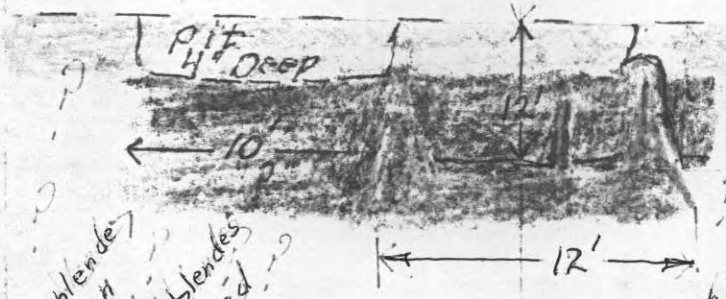
Rhyolite in little Grande cr. 1 Mile Wide
SEC. 19

North

Pit 12' Deep to Mineralized rock, Hornblende has been completely changed. No. Mineralized Pod reaches the surface



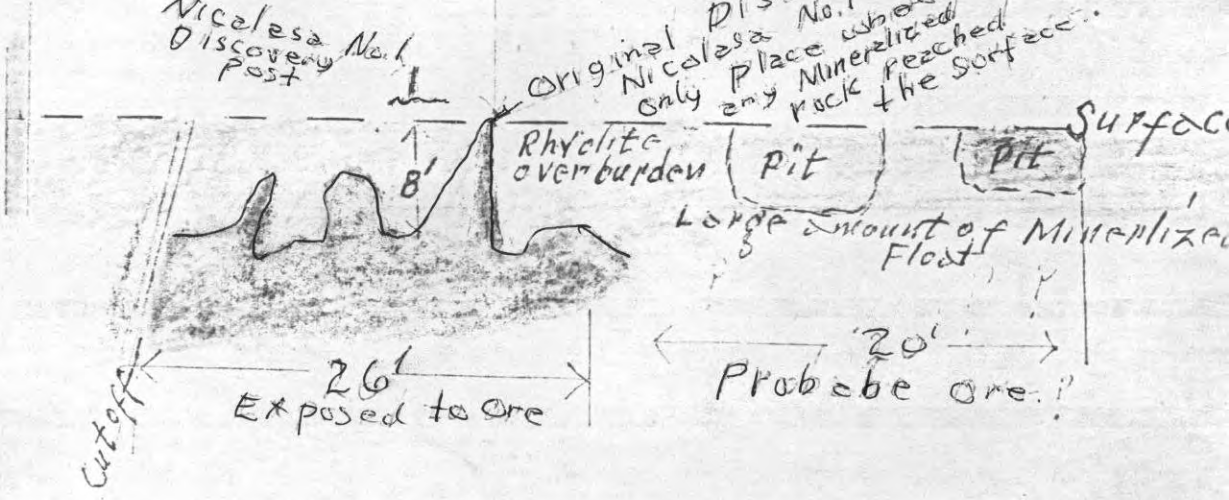
Hornblende has been altered in place and blendes into Mineralized Hornblende.

18" M.L. Hornblende bluerish Grey Just above Mineralized Hornblende

Very Highly Altered Hornblende Yellow brown Color

Note: No Highly Altered Hornblende overlying ore in lower pits?

Note: Mineralized Hornblende 50' is hard and tough, and has been completely changed from very course rock to quite fine grained.



Altered Hornblende

Altered Rhyolite | Mineralized | Granodiorite | Rhyolite Porphyry
