Re: Closeout of Inspection (Audit 1029) – Minor Emission Units within the A Farm Complex
(EU 204 / NOC 828 and EU 227 / NOC 827)

Reference: 1. Letter (IM# 8,317), Smith, K.W. (USDOE) to Martell, J. (WDOH),
“Report of Closure for Emission Unit 200E P-296AN-001 (296-A-
29),” dated October 16, 2014

Dear Mr. Smith:

The Radioactive Air Emissions Section (RAES) inspected the Double Shell Tank (DST) exhausters referenced above to determine compliance with the Radioactive Air Emissions License (FF-01) and Washington Administrative Code (WAC) 246-247. The RAES inspector completed a visual inspection and reviewed supporting documentation on June 11, 2014.

Emission Unit 296-A-29 (EU 227, NOC 827) was dismantled and a report of closure was received (Reference 1). No issues were noted during the inspection and Audit 1029 is closed upon receipt of this letter. The emission unit license will be removed from the FF-01 at the next update of the license. The inspection report can be supplied upon request.

The RAES inspections concentrate on select key compliance issues, but not necessarily all regulations or license conditions due to time constraints. The RAES inspections alone are not to be used to demonstrate compliance with the emission unit license.

If you have questions regarding this letter or inspection report, please contact Ernest McCormick at (509) 946-0624.

Sincerely,

John Martell, Manager
Radioactive Air Emissions Section
