FIND THE SMART ONES

They are here somewhere.

Six smart ways to get to work.
They help keep our air clean and our traffic moving, and they save fuel.
There's also one not-smart way to get to work—drive-alone commuting.
It increases air pollution and traffic congestion.

Can you find all of them?

6 Buses
5 Carpools
4 People working at home (telecommuting)
4 People bicycling to work
3 People walking to work
2 Vanpools
6 People driving alone to work

PARTNERS For SMART COMMUTING

Keep the air clean. Keep the traffic moving. Keep the car home once a week.
