Richland, Washington 99352

Re: Approval of Revision Request for Entering and Characterization of the 224-T Facility Process Cells

Reference: Letter 17-ESQ-0047 (IM 9,480), "Transmittal of Notice of Construction (NOC) Application/License Revision and Notification of Off-Permit Change, Permit Number: 00-05-006, Renewal 2 for Entering and Characterization of the 224-T Facility Process Cells," dated March 7, 2017.

Mr. Shoop:

We reviewed your reference application and verified that all references and conditions pertaining to the 224-T Facility (formally in NOC 830) have been previously removed due to the recent one to one project updates. For your reference, following are the updated emission units and their current NOCs:

EU 314, NOC 1041
EU 447, NOC 1074
EU 486, NOC 1067

We agree with the proposal that the 224-T Facility be added as a Diffuse and Fugitive emission source to Table 2-1 of the FF-01 license, designated as "224T." A new emission unit will be assigned to 224T and will be added to Table 2-1. This addition will be included in the next FF-01 update.

If you have questions regarding this approval, please contact Thomas Frazier at Thomas.frazier@doh.wa.gov or, by phone, at (509) 946-0774.

Sincerely,

John Martell, Manager
Radioactive Air Emissions Section
