Subject: Documentation for Removal of NOC 840 from EUs 447, 455, and 476

This email is to document the agreed removal of NOC 840 from EUs 447, 455, and 476. NOC 840 (License to Operate Ventilation of the 241 AY/AZ Tank Farm) was originally associated with EUs 93, 447, 455, 476, and 486. NOC 840 was removed from EUs 93 and 486 in the FF-01 update for September 18, 2013, but had unintentionally not been removed from EUs 447, 455, and 476.

The new license for EU 93, NOC 901, was a single NOC, single EU license and was issued to cover the operation of the single EU after construction completion. NOC 840 was completely removed from the FF-01 update October 11, 2013.

Please contact me if you have any questions concerning this documentation.
