

Public Notice

Issuance of General Permit for Water Treatment Plants

from Ecology's Water Quality Program, Southwest Regional Office

Introduction

On June 16, 2004, Ecology reissued the wastewater discharge general permit for water treatment plants located in Washington State. This permit becomes effective on July 16, 2004. The permit implements the federal Clean Water Act and State Water Pollution Control Act; its purpose is to control the discharge of pollutants from water treatment plants into waters of the state.

Water treatment plants are facilities that produce drinking water. All water treatment plants that discharge to surface water and meet the following criteria must be covered under this permit:

- Produce potable water or "industrial" water (primary treatment/ settled water),
- Are not part of a larger, permitted facility (such as a pulp and paper mill),
- Discharge waste water from water treatment filtration processes (filter backwash, sedimentation/presedimentation basin wash water, or filter-to-waste), and
- Can produce 50,000 gallons a day or more of treated drinking water.

Summary of Public Involvement Process

Notice of the proposed permit was published in the State Register and in six newspapers of general circulation throughout the state on April 21, 2004. A public workshop and hearing were held at the Ecology headquarters building in Lacey on May 24, 2004. The public comment period closed May 27, 2004.

Summary of Revisions Based on Public Comments and Testimony

A minor revision was made to the permit because of the comments received during the formal public comment period. The revision added language to S3.C., Compliance with Standards to emphasize that the prohibition to violate water quality standards applies to the addition of treatment chemicals. The complete text of the comments and summary of Ecology's responses is available on the Internet at: www.ecy.wa.gov/programs/wq/wtp.

Permit Coverage

Facilities with coverage under the previous permit will automatically receive coverage under the revised permit. Facilities that do not have coverage but meet the requirements for coverage must complete and submit an application for coverage. You may obtain additional information and download an application form from the Internet address above or by contacting Carey Cholski.

Appeal Procedures

The terms and conditions of the permit may be appealed within 30 days of the issuance of the general permit (RCW 43.21.B.310). An appeal must be filed with the Pollution Control Hearings Board, P.O. Box 40903, Olympia, Washington, 98504-0903. In addition, a copy of this appeal must be served on the Department of Ecology, P.O. Box 47600, Olympia, Washington, 98504-7600. The procedures and requirements for the appeal process are contained in RCW 43.21.B.310.

The terms and conditions of a general permit, as they apply to an individual discharger, are appealable within 30 days of the effective date of coverage of that discharger, in accordance with chapter 43.21B RCW. This appeal is limited to the general permit's applicability or nonapplicability to a specific discharger.

If you need this information in an alternate format, please contact Carey Cholski at 360-407-6279. If you are a person with a speech or hearing impairment, call 711 or 800-833-6388 for TTY.
