Subject: Acceptance of Changes to NOC 877

John, Ernest,

ORP concurs with changes and accepts NOC 877. Thanks for your efforts in working with ORP on this important permit.

Subject: RE: Acceptance of Changes to NOC 877

Dennis,

DOH will add the words 'Non Operational' to the abatement section.

As for Condition 4, this is technically an alternative approval. We need to establish why using a system designed for a minor emission unit would be sufficient for this case. We will have to let the wording stand.

Please let me know if you concur with this approach.

Subject: Acceptance of Changes to NOC 877

TO: Earnest McCormick, John Martell, John Schmidt

ORP accepts the proposed changes to draft NOC 877 as negotiated with WRPS staff on 3-26-2013. Please consider the additional redline/strikeout changes contained in the attached file. The attached proposed changes include:

EU 218

\* Resp. to 3601<sup>1</sup>

- Removal of the Heater as required abatement control technology, alternatively add 'Non Operational' to the Additional Description column;
- Clarifying approval condition #4 text.

Thank you for your attention to this matter.

Dennis
