

# Site Register

WASHINGTON STATE DEPARTMENT OF ECOLOGY TOXICS CLEANUP PROGRAM

**NOVEMBER 8, 2007**

*The Site Register is published every two weeks to inform you about public comment periods, public meetings, hearings, and other information related to the study and cleanup of hazardous waste sites under the Model Toxics Control Act, Chapter 70.105D RCW.*

*You may also find information about public hearings, meetings, workshops, and open public comment periods on Ecology's web page. Go to [www.ecy.wa.gov](http://www.ecy.wa.gov) and click on the Public Involvement Calendar.*

*If you have questions or want to be added to the mailing list (electronic or paper) for the Site Register, contact Linda Thompson at 360/407-6069 or e-mail [Ltho461@ecy.wa.gov](mailto:Ltho461@ecy.wa.gov). Specific regional contacts are listed after each entry.*

*If you need this publication in an alternate format, please call the Toxics Cleanup Program at 360/407-7170. Persons with hearing loss may call 711 for Washington Relay Service. Persons with a speech disability may call 877/833-6341.*

## FORMAL CLEANUPS

Ecology oversees complex cleanup sites to ensure that your health and that of the environment are protected.

### KITSAP COUNTY

**Chevron Tank Farm Port Washington Narrows, 1310 Highland Avenue in Bremerton  
Facility Site ID# 2618**

**Public comment period:  
10/15/07 – 11/15/07**

#### *Agreed Order*

An Agreed Order and associated Public Participation Plan for the Chevron Tank Farm Port Washington Narrows site in Bremerton, WA are available for public comment. The Agreed Order requires the City of Bremerton to conduct a Remedial Investigation and Feasibility Study (RI/FS), develop a Cleanup Action Plan, and conduct an interim action to remove sources of petroleum contamination on the site. A Public Participation Plan is also required for the site. Total petroleum hydrocarbons (TPH), benzene, toluene, ethylbenzene, and xylene (BTEX) concentrations have exceeded Model Toxics Control Act (MTCA) cleanup levels in site groundwater. TPH, benzene, toluene, and xylene concentrations have exceeded MTCA cleanup levels in site soil. TPH, xylene, and lead have been detected in marine sediments. The site was used historically for bulk petroleum storage and distribution between approximately 1950 and 1988, and is currently vacant property.

The Agreed Order and Public Participation Plan are available for review and comment at the following locations:

- Sylvan Way Library, 1301 Sylvan Way, Bremerton, WA 98310 Hours: Mon.-Thurs. 10 a.m.- 8 p.m., Fri.- Sat. 10 a.m. – 6 p.m., Sun 1-5 p.m.

- Ecology Headquarters Office, 300 Desmond Drive, Lacey, WA 98503. (Please call **Carol Dorn** at 360/407-7224 or e-mail [Cesg461@ecy.wa.gov](mailto:Cesg461@ecy.wa.gov) for an appointment.)

- Ecology's website at [http://www.ecy.wa.gov/programs/tcp/sites/chevron\\_tank\\_farm/chev\\_tank\\_farm\\_hp.htm](http://www.ecy.wa.gov/programs/tcp/sites/chevron_tank_farm/chev_tank_farm_hp.htm)

For more information, please contact **Panjini Balaraju**, Site Manager, at the Ecology address listed above or at 360/407-6161 or e-mail [Pbal461@ecy.wa.gov](mailto:Pbal461@ecy.wa.gov).

### SNOHOMISH COUNTY

**JELD WEN, Inc., 300 West Marine View Drive, Everett  
Facility Site ID# 2757**

**Public comment period:  
11/15/07 - 12/15/07**

#### *Agreed Order*

An Agreed Order and associated Public Participation Plan for the JELD WEN, Inc. site in Everett, WA are available for public comment. The Agreed Order requires JELD WEN, Inc. to conduct a Remedial Investigation and Feasibility Study (RI/FS) and develop a Cleanup Action Plan for the site. A Public Participation Plan is also required for the site.

Concentrations of total petroleum hydrocarbons (TPH), polynuclear aromatic hydrocarbons (PAHs), and toluene exceed Model Toxics Control Act (MTCA) cleanup levels in soil and groundwater, and benzene concentrations exceed MTCA cleanup levels in groundwater. Pentachlorophenol (PCP)

and polychlorinated biphenyls (PCBs) have also been used on the site.

A wooden door plant with a machine shop that manufactured parts, and a pole treating yard, formerly occupied the site.

The Agreed Order and associated draft Public Participation Plan are available for review and comment at the following locations:

- Everett Public Library, 2702 Hoyt Ave., Everett Hours: Mon.-Wed. 10am-9pm, Thurs.-Sat. 10am-6pm, Sun. 1-5pm
- Ecology Headquarters Office, 300 Desmond Drive, Lacey, WA 98503. (Please call **Carol Dorn** at **360/407-7224** or **Cesg461@ecy.wa.gov** for an appointment.)
- Ecology's website at [http://www.ecy.wa.gov/programs/tcp/sites/jeld\\_wen\\_everett/jeld\\_everett\\_hp.htm](http://www.ecy.wa.gov/programs/tcp/sites/jeld_wen_everett/jeld_everett_hp.htm)
- Ecology's Public Involvement Calendar: [www.ecy.wa.gov](http://www.ecy.wa.gov)

For more information, please contact **Sandra Caldwell**, at the Ecology address listed above or at **360/407-7205** or e-mail **Saca461@ecy.wa.gov**.

---

## SPOKANE COUNTY

---

**Greenacres Landfill, 308 N. Henry Rd., Liberty Lake, Facility Site ID# 631**

**Public comment period:**  
**10/18/07 – 11/19/07**

*Periodic Review Available to the Public*

Ecology invites the public to review and comment on a periodic review of the Greenacres Landfill site. A periodic review is conducted at least every five years after the initiation of a cleanup action, as required by the Model Toxics Control Act (MTCOA). The purpose of the review is to evaluate site conditions and monitoring data, after cleanup is considered complete, and to ensure human health and the environment is protected.

The Greenacres Landfill site is located about 14 miles east of Spokane, in the

city of Liberty Lake in a former ravine that merges with the Spokane Valley to the north. The landfill property covers nearly 58 acres and served as a dump until closure in 1972. Now, property adjacent to the landfill is a newly developed residential neighborhood.

The Spokane-Rathdrum Prairie Aquifer, a "sole source aquifer" lies under the Spokane Valley north of the site. The aquifer provides drinking water for nearly 500,000 people. Groundwater contamination was discovered in a residential well downgradient from the site in 1978. The contamination included volatile and semi-volatile organic compounds and metals. After additional groundwater monitoring and studies, the U.S. Environmental Protection Agency listed the landfill as a Superfund site in 1984.

Several additional studies were completed and a cleanup action was implemented. Institutional controls including a restrictive covenant were placed on the landfill and property downgradient of the site: Restrictions include: no withdrawal of water; maintenance of fences and locked gates; no site access except for operations and maintenance and no actions that may cause a release or create an exposure pathway.

Ecology has determined the following cleanup actions at the site provide protection for human health and the environment.

- The cover system placed over the landfill eliminates direct contact with refuse and soil contamination.
- The gas management system eliminates gas migration beyond the landfill and potential vapor transport to groundwater.
- The stormwater system manages potential water run off.

- Groundwater contamination is reduced.
- The restrictive covenant on the property remains in place.
- Compliance monitoring continues until Ecology determines it is no longer necessary.

Documents may be reviewed at the following locations:

- Ecology's Eastern Regional Office, 4601 North Monroe, Spokane, WA 99205
- Ecology's website at [http://www.ecy.wa.gov/programs/tcp/sites/greenacres/ga\\_hp.htm](http://www.ecy.wa.gov/programs/tcp/sites/greenacres/ga_hp.htm)

Para asistencia en Espanol: **Sr. Gregory Bohn** at **509/454-4174** or e-mail **Gboh461@ecy.wa.gov**

For more information or to submit written comments, please contact **William J. Fees, P.E.**, Site Manager, at the Ecology address listed above or at **509/329-3589** or e-mail **Wfee461@ecy.wa.gov**.

---

## INDEPENDENT CLEANUPS

A property owner may conduct an independent cleanup of contamination and submit reports to Ecology. When a property owner applies to Ecology for review of their independent cleanup, the site enters the Voluntary Cleanup Program. After review, Ecology sends a letter to the property owner stating either that additional work is required to be removed from the list of hazardous waste sites or that no further action is needed.

## SITE HAZARD ASSESSMENTS

An initial investigation is conducted when a suspected release of hazardous materials has occurred. If additional work is required, a site hazard assessment may be conducted. These sites are ranked on a scale from 1 to 5, with 1 being the highest risk to human health and the environment. The following sites are scheduled for an assessment.
