

Floodplains by Design

• REDUCING RISK, RESTORING RIVERS •

Accomplishments to Date

Floodplains by Design is an ambitious public-private partnership working to reduce flood risk and restore habitat along Washington’s rivers and streams.

By transforming how floodplains are managed on a landscape scale, we can support thriving communities and a healthy environment. Since 2013, the Washington State Legislature has appropriated \$216 million to support large-scale, multiple-benefit projects across the state through the Department of Ecology’s Floodplains by Design grant program.

ACCOMPLISHMENTS TO DATE INCLUDE ALL IN-PROGRESS, COMPLETED AND PLANNED PROJECTS FUNDED THROUGH 2022.
