Subject: RE: Proposed Changes To ALARACT 6.1

Chuck,

You are approved to make the modifications to the splash guard as described.

Subject: Proposed Changes To ALARACT 6.1

John, Ernest, and Crystal,

As discussed at yesterday's RTAM, I am attaching a word copy of the proposed changes to ALARACT 6.1 for your comments. The proposed changes are indicated in redline/strikeout. We are also requesting to proceed with the option to seal the splashguard to the matting or groundcover around the pit while the ALARACT revision is going through the approval process. As discussed, implementation of this option will eliminate the gap between the lower rail and the edge of the pit and provide better contamination control.

Please let me know if you have any questions.

Chuck
