John,

And so it begins. I'd like to initiate the process to remove near-field air monitoring station N550 (200-West Area, near U-Plant. See attached map) from Table 4-1 in the FF-01 License.

Please let me know what information you may need from me.

Craig

Subject: N550

Phil,

I just got word that the Groundwater Project will very soon be shutting power off permanently to station N550. Could you drive by there once a day until you can confirm that it is indeed off?

I need to let ERDF know when this happens as this station is currently one of their upwind locations. When it goes away, ERDF will start relying on data from N168.
