7121 E Loop Road, PO Box 371
Stevenson, Washington 98648

TO: Laura Watson, Department of Ecology
FROM: Mayor Scott Anderson
DATE: March 28th, 2022
SUBJECT: Shoreline Master Program

Dear Director Watson-

We are thrilled to reach our Shoreline Master Program milestone. The Conditional Approval issued by the Department has been reviewed in full by our public, Shoreline Advisory Committee, Planning Commission, City Council.

As a result of this review, all 25 required changes have been incorporated into the attached documents. Additionally, 32.5 of the 33 recommended changes were also incorporated into the City's final approval. The half-change not incorporated was rejected because it would've created a typo. Recommended Change 20 stated:

"The provisions in this chapter apply to specific uses and types of development that typically occurring in shoreline areas..."

The City kept "that" and deleted the verb modifier. The result states "...types of development that typically occur in..."

To assist your review, I have attached Ordinance 2022-1181 which adopted the SMP documents satisfying our comprehensive update and periodic review. Also attached is the redlined version of these documents showing where the required and recommended changes have been made. Finally, our public notice and public comment summary is attached for your review.

We eagerly await your final approval letter.

Respectfully,

Scott Anderson, Mayor, City of Stevenson
