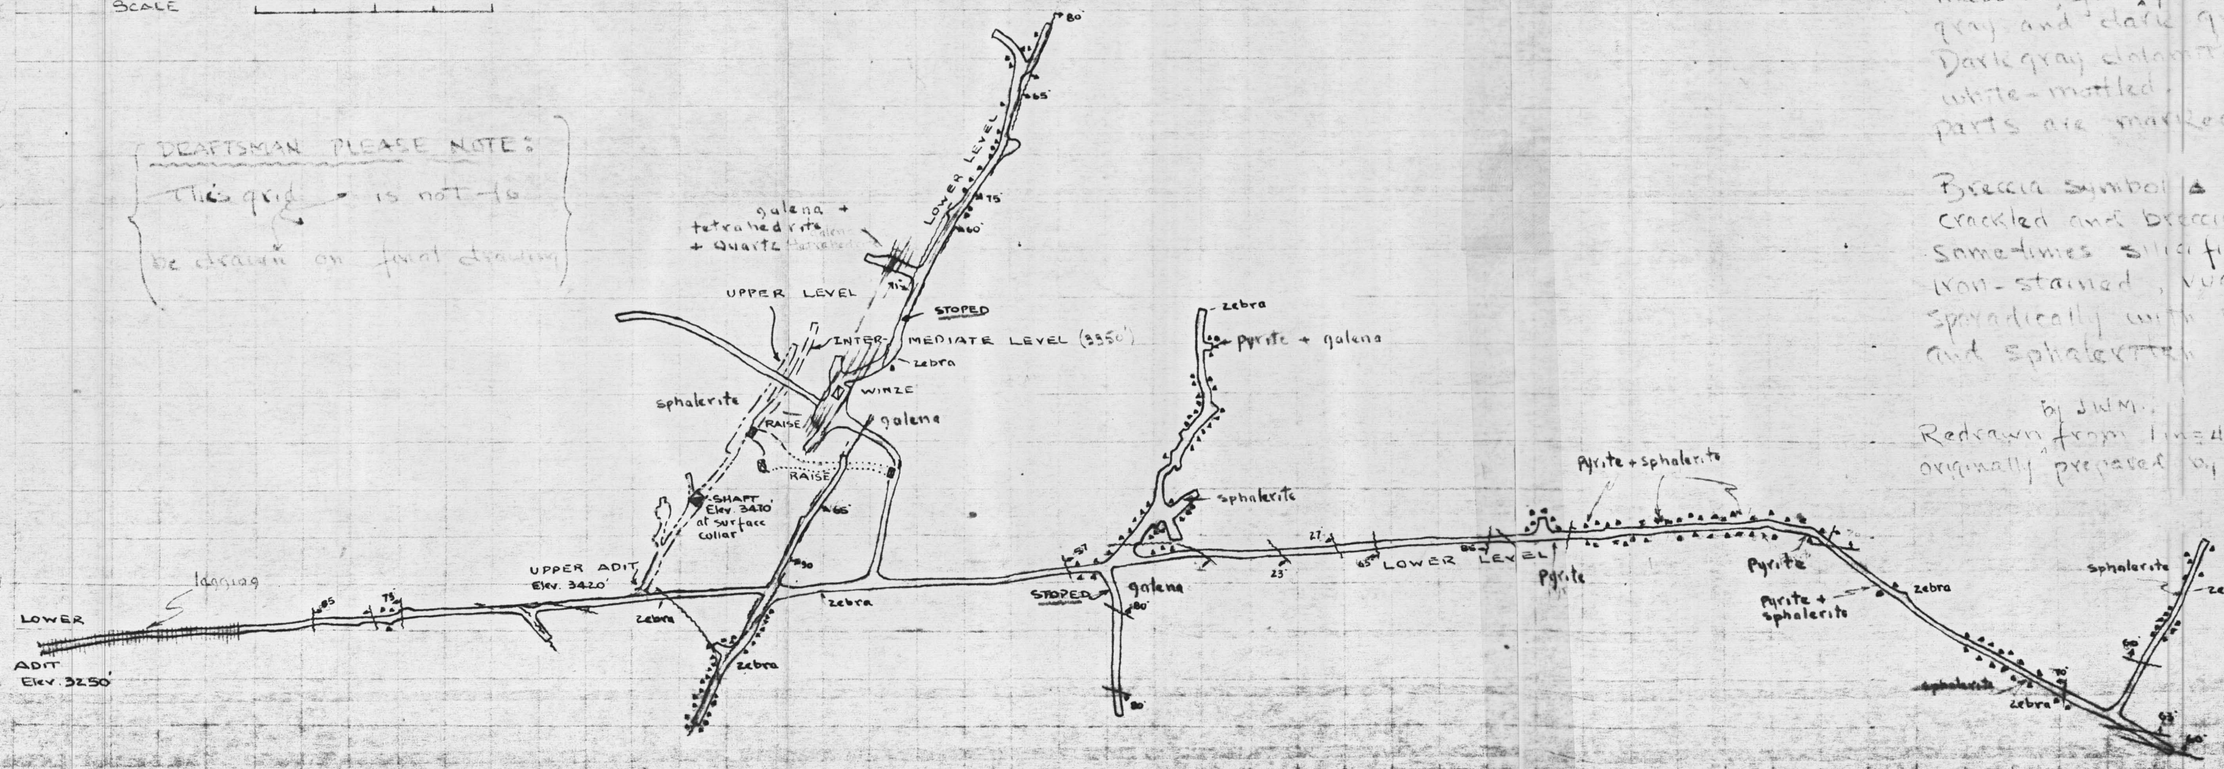
CHLORIDE QUEEN MINE — PLAN OF LOWER, INTERMEDIATE AND UPPER LEVELS



Geology shown only for Lower Level. Geology by C.P. Ruedy, Div. Mines and Geology

All rock except where noted is massive, fine grained, medium light gray and dark gray dolomite. Dark gray dolomite is commonly white-mottled. Highly banded parts are marked "zebra"

Breccia symbol ▲ indicates crackled and brecciated dolomite, sometimes silicified, commonly iron-stained, vuggy, mineralized sporadically with Pyrite, galena and sphalerite.
