

Site Register

WASHINGTON STATE DEPARTMENT OF ECOLOGY TOXICS CLEANUP PROGRAM

OCTOBER 19, 2006

The Site Register is published every two weeks to inform you about public comment periods, public meetings, hearings, and other information related to the study and cleanup of hazardous waste sites under the Model Toxics Control Act, Chapter 70.105D RCW.

You may also find information about public hearings, meetings, workshops, and open public comment periods on Ecology's web page. Go to www.ecy.wa.gov and click on the Public Involvement Calendar.

If you have questions or want to be added to the mailing list (electronic or paper) for the Site Register, contact Linda Thompson at 360/407-6069 or e-mail Ltho461@ecy.wa.gov. Specific regional contacts are listed after each entry.

If you need this publication in an alternate format, please call the Toxics Cleanup Program at 360/407-7170. Persons with hearing loss may call 711 for Washington Relay Service. Persons with a speech disability may call 877/833-6341.

FORMAL CLEANUPS

Ecology oversees complex cleanup sites to ensure that your health and that of the environment are protected.

BENTON COUNTY

Low-Level Radioactive Waste Disposal Facility, 23 miles northwest of Richland on the Hanford Site, Benton

**Public comment period:
10/02/06 – 11/01/06**

Proposing an Agreed Order/Consent Decree

Ecology proposes an agreed order with U.S. Ecology, Inc, for its low-level radioactive waste disposal facility. The agreed order requires U.S. Ecology to conduct a remedial investigation and focused feasibility study to identify the nature and extent of hazardous chemical contamination at the site.

This facility is about 23 miles northwest of Richland, WA on about 100 acres the state of Washington leases from the U.S. Department of Energy and subleases to U.S. Ecology. The facility began operations in 1965. It accepts low-level radioactive wastes for disposal. But between November 1965 and June 1970, an estimated 17,000 cubic feet of unauthorized nonradioactive hazardous wastes were disposed of there.

Tests have detected hazardous substances underground. Many volatile organic chemical contaminants are in the soils, the zone between the surface and the water table, and in the groundwater.

The draft agreed order is available for review at the following locations:

- Department of Ecology, 3100 Port of Benton Blvd, Richland, WA 99354, 509/372-7920, Dsin461@ecy.wa.gov. (Please call for appointment.)

- Ecology's website at <http://www.ecy.wa.gov/programs/nwp/commentperiods.htm>.

- Ecology's Public Events Calendar: www.ecy.wa.gov

For more information or to submit written comments, please contact **Deborah Singleton**, Site Manager, at the Ecology address listed above or at 509/372-7923 or e-mail Dsin461@ecy.wa.gov.

CLALLAM COUNTY

Rayonier Port Angeles Mill, 700 N. Ennis Street, Port Angeles

**Public comment period:
10/18/06 – 12/1/06**

Availability of RI/FS Reports and Draft and Final Cleanup Plans

A draft Remedial Investigation report (RI) for the uplands environment of the Rayonier Port Angeles Mill is available for public review and comment. The RI describes the nature and extent of contamination for the site. The site has dioxins, polycyclic aromatic hydrocarbons, petroleum and metals in soil and groundwater. Rayonier operated a specialty pulp mill on this property from the 1930s to 1997.

Ecology is holding a **public meeting** about the draft RI. The meeting will be held in the **Clallam County Commissioners Board Room, 223 East Fourth Street, Port Angeles, on November 8, 2006 from 7:00pm to 9:00pm**. An open house at 5:00pm will be followed by the public meeting.

The draft RI is available for review at the following locations:

- Port Angeles Library, Chase & Lauridsen, Port Angeles 360/417-8500
- Peninsula College, 1502 E. Lauridsen

Blvd., Port Angeles **360/417-6280**

• Ecology Southwest Regional Office, 300 Desmond Drive, Lacey, WA 98503. (Please call **360/407-6365** for an appointment.)

• Ecology's website at : www.ecy.wa.gov/programs/tcp/sites/sites_information.html. (Click on Clallam County.)

• Ecology's Public Events Calendar: www.ecy.wa.gov

For more information or to submit written comments, please contact **Bill Harris**, Site Manager, at the Ecology address listed above or at **360/407-6253** or e-mail Whar461@ecy.wa.gov.

GRANT COUNTY

Moses Lake Wellfield Contamination Superfund Site, Moses Lake

Public comment period extended: 10/3/06 – 11/10/06

Draft Consent Decree Available for Public Review and Comment

Ecology and the City of Moses Lake (City) have negotiated this draft Consent Decree to provide oversight to the cleanup at Moses Lake. The City has agreed to reimburse some of Ecology's past costs.

The site includes at least one plume of trichloroethylene (TCE) contaminated groundwater within an area at least a mile wide, up to three miles long, and from 100 to 310 feet deep, underlying and extending south from the former Larson Air Force Base.

The U.S. Air Force used the base from 1942 until the mid 1960s, when it was decommissioned and sold. Currently, the Port of Moses Lake owns most of the land, operating part of it as Grant County International Airport.

During groundwater sampling by the Washington Department of Health in 1988 and 1989, elevated TCE levels were found in some of the Moses Lake

municipal wells at the former base and in the two Skyline water systems wells. The City protected municipal water systems users by either closing the contaminated municipal wells or sealing off the shallow contaminated basalt aquifers.

Documents related to the cleanup are available for public review at:

• Big Bend Community College Library, 7662 Chanute Street NE, Moses Lake. Contact: **Tim Fuhrman, 509/793-2350.**

• Ecology Headquarters Office, 300 Desmond Drive, Lacey, WA 98503, **360/407-7107**. (Please call **Carol Dorn** for an appointment.)

For more information or to submit comments, please contact either **Barry Rogowski** at **360/407-7236**, e-mail Bro461@ecy.wa.gov or **Sandra Caldwell** at **360/407-7209**, e-mail Saca461@ecy.wa.gov.

GRAYS HARBOR COUNTY

Hungry Whale Site, 1680 N. Montesano Street, Westport

Public comment period: 9/21/2006 – 10/21/2006

Agreed Order, Public Participation Plan available for Public Comment

Ecology is providing opportunity for the public to comment on the Remedial Investigation/Feasibility Study, Agreed Order and Public Participation Plan for the Hungry Whale site. This Order is issued by Ecology through the Model Toxics Control Act (Chapter 70.105D RCW, Chapter 173-340 WAC). Historic petroleum fueling operations resulted in soil and groundwater being polluted with petroleum hydrocarbons.

The Order requires the Port of Grays Harbor to do certain remedial actions consisting of completion of the remedial investigation as well as a feasibility study of remedial alternatives. Ecology will then draft a cleanup action plan of the proposed remedy.

You may review the Agreed Order and Public Participation Plan at the following locations:

• Westport City Hall, 506 N. Montesano Street, Westport **360/268-0131**

• Ecology Southwest Regional Office, 300 Desmond Drive, Lacey, **360/407-6365** (Please call for appointment.) or e-mail Lkoz461@ecy.wa.gov

For more information or to submit comments, please contact **Guy Barrett** at **360/407-7115** or e-mail Gbar461@ecy.wa.gov.

Pedersen Property Montesano Site, 419 1st Street in Montesano

Public comment period: 9/30/06 - 10/30/06

Agreed Order for Access to conduct Ecology Lead Remedial Investigation

Ecology and the Jeffrey A. Pedersen Credit Trust (The Trust) have agreed to a Model Toxics Control Act (MTCA, Chapter 70.105D RCW) order for the Trust (Owner) to provide access so that Ecology can conduct a Remedial Investigation of the Property. The agreed order is a legal document agreed to between Ecology and potentially liable persons (PLPs), to ensure that proposed activities are conducted in a timely way, in agreement with MTCA and other applicable laws and regulations.

Use of the Pedersen Property site has included service stations that sold gasoline and diesel fuels, bulk petroleum product storage and dispensing to delivery trucks, and an auto repair shop.

Because of activities on the site, soil and groundwater have been polluted with petroleum hydrocarbons. These contaminants pose a threat to human health and the environment.

According to an Initial Investigation performed by Ecology in May 2003, petroleum hydrocarbons have been released to soils and groundwater at the Pederson Property. Ecology completed

a Site Hazard Assessment (SHA) for the Site. The SHA resulted in a ranking of 1 for the Site. Ranking ranges from 1 to 5, with 1 representing the highest relative risk and 5 the lowest relative risk.

Current use of the property is as an automobile repair facility by Montesano Brake and Muffler. Due to the limited resources available in the trust and Ecology's concern that expedited action should be taken to determine the scope and nature of contamination at the site, Ecology has determined that it is in the public interest to utilize state funds available through the Clean Sites Initiative to undertake a Remedial Investigation of the site. The remedial investigation is expected to result in a Feasibility Study that will describe remedial action options that apply to the site. This study will also recommend a preferred option for cleanup.

Documents related to the cleanup are available for public review at:

- W.H. Abel Library, 7125 Main Street South, Montesano **360/249-4211**
- Montesano City Hall, 112 North Main, Montesano **360/249-3939**
- Ecology Southwest Regional Office, 300 Desmond Dr, Lacey **360/407-6365**, **Lkoz461@ecy.wa.gov** (Please call for appointment.)

For more information or to submit comments, please contact **Marv Coleman** at **360/407-6259** or e-mail **Mcol461@ecy.wa.gov**.

KLICKITAT COUNTY

Recycled Aluminum Metals Company (RAMCO), Port of Klickitat Industrial Park, east of Dallesport

Public comment period:
10/18/06 – 11/20/06

Interim Remedial Action Plan

Ecology is providing the opportunity for the public to comment on its plans to clean up buried aluminum waste at the Port of Klickitat Industrial Park. The

Industrial Park is located approximately two miles east of Dallesport, Washington. The site of the proposed cleanup is about 400 feet southwest of Spearfish Lake and about 1000 feet north of Lake Celilo (the name of the portion of the Columbia River that is backed up behind The Dalles Dam). The two documents prepared for public comment are the Interim Remedial Action Plan and SEPA Determination of Non-Significance (DNS).

From approximately 1982 until 1993 RAMCO took in material from aluminum smelters, then extracted residual aluminum from this material. The extraction process resulted in wastes being generated. One solid waste was called salt cake. A second type of solid waste consisted of captured airborne waste and was called bag house dust. From approximately 1982 to 1989, these wastes were buried in the unlined disposal site. This is the area Ecology proposes to clean up. In the final years RAMCO extracted aluminum, the wastes produced were shipped off-site, initially to North Wasco County Landfill and then to Roosevelt Regional Landfill.

Ecology conducted groundwater sampling in the area proposed for cleanup. Sampling results show levels of major salt-forming chemical elements (sodium, calcium, potassium) are greater than levels of these elements found in seawater. This indicates salts from the salt cake waste have found their way into nearby groundwater. Ecology is also concerned that metals contamination from the aluminum waste could be a concern, but groundwater monitoring so far has not confirmed that. The waste material, when disposed, produces ammonia gas when wet. The odor of ammonia was detected during groundwater sampling events.

Ecology has considered several options for cleanup. The option preferred by Ecology is excavating the waste and hauling it by truck or rail transportation to a landfill for disposal.

Depending on the availability of funding,

the project could be completed in one year or it may take two or more phases extending over several years.

After reviewing a State Environmental Policy Act (SEPA) environmental checklist, Ecology has made a decision that the cleanup will not have a significant negative impact on the environment. Therefore, an Environmental Impact Statement (EIS) is not required. The checklist is part of the documents available for public comment.

The Interim Remedial Action Plan and SEPA DNS are available for review at the following locations:

- Port of Klickitat, 154 E. Bingen Point Way # A, Bingen
- Ecology Central Regional Office, 15 West Yakima Ave, Suite 200, Yakima, WA 98902-3452. (Please call **509/454-7658** for an appointment.)
- Ecology's website at **http://www.ecy.wa.gov/programs/tcp/sites/ramco/ramco_hp.htm**. (Then click on Yakima County)
- Ecology's Public Events Calendar: **www.ecy.wa.gov**

For more information or to submit written comments, please contact **Bob Swackhamer**, Site Manager, at the Ecology address listed above or at **509/454-7840** or e-mail **Rswa461@ecy.wa.gov**.

OKANOGAN COUNTY

Flying B #1 Gas Station, 2042 Elm Way, Okanogan

Public comment period:
10/18/06 – 11/20/06

UST Settlement Agreement

Ecology proposes to enter into an Underground Storage Tank Settlement Agreement with Gagandeep Bains and Bains LLC.

In August 2003, Ecology completed an Underground Storage Tank (UST) compliance inspection of the Flying

B #1 gas station located in Okanogan County. During the inspection, several violations of the UST regulations were found. In October 2003, Ecology issued Notice of Penalty (Penalty) in the amount of \$87,100 for the violations. An Application for Relief of Penalty was filed with Ecology in October 2003. In November 2003, Ecology issued a Notice affirming the Penalty. In December 2003, an appeal of the Penalty was filed with the Pollution Control Hearings Board (PCHB). In February 2005, Ecology and Mr. Gagandeep Bains, an owner in Bains LLC, entered into Stipulation and Agreed Order of Dismissal for PCHB case No. 03-161 (PCHB Settlement Agreement) which was presented to the PCHB. Based on the PCHB Settlement Agreement, the PCHB dismissed No. 03-161. In June 2006, Ecology commenced this action by filing a Summons and Complaint for Breach of Settlement Agreement and to Recover Unpaid Penalty (Complaint). On September 18, 2006, Ecology filed Plaintiffs Motion for Default Against Defendants and Plaintiffs Motion for Default Judgment to Recover Unpaid Penalty.

Ecology and the Defendants have agreed to resolve this dispute through a proposed Settlement Agreement. The Agreement settles all issues raised by the Complaint. Ecology agrees to deem Penalty No. DE 03TCPCR-5793 and the PCHB Settlement Agreement satisfied upon Defendants' satisfactory and timely completion of its obligations under this Agreement. Ecology agrees to lower Defendants' obligation to pay \$9,000 under the PCHB Settlement Agreement to \$7,500 in recognition of Mr. Bains' completion of operator training, which was required under the PCHB Settlement

Agreement. In order to satisfy the remaining \$7,500 obligation, Defendants agree to make 12 monthly payments in the amount of \$625. If Defendants fail to make any scheduled monthly payment, the full amount of \$9,000 will become due and payable immediately.

The proposed Settlement Agreement is available for public review at:

- Ecology Central Regional Office, 15 West Yakima Ave, Suite 200, Yakima, WA 98902-3452. (Please call **509/575-2490** for an appointment.)
- Ecology's website at http://www.ecy.wa.gov/programs/tcp/sites/flying_b/flying_b_hp.htm.

For more information or to submit written comments, please contact **Christina Zerby** at the Ecology address listed above or at **509/454-7833** or e-mail **Czer461@ecy.wa.gov**.

PIERCE COUNTY

1147 Dock Street Site, Tacoma

Public comment period:
10/16/06 – 11/16/06

Agreed Order, Remedial Investigation and Feasibility Study

Ecology and Federal Asset Recovery (FAR) propose to enter into an Agreed Order. FAR will summarize existing environmental information about the Dock Street site, determine if additional remedial investigations are necessary, develop a work plan and complete additional investigations if needed. The order further requires FAR to conduct a feasibility study and develop a draft cleanup action plan if contaminants are found to be remaining on the site.

The site is located on the west shoreline of Thea Foss Waterway, which is included within the Commencement Bay Nearshore/Tideflats Federal Superfund site. It was formerly operated as the Consumers Central Heating Plant, providing steam heat to downtown Tacoma. In 1996, Ecology conducted an interim action at the site to remove fill material containing mercury from the site shoreline. The interim action was performed as a measure to control sources of pollution to Thea Foss Waterway in advance of the Superfund sediment remediation in that waterway.

The Agreed Order includes provisions for FAR to repay Ecology's costs of the 1996 interim action.

You may review the agreed order at the following locations:

- Tacoma Public Library, 1102 Tacoma Ave., Tacoma, WA **253/591-5666**
- Citizens for A Healthy Bay, 917 Pacific Ave. Suite 100, Tacoma, WA 98402 **253/ 383-2429**
- Ecology Southwest Regional Office, 300 Desmond Drive, Lacey, WA 98503 Contact: **Leslie Koziara, 360/407-6365, Lkoz461@ecy.wa.gov**. (Please call for appointment.)
- Ecology's website at http://www.ecy.wa.gov/programs/tcp/sites/dock_st/dock_st_hp.htm.

WHATCOM COUNTY

Whatcom Waterway site, Bellingham

Public comment period:
10/10/06 – 12/9/06

Supplemental Remedial Investigation/ Feasibility Study and Supplemental Environmental Impact Statement Available for Public Review and Comment – Whatcom Waterway site, Bellingham

Ecology is seeking public comment on a draft Supplemental Remedial Investigation/Feasibility Study (RI/FS) and a companion draft Supplemental Environmental Impact Statement (EIS) for the Whatcom Waterway site (Site) in Bellingham, WA. The Supplemental RI/FS incorporates the results of environmental investigations conducted since completion of the original RI/FS in 2000, updates previously evaluated cleanup alternatives, describes and evaluates new cleanup alternatives that reflect changes in land use, and identifies a preferred cleanup approach. The EIS supplements the original impact analysis completed in 2000 and evaluates the environmental impacts, benefits and potential mitigation actions associated

with the updated and new cleanup alternatives for the Whatcom Waterway site.

The Site includes aquatic lands adjacent to Georgia Pacific's (G-P) former pulp mill and chlor/alkali plant in downtown Bellingham. In 1965, G-P constructed a chlor/alkali plant at the mill complex to produce chlorine and sodium hydroxide for use in bleaching and pulping wood fiber. The chlor/alkali plant discharged mercury-laden wastewater directly into an area of Bellingham Bay known as the Whatcom Waterway.

Environmental investigations of the Site have confirmed the presence of mercury and several contaminants associated with wood materials at concentrations exceeding standards under the Model Toxics Control Act (MTCA) and

Washington Sediment Management Standards. As a result, the Site is subject to investigation and cleanup requirements of MTCA.

The draft supplemental RI/FS and companion draft supplemental EIS will be available for review beginning on October 10th at the following locations:

- Bellingham Public Library, 210 Central Avenue, Bellingham **360/676-6860**
- Bellingham Field Office, 1204 Railroad Ave., Suite 200, Bellingham, **360/738-6250**. (Please call for appointment.)
- Ecology Northwest Regional Office, 3190 160th Ave. SE, Bellevue, **425/649-7190**. (Please call for appointment.)
- Ecology's website at http://www.ecy.wa.gov/programs/tcp/sites/blhm_bay/sites/bel_bay_sites.html.

Public meetings will be held on October 26 and November 30 to provide an overview of the documents along with a question/answer session.

For more information or to submit written comments, please contact **Lucille T. McInerney, P.E.**, Site Manager, at Ecology's Northwest Regional

Office address listed above or e-mail Lpeb461@ecy.wa.gov.

YAKIMA COUNTY

**Bay Chemical, 8 E Washington Ave,
Yakima**

**Public comment period:
10/6/06 – 11/6/06**

Consent Decree

Ecology proposes a consent decree with Burlington Northern Santa Fe Railroad for the Bay Chemical Site. The consent decree requires the excavation and on-site consolidation and capping of soils contaminated with heavy metals. The site covers approximately 52 acres owned by the BNSF and Roche family. From 1963 to 1976, operations conducted by the Bay Chemical Company on property leased from BNSF resulted in releases of hazardous substances to the soil and groundwater. The primary contaminants of concern at the site are metals released during Bay Chemical's manufacturing process and include antimony, arsenic, cadmium, chromium, copper, lead, manganese, mercury, and zinc. Ecology (as SEPA lead agency) has determined that the proposed actions will not have a probable adverse impact on the environment. As a result, Ecology proposes to issue a determination of non-significance (DNS) under the State Environmental Policy Act (SEPA, chapter 197-11 WAC) Rules.

The draft consent decree and SEPA DNS is available for review at the following locations:

- Yakima Valley Regional Library, 102 N 3rd Avenue, Yakima.
- Ecology Central Regional Office, 15 West Yakima Ave, Suite 200, Yakima, WA 98902-3452. (Please call **509/454-7658** for an appointment.)
- Ecology's website at www.ecy.wa.gov/programs/tcp/sites/sites_information.html. (Click on Yakima County.)

• Ecology's Public Events Calendar:
www.ecy.wa.gov

For more information or to submit written comments, please contact **Tom Mackie**, Site Manager, at the Ecology address listed above or at **509/454-7834** or e-mail Tmac461@ecy.wa.gov.

INDEPENDENT CLEANUPS

A property owner may conduct an independent cleanup of contamination and submit reports to Ecology. When a property owner applies to Ecology for review of their independent cleanup, the site enters the Voluntary Cleanup Program. After review, Ecology sends a letter to the property owner stating either that additional work is required to be removed from the list of hazardous waste sites or that no further action is needed.

Yakima County Powerhouse Rd, 5991 W Powerhouse Rd, Yakima - Submitted 9/28/06, Site status: Independent remedial action.

SITE HAZARD ASSESSMENTS

An initial investigation is conducted when a suspected release of hazardous materials has occurred. If additional work is required, a site hazard assessment may be conducted. These sites are ranked on a scale from 1 to 5, with 1 being the highest risk to human health and the environment. The following sites are scheduled for an assessment.
