CHAPTER 2.0  
TOPOGRAPHIC MAP DESCRIPTION  
CHANGE CONTROL LOG**

Change Control Logs ensure that changes to this unit are performed in a methodical, controlled, coordinated, and transparent manner. Each unit addendum will have its own change control log with a modification history table. The “**Modification Number**” represents Ecology’s method for tracking the different versions of the permit. This log will serve as an up to date record of modifications and version history of the unit.

1 **2.0 TOPOGRAPHIC MAP DESCRIPTION**

2 **2.1 Introduction**

3 A topographic map is located in the Department of Ecology library (3100 Port of Benton Boulevard,  
4 Richland, WA 99354) reflecting general topographic requirements and the area set aside for IDF. The  
5 actual dimensions and waste volume capacity of the Resource Conservation and Recovery Act (RCRA)  
6 trench that is being permitted are described in the Part A and Appendix 4A of the IDF portion of this  
7 permit. The IDF is located on the Hanford Facility, which limits the use of surrounding land to  
8 Department of Energy activities. There are no surface waters in the area defined on the topographical  
9 map. Chapter 5.0 includes figures that reflect additional requirements for topographic maps. For the  
10 point of compliance and proposed groundwater wells see Figure 5-8, and for the aquifer location see  
11 Figure 5-4 and Section 5.3 for the identification of the aquifer.
