

## Site Register

The Site Register is published to inform you about activities related to the study and cleanup of hazardous waste sites under the Model Toxics Control Act, Chapter 70.105D RCW.

### Background

The Model Toxics Control Act requires Ecology to provide timely information and opportunities for participation in the cleanup of contaminated sites. Chapter 173-340, the regulation defining the cleanup process, established the Site Register.

### Information in the Site Register

The Site Register is typically published every two weeks to inform the public of:

- Activities related to the study and cleanup of contaminated sites
- Public meetings/hearings and public comment periods
- Discussion or negotiations of legal agreements
- Availability of cleanup reports
- Hazard ranking of sites

Entries in the Site Register include a short description of the site and an Ecology contact person.
