Westport Tsunami Evacuation Walk Times

This map is a planning and preparation tool. Learn the evacuation routes for you and your family where you live, work, and play—emergency evacuation maps may not be on hand during an actual emergency.

This evacuation walk time map for the city of Westport provides an estimate of the amount of time it would take pedestrians to evacuate. The map provides an estimate for individuals on foot from a tsunami. Evacuation time estimates are based on the evacuation travel time for a pedestrian to walk to safe high ground or elevated areas.

Estimated wave arrival times shown on the map reflect the times between the beginning of observed or modeled wave arrival at a local location.

Estimated tsunami travel times shown on the map reflect the times between the beginning of observed or modeled wave arrival at a local location.

In some places a slow walk may not be fast enough to evacuate before waves arrive. In these cases a faster evacuation pace will be necessary. Some areas may require vertical evacuation structures for successful evacuation.

In case of earthquake, go to high ground or inland.
