Subject: 296-A-21A

All,
Attached is the info to reinstate 296-A-21A.

Thanks Dennis

As discussed in the 4/2/14 RTAM, DOH transmitted AIR 13-607 (NOC 879) for Removal and Disposal of the Obsolete 242A Evaporator Building K-1 Exhauster (296-A-21) in a letter dated 6/20/13. In the same letter, AIR 12-341 (NOC 864) for the currently active 242-A Evaporator Building Exhauster, 296-A-21A (EU 1294) was obsoleted. As this is the currently active stack for this facility, it is requested that AIR 12-341 be re-instated.

EU 1294
