RE: Amani Home License #753469

Dear Provider:

The Department completed a full inspection of your Adult Family Home on June 29, 2018 and found that your home does not meet the adult family home licensing requirements listed below.

The Department staff who did the inspection and provided consultation:
Adelle Walker, Licensor

Consultation:

WAC 388-76-10750 Safety and maintenance. The adult family home must:

(6) Provide storage for toxic substances, poisons, and other hazardous materials that is only accessible to residents under direct supervision, unless the resident is assessed for and the negotiated care plan indicates it is safe for the resident to use the materials unsupervised;

The home failed to ensure that toxins were not accessible to potential residents.

WAC 388-76-10845 Emergency drinking water supply. The adult family home must have an on-site emergency supply of drinking water that:

- (1) Will last for a minimum of seventy-two hours for the home's licensed capacity, every household member, and caregiving staff;
- (2) Is at least three gallons for the home's licensed capacity, every household member, and caregiving staff;
- (3) Is stored in well-sealed food grade or glass containers;
- (4) Is chlorinated or commercially bottled;
- (5) Is replaced every six months, unless it is sealed and commercially bottled; and
- (6) Is stored in a cool, dry location away from direct sunlight.

The home failed to ensure that there was eighteen gallons of emergency drinking water on site for four potential residents, one caregiver and two household members.

**WAC 388-76-10895 Emergency evacuation drills Frequency and participation.
The adult family home must ensure:**

(1) Emergency evacuation drills occur during random staffing shifts at least every two months; and

The home failed to conduct a emergency evacuation drill every two months since it was licensed in October of 2017.
